Here in many pursuits we pass time of

youth

Birmingham Seaholm High School was designed to fill its students' time, usefully, intelligently, creatively. Whether time to study in one of its forty-two classrooms, to play in its gym, swimming pool, on its football field or track, or to participate in any of its extra-curricular activities, this modern edifice stands ready to meet each need. Spread over a thirty-six acre expanse at the corner of Lincoln and Cranbrook Roads, Seaholm was erected in 1952 and expanded in 1955 and 1957 to accommodate 1,800 students. This year 1,540 students and ninety-two faculty members filled most of their waking hours, working, enjoying, living, here.

Averil Baby,  
How in the hell are things with  
you? Like hell I hope! Look kid you're swinging  
you like to be hypnotized. You don't have to tell  
me what I'm like, I know, I'm cool. Look  
for me in Hollywood, like there. I think  
Averil, you ought to be on the stage,  
there's one leaving in ten minutes. Seriously  
though, Good Luck and all that rot.

Bill (Roger) Wenger  
P.S. The reason I wrote in the sky  
is because I'll be there some day  
"a star"

write in your yearbook. Will probably tell me

## Time to Laugh

Time on the scoreboard is running out. Only ten more seconds to keep the Groves' players from making another touchdown. Five . . . four . . . three; the crowd in the bleachers chants the final countdown. The Maples triumph 15 to 13 in their first game with Groves. Seaholm spectators go wild. Some scream, some grasp each other, some blow tin horns, everyone is exuberant, everyone has found a time to laugh.

Time to try for a new Seaholm tradition, decide Student Congress members. They plan and execute the First Annual Installation Banquet, serving a three-fold purpose: to honor Mrs. Darling's twenty-fifth year with Congress, to install second semester officers and to give representatives for both semesters and in both houses a chance to get acquainted. The food is abundant, the entertainment superior, the atmosphere warm and jubilant. After the solemn portion of the program, each guest takes time to joke with his friends, to enjoy his dinner, to feel a part of the general good will, to laugh.

"Time for the curtain to go up," whispers the director to his cast. Despite possible frayed nerves and weak knees, the actors in Proscenium's version of John Patrick's *The Curious Savage* frolic their way through a pretended few days as mental patients. Entangled with teddy bears, millionaires, and politicians, the plot and performance unavoidably provides for its audience the place and time to laugh.

Regardless of the season, heedless of weather or hardship, whenever we are having fun, whenever we enjoy our company, whenever something tickles our wit, we create a time to laugh.

Our laughter varies with the situation. It is proud when our swimmer breaks a pool record, chiding when someone spills paint on the floor while decorating for a dance, sympathetic as our foreign exchange students struggle with English, relieved when the club meeting we scheduled goes off as planned, practiced as part of our act in the Variety Show, hesitant as we give a sales talk for our sophomore wrapping paper. Whatever the occasion, we laugh because we have an abundance of energy—energy given its full vent in our wide range of extra-curricular activities.

Just as the matching bars on the ceiling at Seaborn are reflected in Gary's white, blue, red, and yellow aspirations, and plans at the end of the school year.

## *Time to Build*

"Work out the rhythm in that last measure," advises the band director. Trumpeters, drummers, flutists and tuba players coordinate notes and steps, practicing on the football field in the half-warmth of the November sun. Highly-polished brass mirrors the green and white striped field and anticipates the tension, activity, and half-time performance of Friday night's game. But before their skill can be acclaimed, every detail of their marching routine, every note of their music must be perfected. They must take time to build.

Working for points on their reading lists, sophomore English students haunt the school library during study halls, then change quarters after school and plow through the Baldwin Library card file. With everyone in the class searching for the same books, long waiting lists evolve. The night before book reports are due, speed reading, skimming and just trusting to luck are frequently exhibited. Yet after the ordeal is completed, the book analyzed, reported on and understood, another brick has been laid on the sophomore's literary foundation. If a thorough concept of literary trends and periods results, it is because he first spent time in reading, in thinking, in recording his thoughts, because he spent time to build.

Work on a walnut cabinet in wood shop can be tedious. First plans must be drawn up and wood chosen. Then each piece must be laid out and cut. Next the pieces are fitted together and nailed. Finally the finished piece is sanded, stained, and waxed. The result might be taken home to augment a set of fine walnut furniture, to serve as a book case or a storage shelf for the good china. Whatever its ultimate use, the cabinet will doubtless make its maker proud that he took time to build.

Because we have varied interests and abilities, the foundations we lay differ in composition and purpose. Some endeavor to construct a solid background in mechanics, others in homemaking, still others in academics. Yet during the years of our high school training, each of us has time to make a solid investment in the future, each has time to build.

got a lot of interesting ideas & had it all

Back to the books, Barb! Momentarily forgetting that she has a history test, a book report, a theme and a geometry project due tomorrow, Barb Wilson finds the adventures of Ben Casey far more enthralling than the Hundred Years War.

Together we plan to take over the building of a nation—a nation which needs doctors, masons, lawyers, engineers, architects, mechanics, nurses, teachers, housewives. Our building will require careful planning and a vast division of labor. The bricks will consist of solid skills, of mathematics, English, languages, commercial arts, science, homemaking, held firmly and accurately in place by the mortar of strong will, democratic ideals, and competitive spirit. Every time we take a geometry test, make an oral report in English, construct a Latin project, finish a term paper, print a newspaper, paint a water color, we lay another brick for our own later vocations and for the future of our country.

Annually, on a November evening, parents of Seasholm students attend an open house and have the chance to follow their son or daughter's schedule, spending ten minutes in each class and becoming acquainted with the teacher. Although weary step-climbers and room-number searchers often turn helplessly to student guides, the PTA believes this mock-classroom experience increases parental sympathy and understanding.

Initiated three years ago on a trial basis, Seabrook's summer school program has since increased its enrollment from 500 in 1959 to 770 in 1961. In addition, 600 students took drivers' education, elementary mathematics, reading and typing. Although it enables many students to repeat courses, Seabrook's summer school was established primarily for the acquisition of advanced credit. Studying in small groups for four hours each morning for eight weeks also gives teachers a suitable environment to experiment with new teaching methods. Here Dick Grossman, Tolly Dickson, Judy Sutkin, John Hays, Ron Ricketts and Frank Green take advantage of the summer sun while preparing for tomorrow's test.

## Time to Keep

Seniors will now cheer." The Field Day judges turn inquisitive, critical eyes to the only class they have not yet heard. "We've come to climb a mountain," seniors begin to unfold their tale. "We've come back to climb a mountain, to climb the highest mountain that we haven't climbed before." As points pile up, the mountaineers gain confidence. Complete with Alpine hats and red knee socks the Seniors climb to a record high victory. For every member of the triumphant class, this is a time to remember, a time to keep.

"Senior picture, Bob?" "Sure, if I can have one of yours." The halls echo with such trading procedures and 2½ by 3½ inch rectangles flash from gray bags to hands and back to gray bags again. Comments about Susie's eyes being the wrong color in her color picture and Jim's gold-tone making him look like a movie star abound. When fifty or sixty pal pictures have been collected, some ambitious students originate such clever pastimes as playing old maid or using them as trading cards. Regardless of strange devices, everyone cherishes the pictures of his best friends, everyone has a collection which, in ten or fifteen years, he will be glad he took time to keep.

"Seniors from Seaholm will combine with those from Groves on this year's Washington trip," says the trip director. For the first time Birmingham has two senior classes; hence the Washington trip has two factions. One tours Washington while the other takes the boat trip to Williamsburg, then the tours are reversed. Variety shows, government buildings, train rides, Camelot, and being together with those we've known all our high school years provide for all the spring travelers the memory of an active and educational ten days, a time to keep.

Everything that happens in our senior year has a degree of significance it never had before. This is the last time we will run for office, the last time we can cheer in a pep assembly, the last year to join a club. This year Skip Day, Senior Dinner, Swing Out, Baccalaureate, and finally Commencement belong to us. This is a time to keep.

As Swiss mountaineers, the class of 1962 climbs to the highest victory in the history of Field Day, an annual class competition

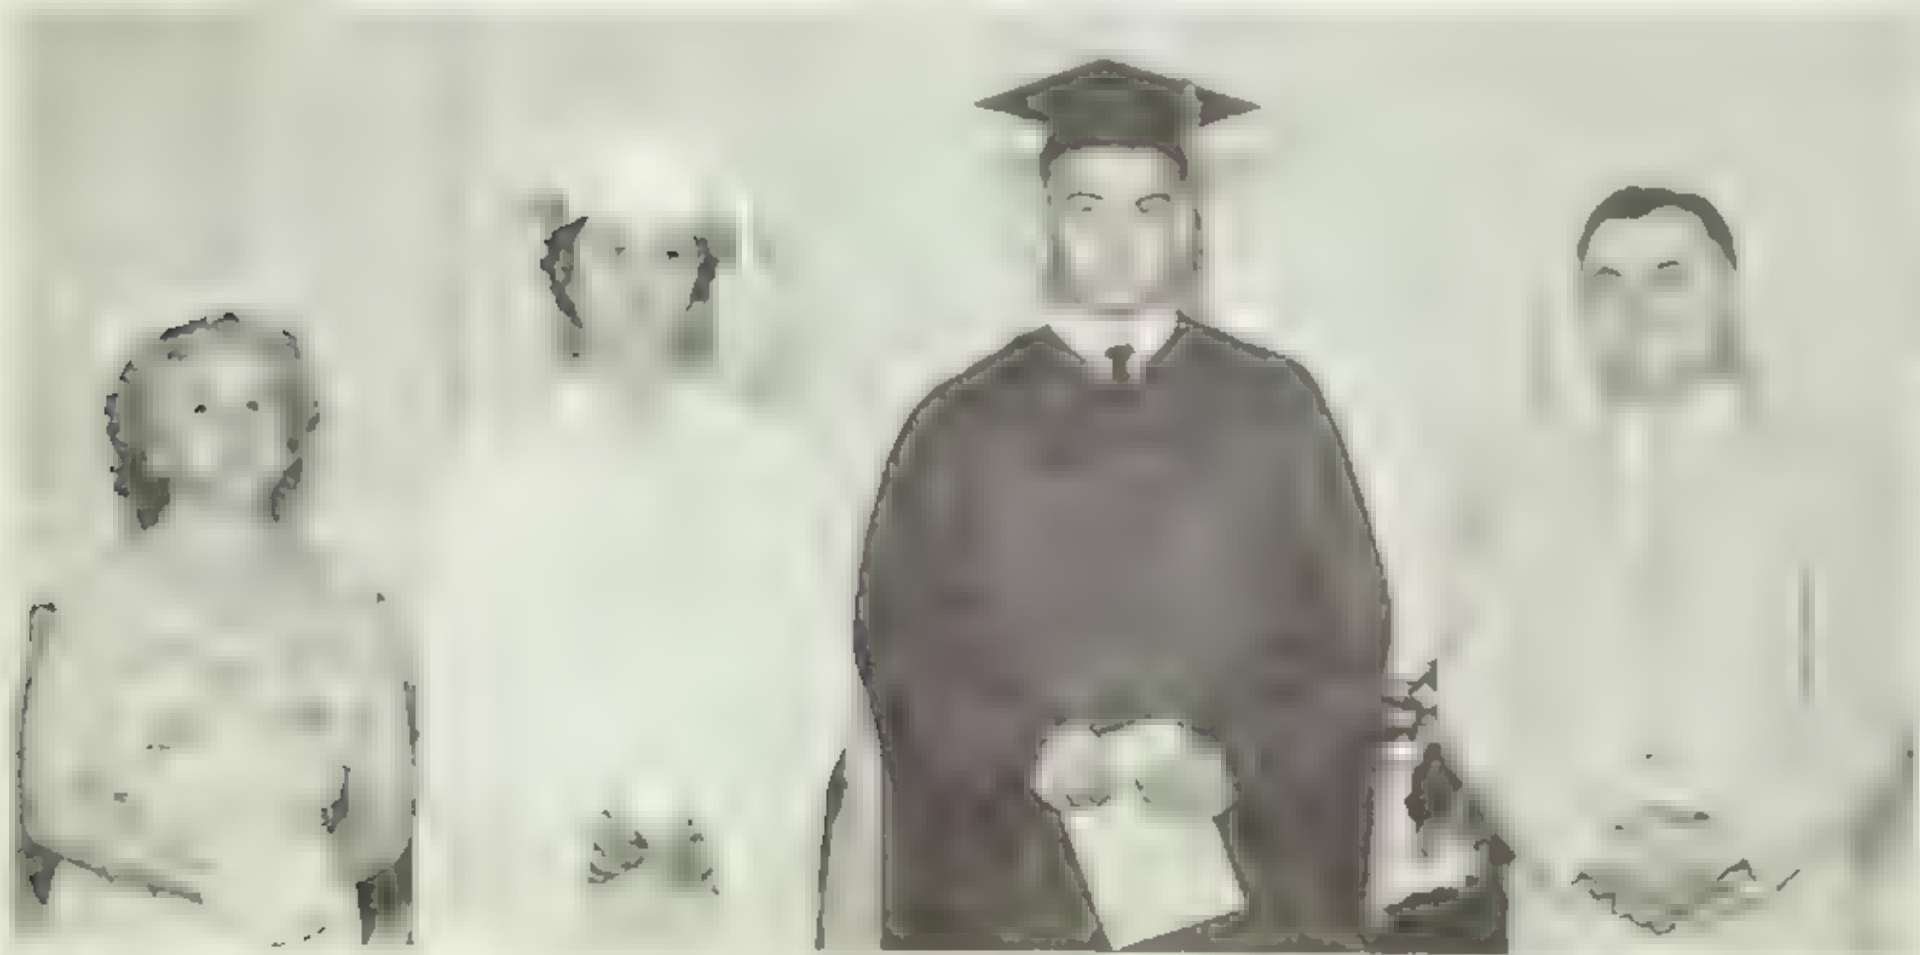

Established in 1953, the Marc Joslyn Memorial Award is Seaholm's most coveted honor. Mr. Myers presents watches and memorial books to Moshy Harvey and Carolyn LeVan, 1961 winners.

Candy Mack and Dan Pierce are congratulated by Mr. and Mrs. Klimushyn for receiving the last of three memorial scholarships established in 1959 when Harry Klimushyn, president of his senior class, died of a blood clot sustained in a scrub football game.

We keep not just memories of the momentous events of our senior year. We recall the alarm clock which announced that class was over when the bells weren't working, the sore stomachs from President Kennedy's physical fitness program, the twist craze, the night we finished our term paper bibliographies at 2 a.m., the day we got our college board scores back, the movies of previous Washington Trip groups, the band in A Wing during Congress campaigns.

Because we will never do them together again, because we are the oldest students presently at Seaholm, because most of us are uncertain about the years beyond graduation, these small events have left a permanent impression.

SELY RUFFLE, a member of the class of 1960, was among the first to be elected to the office of Secretary of the Student Body. She is shown here in a group photo with other members of the Student Body.

As a member of the class of 1960, Sely Ruffle was among the first to be elected to the office of Secretary of the Student Body. She is shown here in a group photo with other members of the Student Body.

SWING OUT THE SAILS! A group of students at a dance assembly held in Jorie, shown here, are seen in a group photo with caps and gowns.

Summer sunshine often brings Birmingham residents to one of the country clubs for swimming, tennis, golf, or a quiet bridge game. Relaxing at the Birmingham Athletic Club, Kathy Good hands Dick Grossman a thirst-quenching bottle of Coke while Emily Edwards sits on the edge of the pool. In the background John Emmett and Cece Smith enjoy the shade of a club sun table.

People who make it their business to play golf, people like Sam Snead and Ben Hogan, big money winners like Arnold Palmer and Gary Player arrive at Birmingham's Oakland Hills Country Club for the June 1961 National Open Golf Tournament. Birmingham boys are eager to caddy. Some take final exams early to allow more time for shouldering clubs; others see their pictures in *Time* or on television. Birmingham offers its services, its facilities to the nation's finest golfers, people who need a time and a place to gather.

People all over the globe stop to watch and listen. Men stay home from work; church guild meetings break up early or converge on the nearest television; anxious teenagers hide transistor radios between their books; the stock market makes remarkably few transactions; people in Perth, Australia, turn up all their lights; Japanese stay up half the night listening to the radio; Pope John prays fervently in the Vatican while every American echoes the same plea—that Colonel John Glenn successfully complete his three orbits around the earth. Throughout Birmingham, throughout the world people await news of his success, grouped around televisions, radios, news stands, everywhere unconsciously taking time to gather.

People from the Methodist, Presbyterian, Episcopal and Congregational churches take steps toward national unity. In Birmingham these four youth groups plan a joint worship service followed by serious discussion of doctrinal differences. Later, they again merge to co-ordinate Birmingham's first inter-religious dance. To promote a national joining of the Protestant faiths, Birmingham youth groups plan time to argue, to agree, to enjoy, to gather.

## *Time to Gather*

might & become incriminating all along

The building is the main entrance to the city hall. It is a large, ornate structure with a central tower and a clock face. The building is made of stone and has many windows. In the foreground, there is a street with some smaller structures and a few people walking.

The building is the main entrance to the city hall. It is a large, ornate structure with a central tower and a clock face. The building is made of stone and has many windows. In the foreground, there is a street with some smaller structures and a few people walking.

Because we in Birmingham like to be with people, we take every opportunity to gather. We assemble when our church starts a Sunday morning Bible class, if a neighbor's car has a flat tire, because Kay Baum's is having a sale, when *West Side Story* makes its premiere in Detroit, wherever there's something good to eat, whenever someone is having a slumber party, to wish the best of luck to friends moving from Birmingham, to share in the recounting of a rich experience, when our youth group has an enlightening speaker, when the Leon skating rink opens for the winter, because the teen center has a good dance band, to scrutinize the displays in Shain Park during the Birmingham Arts Festival, when the Cranbrook Institute of Science opens a new mathematics exhibit.

Discovering an abundance of cultural, recreational and religious resources in Birmingham, we seek to complement the healthy education of mind and body gained at school with experience, inspiration, and facilities gathered from our community.

Acting as junior lay reader for St. James Episcopal Church, Bob Brown reads his section of the Service of Nine Catechisms and Lessons, a special Christmas service given this year for the first time in Birmingham.

To recognize outstanding students of both Groves and Seaborn High Schools, the Optimists, a businessmen's club newly organized in Birmingham, invited the best athlete, most active student officer and leading person in publications to a dinner held to breakfast at Greenfield's Restaurant and lunch at the Sheridan Cadillac in Detroit. Honored were Peg Loume, Art Schurder, Greg Frontier, Mayor Florence Willett, Don Spencer, Sue Krieger and Bob Rice.

Honors all those who saved time to serve

When the time came to serve their country, when their nation's future was at stake, men, once students of Birmingham High School, joined the armed forces. Some returned; some gave their lives. To these soldiers, sailors, and aviators who have fought America's wars, who comprise her heroes and her veterans, the Rotary Club of Birmingham dedicated a memorial, erected to the right of our main entrance in 1952. Designed by Marshall Fredericks, the monument bears the inscription: "Honoring those who served our country."

In 1946 Mrs. Darling was completely in charge of Student Congress activities because there was no Senate. Having two active Congress presidents in a row proved the source both of the first EML Conference's being held at Baldwin High School and of the first Civic Control Day in 1947. Mrs. Darling's responsibilities since her years at Baldwin have steadily increased.

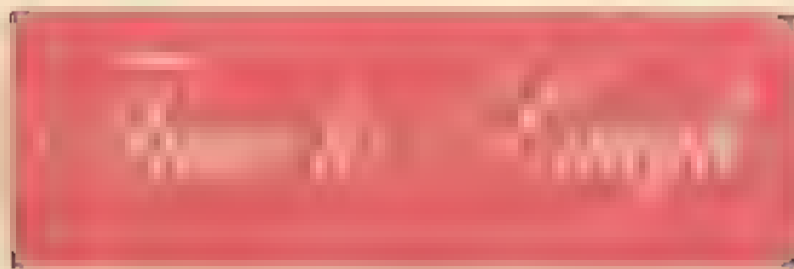

Every year, for instance, she is invited to speak at the Ciccone newsmen's dinner. She never gives a formal speech and has the unique talent of making everyone she mentions gain the immediate admiration of the audience.

One of her daily duties is checking the parking lot situation with Officer "Scotty" Rosa, totaling the number of tickets collected and the number of vacancies in both lots.

Because she is in charge of every student activity outside the classroom, Mrs. Darling's waiting line is notoriously long and she has developed the art of concentrating on at least six dilemmas at once. Anxious to discuss everything from the bon fire to Biology club, frustrated students Murray Stewart, Andie Stuckel, Wendy Isherwood, and Bob Kennedy have established a make-shift waiting room on the floor outside her office while Mary Randall and Harvey Wallace contend for her attention on two entirely unrelated matters.

# Mrs. Darling guides Congress for 25 years

A black and white photograph of a woman sitting at a desk, smiling. She is wearing a light-colored, long-sleeved top. On the desk in front of her are several papers and a small object. Behind her is a lamp with a large, round shade and a framed picture on the wall.

—

## SHS'ers participate

Even though students at Seaholm are busy with the pleasures and problems of school work, most of them find time to participate in various activities throughout the school year.

Among them is Field Day, which gives the classes a chance to work together striving for a common goal. The all-school Variety Show, although it does not include the entire student body, is an ideal opportunity for some to display their talents.

Representing their homerooms, teens work on Student Congress committees, the various charity drives, and on J-Hop as these are vital parts of the school. The enthusiasm, pep, and interest students show clearly reveals the importance of activities in school life at Seaholm.

Participation by everyone—this is one of the goals of Seaholm's extra-curricular activities—and Field Day gives most of the student body a chance to get into the

swing of things. Cheers and shouts of encouragement resound from the Junior class as the Pirates urge their fellow members on to possible victory.

time she was squashed a foot in her sleep -

## Senior faces show strain of battle as the class

Patti Headlock gets the Seniors off to a flying start in the flag shuttle relay—and they were never headed as they swept easily to victory. Since this event is first, it sometimes serves as a barometer as to how the day's activities will end.

"Climb Every Mountain," the challenging and hopeful theme of the Seniors proved to be successful in the 1961 Field Day. In costumes of khaki bermuda shorts, red knee socks, and red felt hats, the class members pushed themselves on to an overwhelming victory.

With hard work, original thinking, and careful preparation under the direction of Miss Allen, faculty advisor; Peg Lourie, Senior Field Day Chairman; and Murray Stewart, Senior class president; the class was able to perfect all aspects of the parade.

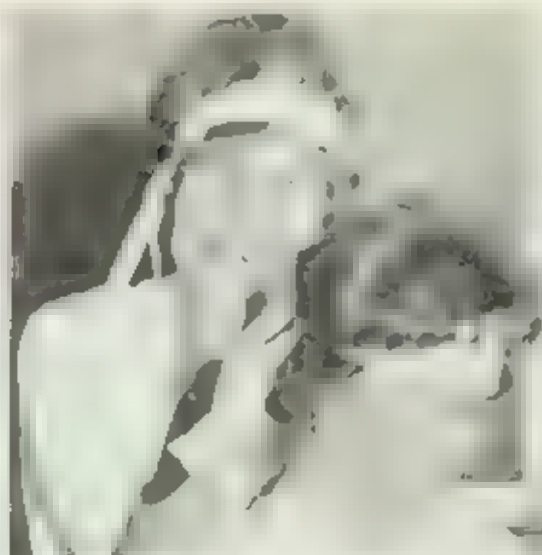

Dehydration paid off in the girls' tug-o-war for the Seniors as Jacquie Barnum, Sherry Shark, Jane Whitney and other members of the team pull mightily.

Two events that contained plenty of laughs and excitement are the sack race and the egg toss. Nancy Metcalfe shows her jumping skill while Lee Decker catches the egg.

## Yo ho laugh turns to tears as Juniors lose

Masquerading as Pirates, the Juniors entered Field Day activities with an air of confidence. However, their reward was not a first place as many of them had hoped. As has been common in the past, they came in second to the Seniors. Even though the victory was not to be their costumes, and especially their marching, were clever and different. Aided by Junior Field Day chairman Lillian Jackson, the class devised a type of hand and voice rhythm to keep in march step.

With Alan Talbot as anchor man, the Junior boys defeated the Sophomores in the tug-o-war, but despite his efforts and those of John Carson and Thatcher Cadwell, they lost to the Seniors.

Nancy Wallis, Mike Williams, Pam Ross, Cindy Roberts and Dave Sanders attentively watch as results unfold before them.

Trying to observe the position of their opponents in the girls three-legged race are Betty Shelley and Mary Lynn McDonald.

## A black and white photograph of a man in a suit sitting in a car, looking out the window. The image is framed by a dark border.

MSU students temporarily join Seaholm's

# MSU students temporarily join Seaholm's

Relaxing in the Little Apartment, student teachers find it enjoyable to relate their experiences and problems to each other. Seated

Attentive observers, helpers, and finally teachers, describes the rapid pace that student teachers take at Seaholm. Gaining rich experiences and ideas from both students and teachers, they eagerly attempt to prepare for their future careers. At first, the student teacher only observes in the classes. Then he attempts to adapt to them by assisting the students and occasionally teaching. Finally, he is completely in charge of the classes, both teaching and testing them.

Michigan State University, as part of its teacher training program, sends numerous practicing teachers to Seaholm so they may gain some teaching ability. During their stay at Seaholm Mrs. Kay Reed, the student teacher coordinator for the Birmingham school system, has several conferences with the student teachers to discuss problems which often arise. Every fall, winter and spring a new group of enthusiastic student teachers arrives at Seaholm to begin their teaching careers. They will long remember these days at Seaholm, having gained extra knowledge and vast experiences.

Giving tests is an essential task for every student teacher. Bob Hubbard and Ann Hric turn in their papers to Linda Paskevich who is assisting Mr. Buell in his English classes.

are Judith Caddell, Claire Van Camp, Cheryl Reed, Linda Paskevich, Linda Clarke, Rosemary Kervin and Sarah King.

# Faculty to gain useful knowledge in teaching

During December many Seaholmites discover new faces among the faculty. These unfamiliar people are the group of student teachers who come to Seaholm during the winter term to temporarily become a part of its faculty. The diligent work of these seven student teachers in the fields of speech, history, commercial work, Spanish and English, is highly recognized by Seaholm's faculty and student body.

Preparing daily lessons, teaching classes, and attending weekly seminar meetings is the never ending pace of student teachers. After several weeks of practice teaching many of them have different reactions toward their chosen career. Some find this brief introduction to teaching the deciding point in becoming a teacher. Others acknowledge it to be the outstanding experience of their entire education. Throughout these rugged weeks they witness the hard work of teaching and also the rewarding satisfactions. With the willingness of "cooperating" teachers to assume responsibility for these student teachers, Seaholm is able to assist in the valuable practice teaching program.

Claire Van Camp, who is student teaching under Mr. Sides, explains a Spanish phrase to Linda Roberts as Donna Meyers looks on.

Clifford Rice, student teaching for Mr. Taras, explains a historic event to Linda Frankfort.

After discussing specific geographic points, Judith Caddrell, assisting Mr. Petrakis, illustrates them with several colorful maps.

# Student Congress meets for joint session

Greg Emmett, first vice-president of the Student Congress, presided over a joint meeting of the House in the Little Theater. The alternates, as well as the regular members, attended this session to prepare themselves for their participation in Congress affairs during the second semester.

**FRONT ROW**—Dan Fox, Chris Hoffman, Beth Boerama, John Emmett, Greg Frontieri

# Student Congress shares school governing

Student Congress is the only organization at Sea-holm in which the student body is able to share with the administration in the governing and managing of the school. Congress consists of two houses—the House of Representatives and the Senate. The House, including a representative from each homeroom, has Mrs Darling as its sponsor. In the Senate, each class has two senators plus its class officers and honoraries. Its activities are under the direction of Mr. Richards.

The organization has four officers—a president, vice president, secretary, and treasurer. At the end of each semester elections are held and new officers are elected by the popular vote of the student body.

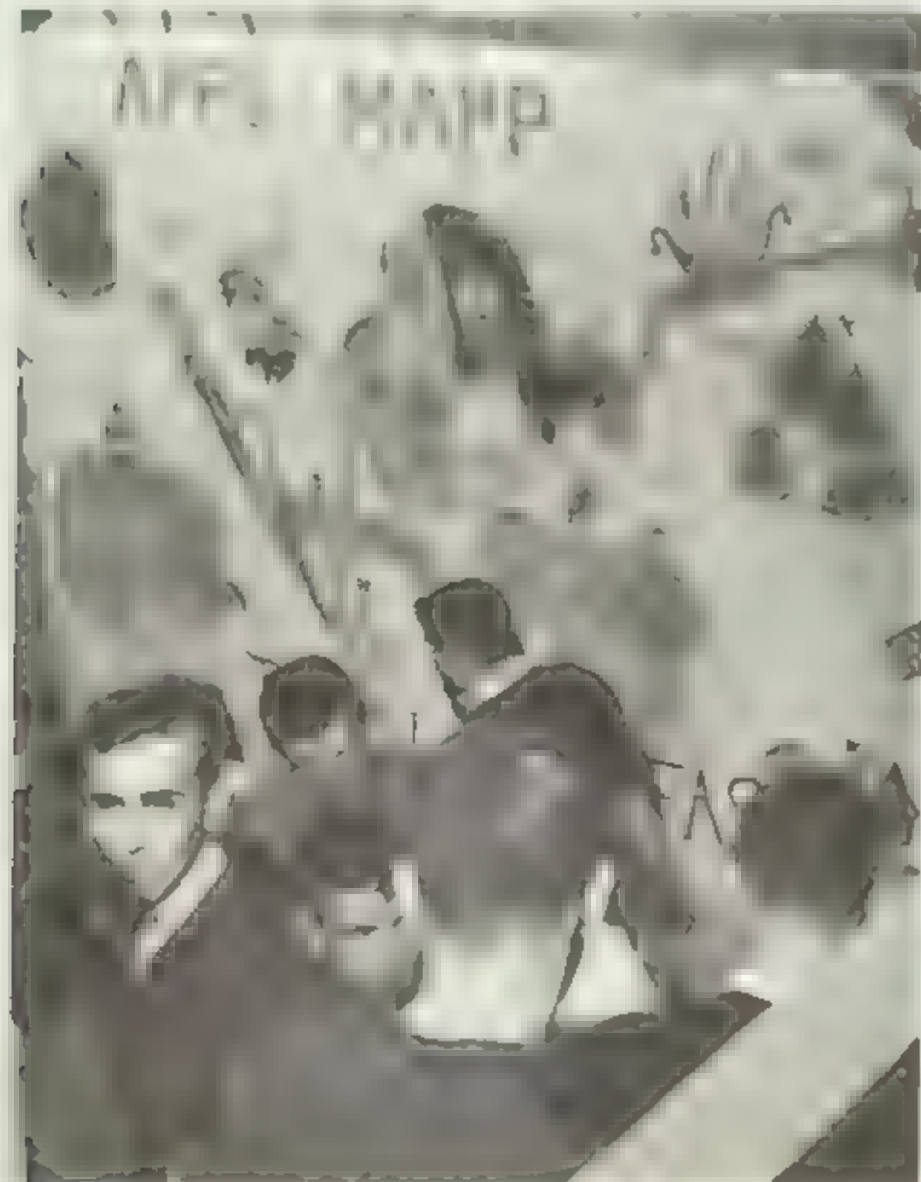

Both houses of the Congress engage in a number of important activities. Among the major projects of the House are Field Day, Eastern Michigan League Conferences, the American Field Service and Michigan Council of Churches programs, and the Christmas dance. The Senate grants all permits to earn money, charters all clubs and conducts all school elections.

During Student Congress elections candidates for office use various campaign devices in their attempts to win votes. Trudi Appleton, running for treasurer, attracted a number of wondering passers by her campaign. However, in spite of her ingenuity, Trudi lost.

Left to right: First semester Student Congress president, poses a question to the old and new officers Tom Stevens, Mary Randall, Emily Edwards, Frankie Quillian, Bob Kennedy and Geoff Gilbert. John McCullough, second semester treasurer, is not pictured.

John McCullough and his numerous supporters caused quite a "traffic jam" in the hallway during the election. His supporters helped him to become Student Congress treasurer, for the second semester.

## Broadway acts give

Practicing for their modern dance act, Mola Enderle and Sue Savage, two talented sophomore girls, concentrate on perfection during rehearsal.

With its theme centered around shows from Broadway, both past and present, the all-school Variety Show presented 25 talent packed acts under the title "Broadway Marquee" just before Thanksgiving. Under the general direction of Mr. Bagg, student directors Elise Hendrixson, Jeff Reuter, Lou Turf, Gary Witbeck and Betsy Binns, along with Miss Spencer, worked to organize and polish the show.

Over 100 students, not counting the members of the band, participated in group and solo acts. Seaholm's band, led by Mr. Kutscher, did an excellent job of carrying out the theme of the production.

Rehearsals were somewhat hampered by lack of time but the two-day run of the show was quite enjoyable. A wide range of acts—novelty, dance, singing and monologues—gave the large crowd of students and adults attending an evening of entertainment.

Posing as typical teen-age girls at a slumber party, Judy Gontz, Elise Hendrixson, Diane Lerminey, Candy Clemens, and Cindy McHugh engage in a gossip session singing *Maria*.

Steve Collister displayed his talents both as a singer and a guitar player in his solo performance in the Variety Show.

and the Social Movement for Liberty was established by the Congress of the People. The Congress was held in the town of Bogotá, Colombia, and it was the first time that the people of the country had gathered together to discuss their future. The Congress was a success, and it led to the establishment of the Social Movement for Liberty, which was the first of many movements that were founded in the country. The Social Movement for Liberty was a success, and it led to the establishment of the Social Movement for Liberty, which was the first of many movements that were founded in the country.

Only 10% of the 1000 samples were found to contain  $C. k$  (100). The second common pathogen, *Trichomonas*, was found in 10% of the samples (100). The third most common pathogen was *Trichuris* (100). The fourth most common pathogen was *Ascaris* (100). The fifth most common pathogen was *Strongyloides* (100). The sixth most common pathogen was *Enterobacter* (100). The seventh most common pathogen was *Shigella* (100). The eighth most common pathogen was *Salmonella* (100). The ninth most common pathogen was *Yersinia* (100). The tenth most common pathogen was *Campylobacter* (100).

# "Palais de Glace" given to honor class of 1961

"Palais de Glace," 1961's formal dance, was elegantly presented by the Juniors to the graduating class of 1961. Months of diligent work and planning resulted in a memorable evening of enjoyment for a thousand students. Their winter theme was carried out with splendid decorations—glittering trees, snowflakes, and ice statues.

Almost unrecognizable, Seaholm's gym was a glittering palace, constructed under the supervision of Virginia Griscorn, decoration chairman. In the center of the dance floor hung a revolving mirrored chandelier, sparkling brilliantly as it turned. White patio furniture as well as a carved ice statue filled the east balcony while the opposite balcony displayed a refreshment area. The white cloth with silver ribbon covering the ceiling was another extremely difficult project the Juniors undertook with success. Showing ambitious qualities, the Juniors also constructed a fabulous mountain adding a touch of realism to their "Ice Palace."

Many couples began the evening with supper or parties with their friends before arriving at the dance.

Amazed at the detail of the J Hop decorations, Bud Blum, Linda Blow, Gary Sherman, and Donna Smith gaze at the synthetic underground pool, made doubly effective with dry ice and surrounded by ferns and rocks.

Couples enjoyed themselves at the "Palais de Glace," dancing to the music of the Tommy Warney Ridd bands, getting refreshments in the refreshment area, and serving the fantastic ice penquin which added a touch of realism to the memorable evening.

# Besides lunches, staff prepares banquets

Drinking a cup of coffee while counting the day's lunch receipts are Mrs. Hazel Patiseau, Supervisor of Cafeterias in the Birmingham School system, and Mrs. Gertrude Killing, Seaborn's cafeteria manager.

Seaborn's cafeteria staff, carefully chosen women who understand the purpose of the school lunch program, serve over 1,100 hot lunches daily to students and faculty members. This is nearly 70% of the school. But the preparation of school lunches is not the only task of the 14 members of the staff. In addition, they serve banquets for various school organizations such as Cicerone, BUNA, GAA, the sports banquets, and the band and journalism banquets. They also provide refreshments for several faculty teas.

The kitchen staff has shown its adeptness at decorating the cafeteria. On their own time, they decorate it with jack-o-lanterns for Halloween and at Christmas cards and plates filled with symbols of the joyous season are displayed.

Our cafeteria, like the other Birmingham school cafeterias, receives aid from the federal government in the form of surplus commodities. These include frozen ground beef, chicken, turkey, and dry milk.

Waiting behind the festively decorated counter for the rush of ravenous students in Seaborn's cafeteria staff. From left to right are Gertrude Killing, Ethel Schaule, Florence Ermatinger, Hazel

Flury, Sue Donnelly, Ruth Lotero, Jennie Carroll, Caroline Loter, Althea Aldred, Ethel Reynolds, Martha Lamb, and Henrietta Louisan. Not shown are Helen King and Dorothy Lisewski.

# Efficient custodial crew maintains Seaholm

The day shift custodians have just completed straightening the cafeteria after lunch. From left: Homer Westerby, Josephine Roberts, Robert

Kinney, Robert Caskey, Fred Hatley, John Jones and Paul Winter pause for a minute before starting their next chore.

No small job is that accomplished every working day by the 21 Seaholm custodians. Cleaning 71 classrooms and approximately 30 offices, laboratories, shops and other workrooms—including the gym and swimming pool—occupies the time of two separate work forces.

Headed by Homer Westerby, a veteran custodian of 37 years in the Birmingham school system, eight of which have been spent at Seaholm, these men not only clean the building, but do the countless hundreds of

minor repair jobs necessary to keep Seaholm in top condition. Major repairs are done by specially trained men from the maintenance department.

Extra chores handled by the efficient crew involve preparations for banquets, dances, athletic contests and assemblies, the heavy work connected with the washing of dishes and cleaning the kitchen and cafeteria, and maintaining the grounds surrounding Seaholm, including the upkeep of the athletic field.

Rolling down the bleachers in the gym in preparation for an assembly are the afternoon janitors Frank Snider, Andrew Matisko, Lewis Bruder, Wesley Frantz, John C. Cramer, Paul

May, Thomas Gugsley, Frank Kayga, Orville (Ted) Hart, and Don Andrews.

# Students take active part in charity drives

Showing their interest in the Torch Drive are sophomores Chris Howell, Karen Piel and Dave Todd as they post a picture of the traditional United Foundation torch on A2.

Among the various projects and activities of the school year are three annual charity drives which have been authorized to solicit funds or materials from the entire student body.

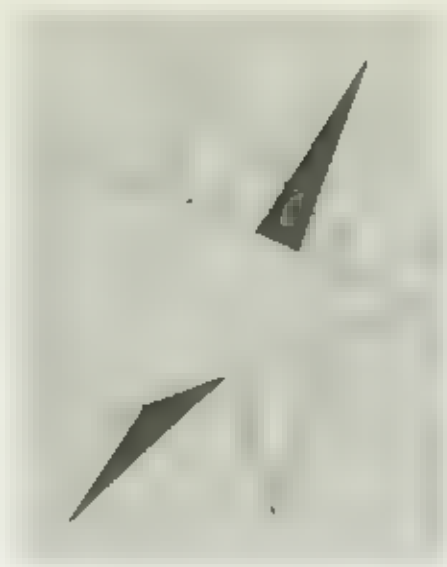

The first fund-raising campaign is the Torch Drive. Participation is city-wide and the money collected by the United Foundation is divided among a number of worthwhile charities.

During the Christmas season, the traditional Christmas basket drive takes place. Each homeroom is asked to fill a basket with food and gifts for a needy family previously chosen from a list by the homeroom Congress representatives. These baskets are given for distribution to the Salvation Army at the annual Christmas Assembly.

Seaholm students are given a chance to help unfortunate people living in other areas of the United States by contributing used articles of clothing to the Save the Children Clothing Drive held in February. This also is handled through the homerooms as were the other two charitable campaigns.

Bob Williams, Ted Adams and Karen Jackson participate wholeheartedly in the clothing drive as they strive toward their goal of two bags filled with clothing.

## Promote exchanges

One of Seaholm's most active organizations is its exchange student program. This year we had seventeen students going abroad and four foreign students attending our school. Throughout the year their presence is felt in the many activities in which they participate, especially the assemblies they give, the Christmas tree they decorate, and the American Field Service Drive.

The drive takes place in the early spring and lasts ten days. Homerooms compete against each other to see who can earn the most money. Competition is especially high among the junior homerooms where the top rooms receive the exchange students the following year.

Last year over \$3,000 was earned by the school as a whole. Half of this amount was contributed by the top five junior homerooms.

During the AFS drive many diverse money making projects inevitably evolve. Here Karen Wise sells her baked goods to Sherry Nuremburg. Meanwhile,

Darleen Roth, John Thompson, John Videgar, Gail Cornell, and Andy Rogin try to guess the amount of money in the jar as Laurie Leitch registers the guess.

# MCC, AFS committees cooperate to serve

Some of the MCC students who have received their acceptance for exchange are shown in this photo. From left to right: Lotimer, Sue Fortenbaugh and Sandi Strom.

The Michigan Council of Churches program has been at Seaholm for only two years. However, it has already become an important part of the school. Last year there were three MCC students who left the school with many interesting memories. Last summer seventeen Seaholm students spent the summer abroad as a part of the MCC program. This year two MCC students from Germany, a boy and a girl, are attending Seaholm.

The MCC committee is similar to the AFS committee in its purpose. The primary purpose of both is to help exchange students adjust to the different life here in America. Screening is done differently by the MCC committee because there is no limit on the number of students who may apply from one school. The committee interviews applicants and sends its recommendation to Ann Arbor where it is used in making final decisions. In order to raise money for the Washington trips of the exchange students the combined AFS and MCC committees presented a dance entitled "Unamerican Activities." Other exchange students in the area were invited and introduced and a medley of German songs was sung by Ro and Chris.

One very important accomplishment for both the AFS and MCC committees this year was that they were able to work together much more compactly and thereby achieve many more of their mutual goals.

Interviewing students is a very important task of the MCC Committee. This year the students were interviewed by the committee and the recommendations were sent to Ann Arbor. The committee consists of Nancy Turner, Sue Hebblewhite, Bruce Tinker, Bob Kennedy, Francie Quilman, Steve Collister, Kathy Ruhl and Beth Boersma.

# foreign students, applicants in varied ways

Many responsibilities face the AFS Committee as they begin a new year. Numerous small tasks fall into the category of making the AFS students feel at home. This includes greeting them when they first arrive, acquainting them with the school, buying gifts at Christmas and birthdays, and helping them with any problems. Schoolmates abroad must not be forgotten and a close contact is kept with them.

A major undertaking is the screening of applicants to go abroad, which is done by the student committee and a group of adults. Students apply in the fall of their junior year. The names of four finalists are sent to the main office in New York.

With spring comes the AFS Drive. The committee is in charge of coordinating it. Some of the money from the drive is sent to New York while the rest remains with our school to support the students for the next year.

Preparing the sign which will greet Nilla and Peter, Seaholm's AFS exchange students, as they enter the school is the AFS Committee of John Emmett, Sally Kelly, Cecil Smith, Jeanette Rucinski, Harve Wallace, Mac Le Fevre, Sally Bowering, Jim Emmett, and Mary Roubell.

Finalists on the AFS program to go abroad next year are Trudi App, Lillian Jackson, Dave Sanders, and Tom Brooks shown here looking over their final application. Trudi, Lillian and Dave are applying for the summer program, while Tom is applying for the winter also.

## Nilla gains new impressions

Nilla Wennerberg

"I am very impressed with the generous, friendly and spontaneous people that I have met in America." The experience of living with new and different people has not only presented Nilla Wennerberg with many new impressions but also confirmed her plans to go into the Foreign Service after she finishes school. The relationship of American students to their teacher provided a change for Nilla from the more formal relationship which prevails in Sweden. The new atmosphere, studies and language have not, however, affected Nilla's grades.

On first arriving in the United States, Nilla was exhausted by the fast pace which Americans (especially the teenagers) lead. However it did not take her long to adjust to the new life as she kept busy with extra-curricular activities and outside studies. As a member of Ski club Nilla attended a week end trip to Walloon and chipped a bone in her ankle. This accident provided her with a new experience though as she discovered the American custom of signing autographs to the cast. The cast did not prevent Nilla from appearing in the Proscenium play *The Curious Savage* in which she played the nurse.

Cooking has occupied much of Nilla Wennerberg and Sue Canfield's time at home. Here Sue demonstrates the proper technique for making a fresh, green tossed salad for dinner.

Christmas in Sweden is observed in much the same way as in America. Nilla, her mother, and sisters Gertrud and Brigitta exchanged gifts around the family Christmas tree.

Nurses aren't supposed to become emotionally involved with their patients but Nilla, rehearsing with Bob Fredrickson, shows more than a professional concern for her charge.

# Peter likes drive-ins, school

The differences between Austria and America manifest themselves in several ways for Peter Hotzl. "Life here in the United States is spent more in a hurry

The people here are more friendly and usually answer in kind, polite words even though they might not feel like it . . . I never saw drive-ins before

The school system here is also much more useful for life with the possibility of having a choice of subjects." However Peter does not feel that these differences tend to separate us. "We have in common the personal freedom guaranteed under the rule of democracy."

Peter has found many activities to occupy his time here. In the fall Peter began by going out for cross country and working diligently with the team. He was able to enjoy another of his favorite sports, tennis, by joining the team. Skating on the family rink and skiing on the trip to Walloon Hills provided Peter with more leisure fun. Peter's time is not completely absorbed by sports for he is also active with BUNA as an Austrian delegate, in the new International club and with his studies. Speeches given before many organizations must be prepared carefully and require much of his time

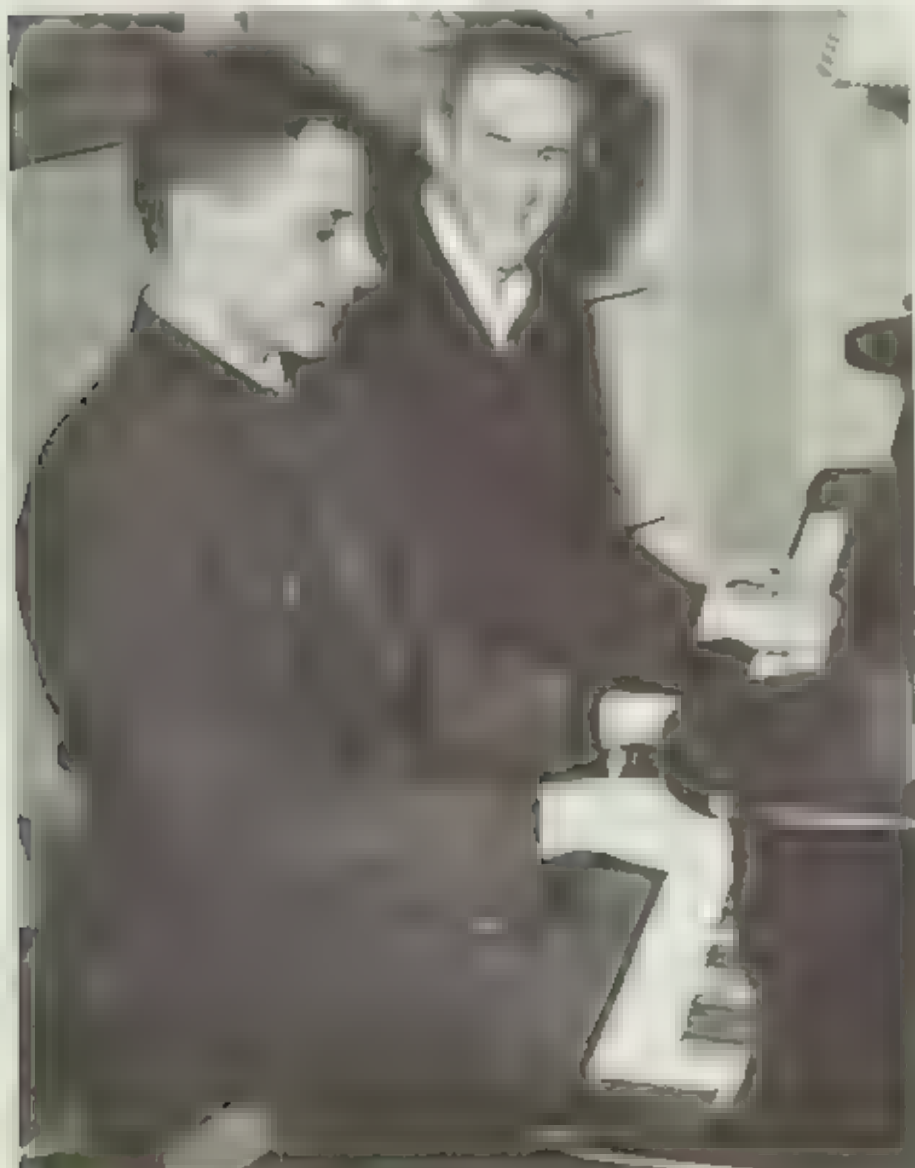

Peter Hotzl

Sightseeing in the city of Vienna, Austria are Peter Hotzl and his family

Passing some of their spare time together are Peter Hotzl and Bob Spencer. They enjoy sitting down at the piano together and trying to play duets

The backyard rink of the Spencers provides many hours of recreation for Peter Hotzl. Skating and skiing are two sports which Peter found popular in both the United States and Austria

in get chance in during school. Once's first time

## Ro to remember school fun

Ro Briesenick

Seaholm was fortunate to have two exchange students from Germany. Rotraud Briesenick with her cheery smile and perceptive way has represented her native Berlin very well. Speeches, meeting new people, explaining about her country and especially about the situation in Berlin, keeps her very busy. Nevertheless Ro has also joined numerous school clubs and activities. Some of them include Student Congress, International club, and BUNY where she was a member of a leading African delegation. China. In this club she was able to further her interest in languages and other countries and people. GAA has provided Ro with the chance to participate in her favorite sports.

Coming from a boarding school in Germany, Ro found our schools very different. But she found "fun in school enjoying the school spirit and activities." Seaholm will not forget Ro and Chris and their German songs. Their entertaining duet topped the Christmas assembly, Student Congress banquet and AHS MCC dance with an international flavor. Ro Briesenick has brought Berlin closer to us.

A modern building rebuilt in Berlin after the war is the Congresshalle. It houses the representatives who govern West Berlin.

Working together helps pass much of Cheryl Brokaw and Ro Briesenick's studying time, especially when a plate of cookies is handy.

Admiring one of the pieces of art on display is Ro Briesenick. Many people do not realize her interest in this field.

# MCCer is example to follow

Energetic, friendly, intelligent, all these words used by his fellow students describe Chris Hoffman, MCC exchange student from Dortmund, Germany. "My greatest experience is the kids. Talking, swimming, dancing, toting, riding and laughing with them is the most tremendous thing that ever happened to me," are words spoken by Chris about his American friends. His many activities illustrate that the words speak the truth. During Field Day he participated in the tug-o'-war and the flag shuttle relay. As a member of the swimming team he is a strong free styler. In BUNA he not only served as the Russian delegate but also worked as a Soviet bloc leader.

However, extra-curricular activities are not Chris's only interest. His schedule includes such subjects as Honors English, Honors History, and International Relations. In some of these classes he astonishes the students with his knowledge. Chris should serve as a fine example for any exchange student to follow. Being as outgoing as he is, Chris has made it easier for us to adapt to him, and we have also succeeded in helping to make him American in some ways.

Chris Hoffman

Swimming is an interest which both Chuck Morse and Chris Hoffman share. Both are hardworking swimmers on the Maple squad.

History, whether it be American, German, or world, is interesting to Chris Hoffman, who especially enjoys discussing it with his teacher, Mr. Myers.

Chris Hoffman's outside activities are not restricted to School. Here he reads part of his graduation ceremony in carrying out his duty as president of his class in Germany.

thing for them

# Seaholmite goes to Germany

Patsy Gordon

Our only AFS student who was sent abroad this year was Patsy Gordon. Sailing from New York on August 22, she spent a half year in Germany. During the ten day trip aboard the S. S. Seven Seas the AFSers attended classes and studied about their new countries and attempted to learn their new language. After arriving in Europe Patsy traveled to Cologne where she attended a language camp for two weeks. Then on to Berlin, where Patsy was to stay with her first family for three weeks. She was able to see the wall which was erected just a little more than a month before she arrived in Berlin.

Patsy's second family lived in a small resort town in the north Germany called Bad Salsufen. Here she attended a 500 student girls' high school. On a small trip to the university town of Göttingen Patsy was able to see the East-West border with a fence and a plowed strip so that any escaping East German must cover a wide open space and therefore easily be seen by the guard. In this same town Patsy saw a refugee camp which houses those persons who have recently escaped across the border.

Standing in front of the garden house with her first family in Berlin is Patsy Gordon. The family included her father, mother Patsy, a sister, 14, and another sister who is not pictured. While staying with this family, Patsy was able to see much of the city which helped her to decide that Berlin is her favorite part of Germany. She hopes someday to return there.

Aboard the S. S. Seven Seas Patsy Gordon and many of her American friends attend a Captain's banquet. On the trip over the students attended classes to learn about their new countries. On their return trip they tested their newly learned German on each other and discussed their many adventures.

Walks with her little German brother gave Patsy Gordon a semi-private chance to practice her German and also see Germany from a younger point of view. This walk takes Patsy and her brother through a tree nursery. They are standing on a fence which was erected to keep the deer from eating the baby trees.

# Steambath, shooting occupy MCCers' time

One of the countries visited by MCCers was Finland. Jerry Mason lived in Helsinki and traveled in the Scandinavian countries for two months. Jerry and his Finnish brother toured Lapland in their automobile for two weeks. During the trip they climbed Arctic hills and visited the Russian border just below the Arctic Circle. Jerry also visited Stockholm for a week and traveled with his family to their summer cottage on a Finnish lake. Here Jerry was able to use the sauna, sometimes referred to as a steambath.

Golfing seems like an unusual sport for Germany. However, Cheryl Brokaw, who spent the last summer in Germany, discovered that golfing is becoming very popular there. Another sport which occupied some of Cheryl's time was rifle shooting. While she was there the town was having its annual shooting festival. Members of the local shooting club donned their medals and displayed their skill. After spending three weeks at "home," Cheryl and her family traveled to London for one month. They also spent two weeks in southern Germany where her grandmother had a castle.

Admiring the beautiful reindeer skins which were given to him as gifts is Jerry Mason. The valuable skins were given to him by a native Laplander in return for a kindness of Jerry's.

In front of her home in Bielefeld, Germany, is Cheryl Brokaw. Some of the members of her family included Suzanne, Cheryl Uno, Mrs. Bleck, Nanni and Sephan.

Cheryl Brokaw

Jerry Mason

# Germany visit broadens insight, horizons

Connie Stewart

Harve Wallace

Journeying through East Germany was part of Connie Stewart's train trip to Berlin. To the people of this city, which was Connie's second home for two months, world affairs are very important and politics is a frequent topic of conversation. The summer in Germany did not bring the horizon within Connie's sights; instead it made it broader than before.

Living in a small town situated in the center of the Rhineland, Germany's greatest industrial area, Harve Wallace was able to see huge factories and beautiful scenery side by side. This gave him a distinct impression of city life as well as rolling hills. Two weeks of Harve's summer were spent traveling through France and Italy where he visited Paris, Venice, the Riviera and other famous cities. Harve commented on his return that the most important aspect of his summer abroad was the opportunity to adapt to a new family and become a part of it.

One of the many bridges of Dusseldorf provides the background for Harve Wallace and his German brother Berndt Snider. Cologne and Dusseldorf were two large industrial cities near the town where Harve lived during the summer.

Part of Connie Stewart's summer was spent away from Berlin in the beautiful Alps. Her older sister, mother, sister Uke and Connie lived in a chalet high in the mountain of southern Germany. Connie's sister Uke will be visiting her this summer.

# Visit with Baron, school create excitement

The families who have exchange students living with them are usually the more generous, understanding, and sincere people in the community. Kathy Ruhl's German parents stand as firm examples of this for they shared their home with four visitors from outside Germany. Along with Kathy there was another American boy, a girl from Finland, and a Polish woman boarder. Kathy also traveled through Austria, Switzerland, and Holland and stayed for a week in the castle of a baron.

That schools in Germany are not so different from those in America was a fact that Virginia Griscom learned after attending school with her sister Hanni. The main difference is in the schedule. Students usually attend from 8 a.m. until noon, six days a week. Virginia's German grandmother from East Berlin was visiting in West Germany when the border closed. From talking with her, Virginia was better able to understand the plight of older people in East Germany.

Working in the garden was one of the ways Virginia Griscom helped her German family. She is shown here with her brother, Andreas, and a friend. Many exchange students feel they should not only accept the friendship of the family, but the responsibility of sharing the family work.

Virginia Griscom

Kathy Ruhl

Sight-seeing can be extremely tiring as Kathy Ruhl and her German Sister Schnecke have discovered. After visiting old towns in Austria, Switzerland, and Germany they are shown on a boat tour of the Baden Zee. This lake touches the borders of the three countries Kathy visited.

# SHSers visit Berlin, Northern Germany

Nancy Turner

Bob Kennedy

On first arriving in Europe, Nancy Turner made an excursion through the Swiss and Italian Alps to Florence, Italy and then on to Rome. Here she saw the Coliseum, the Vatican City, and the Forum. The remainder of her summer was spent in northern Germany with her family. She discovered many differences especially in food, physical fitness, and values.

Berlin, the divided city, was Bob Kennedy's home for two months this summer. Being so close to the border, he was able to cross into East Berlin many times and also speak with refugees from the Soviet zone. From this experience and from talking to his German father, who lived in East Germany but was not a communist, Bob was better able to understand communism.

Symbol of Berlin the Brandenburg gate, was one of the check points through which Bob Kennedy passed on visits to East Berlin. He is standing in front of a sign which reads "Attention! You are leaving West Berlin." Near the gate he was able to pick up propaganda in every language written by the Communists. Bob fit in very well with the Germans. One day while he was riding behind a tourist bus, some Americans took his picture as the typical German boy.

Nancy Turner and her German sister Elke are shown here as they peer around some statues which were in a war memorial near Elke's school. Nancy found that the Germans readily acknowledge the error they made in following Hitler and they hope the rest of the world will eventually forgive them. The Germans enjoy competitive sports and many communities have their own swimming pools and tennis courts.

# Spain, Holland hold new, novel experiences

Bullfights, swimming pools, Spanish foods, and interesting museums were only a part of Gail Davison's stay this summer in Madrid, Spain. During July the MCC students in Madrid attended a private language laboratory where they were given special courses in conversational Spanish, and visited the local theaters and historical cities.

Near Rotterdam, an important harbor of Holland, in a town about the size of Birmingham, Diane Lemmey lived with her Dutch family. One of the most interesting parts of Diane's summer was a three week camping trip through Europe. The family camped with tents in many parks while visiting Belgium, Germany, Luxemburg, Italy and France.

Gail Davison

Diane Lemmey

A backyard gathering brings some of Diane Lemmey's friends together to taste the apples of the family and hear Diane talk. One of the most important yet sometimes exasperating jobs of the exchange students is to explain. Here Diane is showing some friends how to whittle with a blade of grass, an old American trick.

Explanations are very important in conversation. Such little things as the difference between sleepy and tired may be very confusing to a European.

With the bullfights not far from her home in Madrid, Spain, Gail Davison was able to see Spain's most popular sport many times. Gail, pictured here, lived on the top floor of a six story apartment house. Her home was also not far from Madrid's famous Prado Museum and swimming pools and parks. While at a language laboratory Gail visited Toledo, the oldest city in Spain. Segovia, where a part of an old Roman aqueduct still stands; and Alcazar, the summer castle of Ferdinand and Isabe.

# Two girls enjoy stay with Dutch families

Beth Boetsma

Kathie Helper

This picture of Beth Boetsma was taken in Valendam, a commercialized city especially for tourists. The townspeople dress in the traditional Dutch costume. Beth's picture was taken in a special store which supplied her costume.

'America no longer seems so far away; you have brought it closer to us. This thought, which Kathie Helper's Dutch friends expressed, summarized the purpose that all MCC'ers hoped that they had accomplished. Exchange students go abroad not only to learn about the countries they are visiting but also to teach about America. During the summer Kathie attended school with her Dutch sister for two weeks. She was surprised to see the differences and learn that the students took twelve subjects. One of Kathie's most enjoyable experiences was the two weeks she spent on the family's thirty-foot "motor boat."

Bike riding up to thirty miles a day was a busy part of Beth Boetsma's stay in Holland last summer. In this way she made many short trips to places of interest. Among these trips was a ride to a nearby town where she saw Queen Juliana. Beth also visited the miniature Dutch village at Maduroan and swam in the Atlantic Ocean. She lived with two families. One month she stayed in a small town and the second month she lived in a tiny farm village. From these varied home situations she was able to draw the impression that the Dutch have a calm, easy way of life.

One of the things that the Dutch people found very fascinating was the fact that Kathie Helper could drive a car. Most of the European teenagers can not drive cars because there are not many available and little need for them to learn.

After returning from the summer abroad the exchange students discover that an important part of their experience still lies ahead. This part includes giving speeches and telling about their summer. Here Kathie Helper explains about Holland to Sue Stinson, Jack Hoyt and Pam Ludwig.

# South America, Holland provide memories

Chal Brumbaugh was a member of the Michigan Chorale which is another aspect of the MCC Exchange Program. It was composed of sixty-seven high school students who visited six South American countries last summer. The Chorale presented seventy concerts before audiences numbering over 80,000 people. Because of the fact that Chal was traveling through many countries he was to stay with nine different families. He was, therefore, able to gain a better overall picture of the problems and plans of our neighbors to the south. Chal feels that the Chorale accomplished its primary purpose of interpreting American youth through music and personal living experience.

Going abroad has many exciting aspects for the exchange student. One of the most exciting is the feeling that for the first time he is on his own. The student can be whatever he wants because the people he meets have no previous impression of him. These are some of the ideas that Emily Edwards expressed after she spent the summer in Holland. While in Europe she visited Austria for two weeks and traveled in Germany. Emily especially liked the bike riding and the simple uncomplicated life of the Dutch people.

Living in an unaccustomed environment makes a person able to view his own life more objectively, appreciating its disadvantages as well as its advantages. Emily felt that her experiences with an entirely different family would have been an adventure in any country.

Emily Edwards

Chal Brumbaugh

Friends are not hard to find in Holland as Emily Edwards has discovered. Almost all Europeans are very interested in Americans and very friendly toward them. They continually ask questions about America. The teenagers, especially, want to know what American teenagers are like and what they do. Emily Edwards is pictured here with Trynie, a friend, and Greet and Jetje, her Dutch sisters. The girls had all attended a football or soccer game between two nearby towns.

Modern designs highlight this building which is a part of the University of Mexico. Chal Brumbaugh was very impressed with the school and became interested in the university while he was in Mexico City. He hopes to attend the school for part of his education. Chal toured Central and South America giving concerts with the Michigan Chorale, a part of the Michigan Council of Churches Program. In South America Chal visited Columbia, Brazil, Peru, Uruguay, and other countries.

# Bike trip, farm chores are new experiences

Wendy Westrate

Peg Lourie

A two week bike trip through Holland sounds exciting. Wendy Westrate and her Dutch sister, Jet Smith, not only peddled 240 miles but also carried 60 pounds of luggage on the backs of their bikes. Traveling a rapid pace of Wendy's time as her family enjoyed showing her the sights of Holland. Her Dutch mother worked the whole summer on a sketch book of Dutch phrases and pictures for Wendy to bring home with her. At a conference on cultural Holland she learned many interesting facts about her adopted country. Her sister, Jet, is spending the year as a student in Michigan.

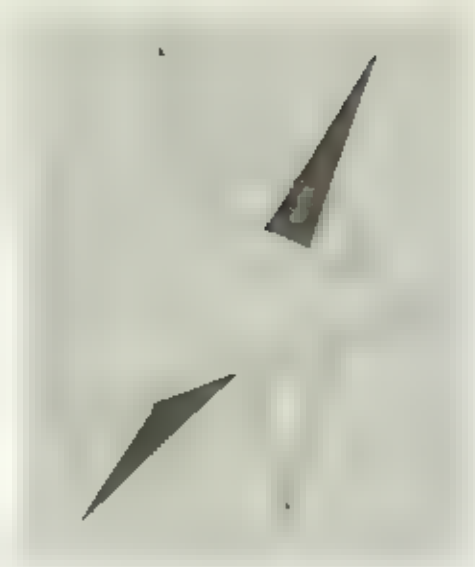

*Runaway* is number one on the hit parade, rock'n' roll rules the teenagers, hot-dog stands and souvenir shops line the beaches. If this is England, one might comment, what makes it so different from America? Yet a firm, established tradition, wide-spread seventeenth and eighteenth century architecture and a broad determined "cheerio" give the English people and country side a unique and subtle charm. These were Peg Lourie's impressions after she spent the summer in England where she had an opportunity to sample an English grammar school and try her luck at mountain climbing with her first family. Many activities including one day sightseeing trips to such places as Cambridge, Stratford-upon-Avon, Great Yarmouth, Nottingham, and London occupied her time with her second family.

Peg Lourie had two summers while living in England and she felt her contrasting farm life made a fascinating summer. Living in the rolling, golden farmland on a 240 acre farm, she helped with the haymaking, the milking and the feeding of the chickens.

On a trip to Holland, Wendy Westrate and her sister Jet Smith, not only peddled 240 miles but also carried 60 pounds of luggage on the backs of their bikes. Traveling a rapid pace of Wendy's time as her family enjoyed showing her the sights of Holland. Her Dutch mother worked the whole summer on a sketch book of Dutch phrases and pictures for Wendy to bring home with her. At a conference on cultural Holland she learned many interesting facts about her adopted country. Her sister, Jet, is spending the year as a student in Michigan.

## Create in clubs

Seaholm is not only a school for academic learning, but it is also a school which gives students a chance to create new ideas and study old ones in its fine extra-curricular program.

Over 1,200 students participate in after school activities, ranging from service clubs to professional and interest groups. In co-operation with fellow students, Seaholmites form clubs which allow them to study further their interests in science, photography, dramatics.

A majority of students takes part in at least one activity during the year helping to make school life more stimulating. Without these clubs and the learning experiences they provide, school would be tedious.

Hard work by many helping hands is necessary to take care of concessions at the various athletic events. Football games provide one of the best ways a club

or organization can raise extra money, and GAA members pitch in to sell hot drinks and refreshments at a home grid tussle.

# BUNA General Assembly is year's climax

Climaxing its year, BUNA (Birmingham United Nations Association) held its mock general assembly March 29 and 30. This meeting, the culmination of the labors of many throughout the year in committee activity and individual research, brought together the largest number of Seaholmites to join a single club.

In the fall, interested students were asked to apply for membership and after a more careful and thorough screening, a somewhat smaller membership than normal resulted. Officers elected to lead the group included Virginia Griscom, the first girl to serve as secretary general; Jim Emmett, president; Janet Brown, secretary; Tom Welch, treasurer; Chuck Holtz, parliamentarian; and Ben Root, historian.

Areas to be discussed during the year and brought up at the General Assembly were decided upon by the membership. The admission of Red China, self-determination, aid to underdeveloped nations, Berlin and disarmament headed the list of subjects to be debated. Other topics could be discussed with the approval of two-thirds of the BUNA delegates.

The transferring of the gavel from Barry Kriger, 1961 president of the General Assembly, to Jim Emmett officially opened this year's BUNA session. Over 100 teenagers participated in the day and one half meeting which gave students a chance to display their knowledge of the UN and world problems.

Each BUNA delegate must be prepared for the General Assembly; they must know the times and dates of various meetings. Janet Brown, Jim Emmett and Virginia Griscom are posting the date of the neutral block meeting.

Much after school work in Seaholm's library is necessary if the delegate is to be aware of current information about his country. Members of the western block, Ed Champlin, John McCullough, Craig Cooley, Kathy Ruhl and Wes Grube are checking over some current periodicals.

For several years an international pot luck dinner has been held after the General Assembly. Students bring dishes from the country they represented. Last year's dinner drew a line up to sample the unusual dishes.

# Club members travel often to view shows

Few theaters boast an elevator to the balcony but the Fisher Theater has one. Mrs. Ladd, Betsy Schmink, Lynn Abernathy and Barb Francis wait to ride up to their seats.

Conplayphony, a club formed for the purpose of giving high school students a chance to see and appreciate the finer shows, plays, concerts, is a going organization at Seaholm High School. Sponsored by Mrs. Ladd, members journeyed many times to Detroit during the year to view productions of their choice.

When the new Fisher Theater opened last fall, most Conplayphony members eagerly awaited a play appearing there that they wanted to see. Perhaps the theater itself was a greater attraction than the performance, but 24 members journeyed to see the musical *Do Re Mi*. The group has also visited the Shubert, Masonic Temple and other theaters for varied shows.

Conplayphony officers include Andie Stickel, president; Marilyn Merker, secretary and Sally Kelly, treasurer. Board members, who help arrange the trips, are Claudia Purdy and Lynn Abernathy. Different teachers are asked to chaperone the trips.

Viewing a figure of modern sculpture which is in the lobby of the Fisher Theater are Marcia Warren, Sally Kelly, Sandy Alpert, Andie Stickel and Marilyn Merker.

Pausing before entering the theater to read the billboard advertising the current show, Jayne Thorne, Elizabeth Lask and Elaine Hudson wonder how the show will turn out.

# Discover future stars

For students who would like to enter any field of acting, Proscenium is the club to join for it gives many budding dramatists a chance to gain experience. Not only do Proscenium members concentrate on acting they also learn about the behind the scenes work which is so vital to theatrical success.

Each year the club sponsors a play and provides the technical help for producing the all-school dramatic production. *The Curious Savage* was this year's choice and played to capacity audiences February 8, 9 and 10.

Proscenium meets every other Thursday for business. Entertainment is often furnished by the members themselves and sometimes Proscenium, as a group, journeys to Detroit to see touring plays and other attractions. At the end of the year, thespian awards are given to the best actor, actress, and behind-the-scenes workers.

Holding the teddy bear that concealed the secret of the missing ten million dollars, Jeanne Gilham (Mrs. Savage) directs the victim concert of Harvey Wallace (Mannibal) in Proscenium's production, *The Curious Savage*.

Curtain call for *The Curious Savage* was repeated several times at each of the plays performances as spectators applauded the efforts of Harvey Wallace, Averi Allen, Claudia Kewler, Lynn McCall, Bob Fredrickson, Nilla Wennerberg, Frank Green, Clem Larson, Jeanne Gilham, Jill Johnstone and Lanny How.

# Assembly club sponsors school's programs

A portion of the assembly programs are financed by the candy sales for the hungry students at lunch time. Sue Fortenbaugh points out her favorite candy bar to Janice Boughner.

Even though large profits are made from the candy, there is still the job of cleaning up the wrappers left in the halls by the students. Marcia Hutchinson and Max Wallace are two "sweepers" who have the clean-up duty.

Most students find it a refreshing change to leave the classroom routine behind and attend for an hour a program provided by the Assembly club. About once a week during the school year such assemblies are held for the benefit of the student body.

Types of assemblies vary widely. The accent is on educational features; however many programs are both informative and entertaining. Singing groups, lecturers, scientific demonstrations and student produced shows are some of the categories that the assemblies may be in.

Members of Assembly club are chosen by their fellow classmates. Ten students from each grade level plan the assemblies, serve as master of ceremonies, and guide the activities of the club. Students can be justly proud of the fact that most of the money to pay for the assemblies is earned by selling candy during the lunch hour. A small charge of \$1 per student is included in the Activity Ticket to help defray some of the expense of commercial programs.

This year marks the 25th anniversary of the Assembly club. Started in 1937, the club has had as its sponsor through all the years Miss Allen.

In one of this year's most outstanding assemblies Dr. Gerald, a mental telepathist, demonstrates to the amazement of the audience that he knew the serial number on Kathy Allison's dollar bill before she even read it off.

Assembly club activities are directed by its officers. Peg Logg, secretary; Sandy Erwin, recording secretary; Dave Hyde, president; Wendy Hutton, vice-president; Marilyn Merker, treasurer, discuss a future program.

Decorating the almost 25 foot Christmas tree for the Christmas Assembly is quite a job for the Assembly club members. Much time was required to put on the long strings of lights and ornaments. The tree is decorated with...

# Services include ushering, waiting on tables

BOB NORTON, GEORGE LEECH, and other students are seen at the banquet table. The waiter, Bob Norton, waits on the athletes when they arrive and then clean up after they leave.

These students are the members of the Garcon service club. This group, composed of Geoff Gilbert, Cheryl Brokaw, Marilyn Merker, Mac Le Fevre, Sue Hubblewhite, Bob Brown

The clatter of dishes and the savory aroma of food are common to students in Garcon because their main job is to wait on tables at banquets served at Seaholm. This service is valuable to other organizations in SHS. Groups may not be able to afford much luxury, yet, because of Garcon's help, they dine in style as the waiters fill their requests. Work is difficult and keeps Garcon members on their toes but each waiter is rewarded with a free dinner and a small fee. Contributing much time and work is the sponsor, Mr. Richards.

The other service club at Seaholm is Cicerone, one of the largest groups in school. At the beginning of each school year one of the most pleasant duties of the members is to welcome new students to the Birmingham school system. Cicerone ushers are available during the year as they serve at some of the school's big and small functions, such as Commencement, Baccalaureate, Field Day, PTA open house and the various plays.

Officers are Steve Collister, president; Virginia Grisford, vice president; Sue Hubblewhite, secretary; and Marilyn Merker, treasurer. The sponsor is Miss Peck.

Wendy Is... and Steve... are seen in their school in this club.

# Student scientists study, develop knowledge

Ascientia's chief purpose is the development of its members' knowledge in all sciences. The club has been building and developing three main projects—the spectroscope in which they can analyze various materials, the negative ion machine with which they experiment with positive and negative particles, and the amateur rocket.

Ascientia has had many guest speakers this year.

Officers of the group are Jon Miller, president; Fred Clegg, vice-president; Laurine Love, secretary; and Dave McAdam, treasurer. The club sponsor is Mr. Harris.

Bill Gobo, Ken Stevens, Ted McChew, Richard Hook, Jon Miller and Pete King are experimenting with a Van de Graaff generator, a machine which spins so fast that it produces sparks.

Much time in March and April is spent in dissecting a dogfish shark. Mr. Hackett points out where to make the first incision to Kerry Pilling, Jim Pope, Theresa Fisher, Dave Naylor, Peter Miller and Nancy Manegold.

A science that is concerned with the study of different forms of life is biology and to further their interest in this field, 32 Seaholmites join together in a club activity to investigate more deeply this subject. A committee chosen at the beginning of the year decides on programs which will be of interest to everyone in the club.

Typical meetings were those devoted to an explanation of how to take pictures through a microscope or a movie on the circulatory system or a kidney operation. In December members visited the Clinton-Misco Corporation, a biological supply house in Ann Arbor. During March and April they worked dissecting the dogfish shark.

Officers are Jim Pope, president; Nancy Manegold, vice president; and Terry Fisher, secretary-treasurer. Mr. Hackett is the adviser.

# Nurses, social workers seek to aid others

During National Nursing week Future Nurses, Lourline Johnston, Peggy Manegold and Liz Lock helped set up the showcase that displayed different nurse uniforms

Nursing, the rewarding career of being useful to others, is the profession chosen by the members of Future Nurses. Many of the meetings consist of speakers discussing the requirements, development of characteristics, and opportunities in nursing.

Proceeds of the apple machine in the cafeteria have

If a student becomes ill there is always a Future Nurse member ready to help at the clinic. Jane Bencke writes down the symptoms of a patient

made possible the adoption of a new orphan. Impressing were the various field trips taken to the Henry Ford Hospital and the University of Michigan. This year with funds collected from a concession and numerous bake sales, Future Nurses plan to establish a scholarship to be awarded by the club to a graduating member

Sandra Alpert, Claudia Purdy, Bonnie Schmier and Kathy Durken members of the Future Social Workers club, as one of their activities are helping Mr. Miller prepare for a picnic which the club is giving for the residents of the Oakland County Children's Home. After the picnic they will give the children toys and books

Those who consider the career of helping their fellow man are able to do so as members of the Future Social Workers club.

This year one of the club's activities was a visit to the new Lafayette Clinic for the mentally ill in Detroit. Members also visited the Adrian Training School for delinquent girls in Oakland County during April. Another big project was the spring picnic given for the underprivileged children of the Oakland County Children's Home. Members contributed toys and books.

Speeches on topics such as the visiting teacher program, probate court and problems in marriage counseling were presented at meetings. Mr. M. Miller is the sponsor.

Future Social Workers chose Sandi Alpert, president; Bonnie Schmier, vice president; Louise Jarosz, secretary; and Claudia Purdy, treasurer.

# Business, Secretaries clubs relate to jobs

Girls who are planning to pursue some phase of secretarial work as their future occupation many times belong to the Future Secretaries Club. The twenty some members are led by Betty Rush, president; Dianne Sturman vice-president; and Linda Efaw, secretary-treasurer. Mrs. Garen is the club's adviser.

The main project of the Future Secretaries is the operation of the school supply counter located in the front lobby. Each morning before school and during the noon hour, the counter is staffed by members of the club. Proceeds from the sale of supplies go to help support a little Indian boy, Dallis Steve.

The Future Secretaries have had two speakers at recent meetings. Miss Klinger, a student teacher at Seasholm, told members about courses she took at Michigan State University which prepares one to teach business and commercial courses. Also, a private secretary who works for the father of one of the members, told the Future Secretaries about a day in the life of a private secretary and the training one needs.

In the past one of the most successful activities of the Future Secretaries has been Careers Day. As many commercial students as possible assemble to hear a host of speakers relate the opportunities available to graduates

Dave Middlelitch, president of Seasholm's Business club was elected president of all the state business clubs. Mary Kramer and Sue Toth, his campaign managers, display sample posters made for Dave's campaign. Hundreds like them were made by the entire club.

Seasholm's Business club was organized to promote professional and social growth among students enrolled in retailing and the cooperative programs. This year the club helped start a similar business club at Groves besides taking care of their annual donation to CARE, participating in their annual bosses' dinner and working on the senior picnic.

Seasholm was proud of the president of the Business club, Dave Middlelitch, when he received the honor of being elected president of the State Business club. Dave ran for the office in Battle Creek with his campaign managers and the whole class helping him to get this position. It was mentioned that Dave might run for the presidency of the National Business club of America.

During March club members decorated windows in uptown stores for the League of Women Voters. Decorations carried out the theme of exports and imports and the work was divided, as is done on every club project, among committees. Other club projects included sending representatives to the Detroit Retailing Careers Conference and the beginning of business-student manager days in local stores where the student, especially selected, serves as manager of a retail establishment for a day.

The Future Secretaries make money to support their adopted Indian boy from the school supply counter. Diane Sturman and Betty Rush help stack a new supply of paper. In the morning and during fourth hour, the girls give much of their time in helping to sell.

# Seaholm Future Teachers mix work, play

Future teacher members Barb Beck, Linda Rutherford, Sue Kirvan, Betty Schwab, Karen McKinnie, Michele Roberts and Nancy Kinnison listen to Mrs. Kinnison as she discusses the coming activities of the year.

Combining fun with a purpose, members of Future Teachers staged a Halloween party for children from the Oakland County Children's Home. In charge of the program was Gretchen Van Sickle. Sue Koeneke and Judy Cloutier attempt to confuse a little girl who is trying to pin a Tail on a Donkey.

Although many students can hardly wait to get out of school, there are some who plan to stick with the school routine now and in the future as they plan on becoming teachers themselves. Such are the members of Future Teachers.

The present responsibility of the Future Teachers is to do well in school in order that they can guide students in future years. To encourage school leadership, Future Teachers offers a pin which recognizes a student's achievement. Each time a Future Teacher receives honor roll recognition or is installed as an officer of some group, the student is that much closer to receiving this coveted pin award.

Future Teachers also participate in Cadet Teaching sponsored by the school system. They forego their study halls to observe teaching in an elementary class. Mrs. Kay Reed, director of student teachers, coordinates these visits.

With the help of Mrs. Kinnison, sponsor of the Future Teachers, members planned a Halloween Party for the Oakland County Children's home. The night began with some trick-or-treating which was exciting for the children as they went from door to door in their colorful costumes. Members brought the children back to the Maple Room where they entertained them with a party.

Resting after bobbing for apples in the Maple Room, Future Teachers and their little guests enjoy punch and cookies. Sandy Dalka, Michele Roberts, Linda Scott, Claudia Kessler, Barb Beck, and Sandy Stanley take a few moments to eat and admire the colorful costumes of the youngsters.

# Learning how to write is purpose of club

Scribblers, Seaholm's literary club, has one main purpose—to develop the writing ability of its members. The twenty some budding writers attempt to do this by varied ways and benefit especially from the writing practice and the criticism received from the club's sponsors, Mrs. Blunt and Mr. Hammel, and the comments of the group in the "give and take" of group discussions.

Practically everything undertaken by the club hinges on some form of writing, but the range of programs is still wide. T. S. Elliot's provocative play *Murder in the Cathedral* was the subject for discussion at one meeting after members had journeyed to Detroit to see it. John O'Brian, book critic for the *Detroit News*, was guest speaker at another meeting, giving advice about the writing of book reviews and leaving a number of newly released copies of books for members to read.

This year ties between Scribblers and the *Maple Cairn*, the school's literary magazine, were much closer with committees from Scribblers working with the journalism department to produce the magazine. While any student in school was free to submit entries for the publication, the bulk of articles came from Scribblers members. Under the editorial direction of Joyce Root Scribblers served as the selection committee, while others worked on publicity, sales, and production.

Chosen by Scribblers, Tim Bachr, Peg Loume, Marcia Muller, Bonnie McCarthy, Joyce Root, Joe McPhee and Barb Oyen make up the screening committee for the *Maple Cairn*. From the scores

Artist writer Barb Fish stops Scribbler president Harvey Wallace on the stairs to show him an illustration for a poem.

of selections submitted this committee ~~and~~ the task of deciding which stories, articles and poems would go into the pages of the ~~Maple Cairn~~ *Maple Cairn*.

# Thrill of outdoors is part of SHS ski club

Flying down a sloping hill into the unending whiteness with the wind blowing one's hair is only part of the thrill of the outdoors which the school ski club, Schuss-masters, offers Seaholm students. Every Friday members ride together on a bus to ski at student rates at Mt. Holly.

Beginners are not neglected in the ski club as classes are available for first time skiers, intermediates and advanced. For the more accomplished skiers, Schuss-masters provides two trophies, on display in Miss Labbe's room, to recognize the winners of the club's annual downhill and slalom races.

Officers include Fred Adams, president; Marcia Hutchinson, secretary; and Mike King, treasurer. Board members are Sue Allman, Jim Blodgett and Virginia Griscom.

Kitty Taylor, Pete Sobelton and Bob Green are busy preparing their ski equipment which they stored in the back of their sponsor's room.

Ski club members wait anxiously with their luggage and ski equipment for the bus that will take them on a weekend of fun at Mt. Holly.

# Form new club; Poliscidis in second year

Newest club at Seaholm is the International club, begun with the purpose in mind of partially replacing the French and Spanish clubs of former years and partly to furnish information to all students connected with the AFS and MCC programs. Under the sponsorship of Mr. Cooch and other language teachers, the club has held three meetings this year with over one hundred students showing interest.

Officers of the club were selected on the basis of interests and each language area is represented by a vice-president. Tim Baehr is president; Patricia Gordon, secretary; Mac LeFevre, treasurer. Division vice-presidents are Cheryl Howson, Spanish; John McCullough, French; Pat Roach, Latin; Barb Clark, German; Mary Randall and Tom Brooks, AFS and Bob Kennedy, MCC.

Each section will arrange a program having to do with the country that it represents.

Each Tuesday, after school, the twenty members of Poliscidis talk over their political ideas under the guidance of Mrs. Prendergast, a new civics teacher, who replaced Mr. Vanderlaan the second semester. The purpose of Poliscidis is to help stimulate the students and promote sound judgment in political thinking.

Before each meeting a subject for discussion is decided upon. Then students prepare material for their debates by reading current material. During the meetings the members normally split up into sides to get the different view points.

Officers of the club are Chuck Nida, president; Pat Roach, vice president; Diane Inman, secretary; Dick Beaubien, treasurer.

After being elected to lead the new International club, Mary Randall, John McCullough, Tim Baehr, Bob Kennedy, Pat Roach, Patsy Gordon, Tom Brooks, Mac LeFevre and Cheryl Howson discuss the programs to be presented in the last part of this year.

So that Poliscidis members are able to discuss political problems intelligently, Diane Inman, Sue Kirvan, Sandra Stanley, Linda Scott, Gail Kurzmann, Pat Roach, Chuck Nida and Dick Beaubien spend much time reading over material in the library.

# Tutoring, dance sponsored by NHS group

Seaholm's chapter of the National Honor Society was chartered in 1931. Sponsored by the secondary school principals of the National Education association, NHS is a national organization which encourages scholarship and character. Locally the honor society has a membership of a maximum of 15% of the senior class and 10% of the juniors. To qualify seniors must have a 3.0 scholastic average and the juniors must have a 3.2. Each student who thinks that he is qualified as to scholarship submits his name for the teachers and the members to consider. The members are chosen by vote, according to outstanding leadership, service, and citizenship. The surprise comes when the new members hear their names called at the induction ceremony in the spring. NHS sponsors a reception tea for the new members and their parents after the assembly.

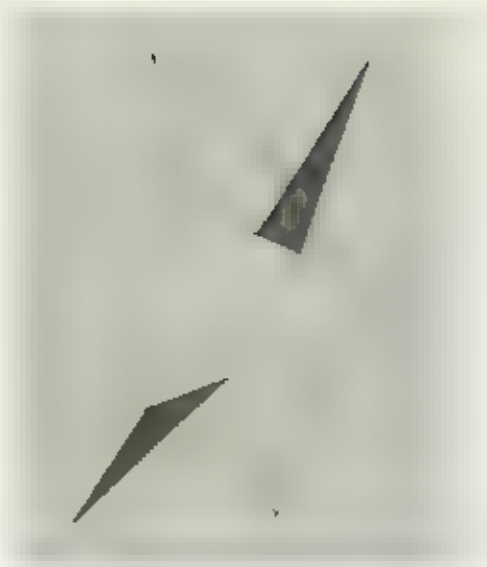

Conducting a tutoring service is one of the main services of the honor society. NHS also sponsors a Valentine dance each year.

To be a member of the National Honor Society is truly a great honor for the students chosen because they are recognized for their outstanding qualities of scholarship, citizenship, leadership, and service.

Virginia Grison hands a paper butterfly to NHS president, Bob Kennedy as members gather after school to decorate for the annual dance sponsored by the society. Jill Johnstone, Pam Gilbert, John Emmett and Janet Brown help out.

Mr. Hubbard reads off the names of new National Honor Society members at the spring induction service as Principal Wagner congratulates each new member and presents them with a membership certificate. Candidates are lined up alphabetically in front of their parents to receive their membership.

# Sports are life

To a Seaholm athlete, sports are his life. His diet, sleeping, free time and sometimes grades are all connected with his sport.

To a coach, sports are his job. Before a game or meet, the coach spends his time organizing practice sessions, deciding game strategy and building the team's morale. During a game a coach must be poised for quick decisions, observations and general supervision. After the game the coach is busy again preparing necessary corrections for the next week's games.

To the student body, sports are a medium of entertainment. Filling the fall night's air with football yells, journeying to Ann Arbor to watch the state swimming meet and crowding into the school gym to watch the basketball team are excellent outlets for our abundance of school spirit.

The stage is Seaholm High School's football stadium. The chilly night's air, bright lights and a gymnasium filled with a black November sky compose the

scenery. The stadium is filled superbly by a maroon-clad band of football players blurred with movement as they attempt to conquer another foe.

# Baseball team shines in victorious season

Two of the tightest pitchers in the EML, Bob Townend (left) and Tim Tout (right) co-captain positions in Coach Tassio's lineup. Tim Tout (left) pitched the final game of the season, while Bob Townend kept the infield fired up from shortstop.

A 6-1 victory over Bloomfield Hills set off a successful Seaholm baseball season that found Coach Tassio's Maples winning six and losing three. The Maples entered the EML tournament with strong hopes of winning but continuous poor weather caused the post season playoffs to be cancelled.

The Bloomfield Hills win was an easy one but the following week Seaholm met its master in Ferndale who delivered a 9-0 defeat. It was at this point of the season that the Maples proved that they were a team to be respected. Hazel Park came to the Seaholm field with hopes of picking up where Ferndale left off but the Maples won 8-1 behind Gene Schmidt's no-hitter.

The Maple momentum carried on to Kimball where the two teams battled for nearly four hours before Seaholm emerged with a 4-3 victory. A journey to East Detroit gave the Maples their third straight league victory with a 4-2 score.

Although the final two EML games proved disastrous, Seaholm whipped arch rival Groves twice to preserve their outstanding 6-3 record. Both wins over the cross-town Falcons were accomplished with the starting players watching from the bench.

**FRONT ROW** Bob Becker, Bob Townend, Mike Davis, Bob Cruckshank, Dave Kalocsay, Bob Fox

**ROW 2**—Jim Foster, Stu Forrest, Tom Bardsley, Larry DuCharme, Homer Davidson, Ron Ricketts, Lou Kemp

**ROW 3**—Coach Tassio, Tim Tout, Ken McGruther, Charlie Harper, Tom Wainwright

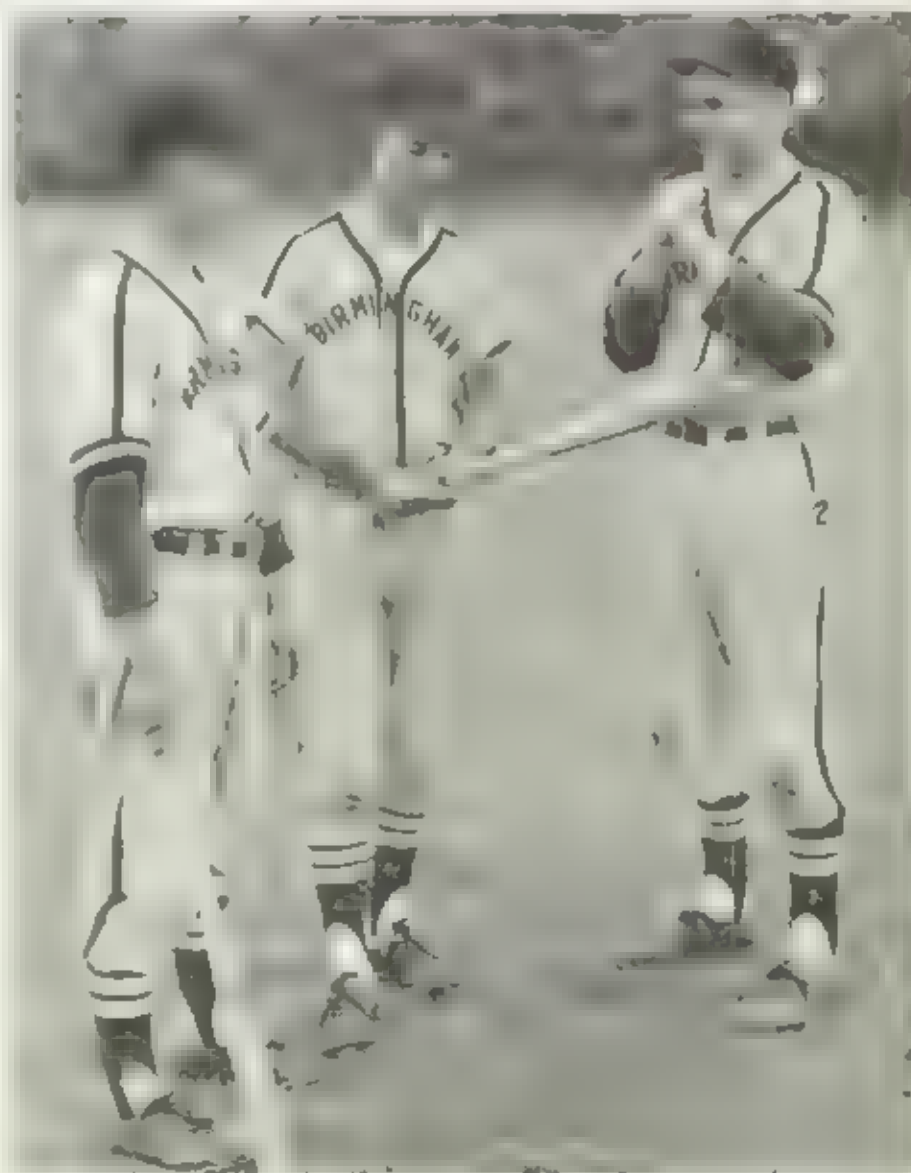

# Pitching staff, outfield spark Maple victories

Behind every successful baseball team there usually lies an outstanding pitching staff and the Maples were no exception. The three who bore the mound corps' burden were Tom Walters, Gene Schmidt, and Bob Becker. Becker and Schmidt were responsible for Seaholm's early season wins while Walters surged to win two key EML victories at mid season. The season's individual highlight came when Schmidt fired a no-hitter against Hazel Park right after the Maples had dropped a 9-0 decision to Ferndale.

Seniors Carl Kalocay, Ken McGruther, and Charlie Harper made up the finest outfield the Maples have had in years. Kalocay led the team in every batting category imaginable while McGruther's speed and Harper's throwing arm strengthened the defense.

# with winning seasons

With an abundance of talented lettermen, the Seaholm tennis team had little trouble living up to its reputation as a top EML power. Under the guidance of Coach Parry, the Maples stormed through the regular EML season undefeated and placed second in the Eastern Michigan League meet.

After breezing past Port Huron and Hazel Park with perfect 5-0 scores, the Maples met their lone setback of the season. On a dismal day when it seemed the weather had joined forces with the opposition, the Maples were handed a 5-2 defeat by Austin.

However the loss at Austin was soon forgotten. The Maples now looked toward the remainder of the season. Experts foresaw a rocky road ahead and many thought that if the Maples could break even for the rest of the schedule, they would be a surprise. Concentrating on one meet at a time, Seaholm started a methodical victory march that saw Port Huron, Mt. Clemens, East Detroit, Ferndale and Groves bow to defeat.

Coach Van Fleet, better known for his championship swimming teams, led his golf team to an outstanding 7-3 season record during the regular season and a second place finish in the EML league meet.

Golf has been a competitive sport at Seaholm since 1948 when Mr. John Simonds organized a team at the old Baldwin School. The next year marked the first one in state competition for the Maples and they placed third in a rugged regional meet. This team was the beginning of a long string of powerhouses at Seaholm. This past season was Corey Van Fleet's debut as a golf coach and the record clearly shows that it was an extremely successful one.

Seniors Bert Ward, Steve Anderson and Bob Emmett were standouts for Coach Parry's tennis team all season long. Ward and Emmett joined together to become the EML doubles champions. Anderson also took first place in the regionals.

Junior captain Tom Stevens was the symbol of Seaholm's "New Power" in 1959. Coach Corey Van Fleet was in his first year with an almost entirely inexperienced team to work with. However the surprising Maples finished the season with a striking 7-3 record.

With the aid of his statistic sheets Coach Ambrose and his two co-captains, Scotty Purvis and Tom Sweeney, review the successful Seaholm track record. Next to Mr. Ambrose is the new platform presented to him by his team to show their appreciation for the many hours he put into coaching.

Snapping the wire together are dash stars Scotty Purvis, Pete Henderson, Bruce Bates and Jim Daniels. Purvis and Bates were part of the sprint medley relay team that set a new school record in the sixth annual Class A Huron Relays held at Eastern Michigan University.

Seaholm's 1961 track season was another smashing success for Coach Ambrose and his thin clads. The season opened with a fifth place finish in the sixth annual Class A Huron Relays held March 25. In this meet, the sprint medley relay team of Bill Henderson, Scotty Purvis, Bruce Bates and Tom Sweeney set a new school record with a second place time of 2:34.9.

The next item on the schedule for the Maples was the Mansfield Relays with the best teams from Ohio and Pennsylvania. This was a tremendous improvement over the nineteenth place finish of a year ago.

Coach Ambrose's Maples won their next two track meets. The first was a triangular meet with Seaholm, Walled Lake and Bloomfield Hills. This was won easily by the Maples as they amassed 72 points to Walled Lake's second place finishing 41 points. The second victory came three days later against Detroit Redford. The Maples beat this strong opponent 67 to 57. The highlight of the meet was Tom Sweeney's record setting time of :50.8 in the 440 yard dash.

April 29 found the Maples participating in the Central Michigan relays held at Mt. Pleasant. Powerful Lansing Sexton took first place with Seaholm a close second. The Maple point total for this meet was 46 3/4.

Star distance runner Murray Stewart applies a special salve on his knee to loosen the muscles and reduce the strain usually put on it by a long race.

# Seaholm shines in State, Regional meets

Possibly the most gruelling job on a track team is that of a distance runner. Coach Ambrose's fall cross-country team usually turns out a great crop of milers like Mike Geer, Murray Stewart, Ted Egner and Bill Heydon.

Standing out in league and state-wide competition were the Maples' high flying hurdlers, Pete Henderson, Nigel Lock, Dave Chambers and Carter Dinkeloo. Here they clear the low hurdles.

Thurston High School was the scene for the Regional track and field meet. Seaholm's track men placed third in a rugged field of ten teams. Waterford won first place honors with 51 points, Pontiac Central took second with 44 while the Maples' 43 points gave them third.

Also in the Regionals Seaholm bettered the school record for mile relay with a time of 3:36.8. The history making team included Bill Henderson, Ken Bateman, Dave Chambers and Dave Sanborn. Maple high jumper Greg Frontier won fourth place honors in both the high jump and the broad jump.

Ferndale's Eagles were snowed under by the powerful Maples May 3 by a 64-45 margin. Seaholm captured all the field events except the broad jump. The bitter wind and cold failed to hamper the Maples in this walkaway.

With two of the finest track men in Seaholm's school history unable to compete the Maples finished the state meet with a sixteenth place. Steve Jacobson was out due to a football injury and co-captain Tom Sweeney still suffered from the pulled muscle he received in the Regionals. Two Maple standouts were pole vaulter Roger Mason who tied for first place and Jock McPhee who finished third in the mile run.

With their state qualifying seniors left behind, the Maples still murdered a weak Port Huron team 67-42. The win marked 44 consecutive F.M.L. dual meet victories. Seaholm extended its streak to 45 with an even more overwhelming victory over Mt. Clemens, 83-25.

# Maples win seventh straight EML crown

After being postponed earlier in the season because of rain, the fifth annual Dick Waters relays was held May 27. Although the Maples won only two events it proved to be enough to give them 44 points and the championship. Monroe finished second with a point total of 38. The team of Bill Heydon, Bruce Bates, Dave Sanborn and Jock McPhee raced to a new distance medley record with the winning time of 8:00. The old record was 8:12.1 set in 1960 by Ann Arbor. Ted Egner won the other Seaholm first in the mile with a time of 4:38.

For the seventh straight year Birmingham Seaholm won the Eastern Michigan League meet. This victory was the twelfth EML league meet triumph in the past seventeen years. The Maples finished the meet with 78  $\frac{3}{10}$  points to their credit. Second place went to Fern dale who picked up 48  $\frac{3}{5}$  points.

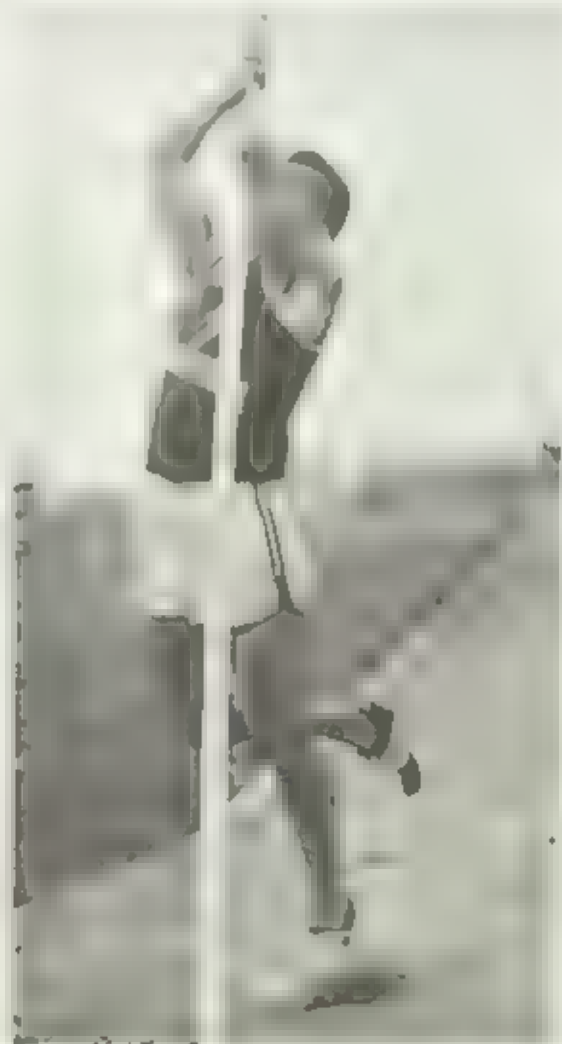

The all Oakland County track and field meet was to mark the end of the Maple track season. It was the second year for this meet. Just as in the Regionals the competition was rugged and Seaholm placed third. Again it was Waterford and Pontiac Central and Seaholm. On the 580 yard relay a new school record was set when the Maples recorded a time of 1:31.5. A good way to end a great season.

Seaholm's track team, as any other, depends on the collective effort of individuals. *LEFT*—Little Jock McPhee was an outstanding Maple miler all season long. *MIDDLE*—The 1961 track season discovered the best Birmingham pole vaulter in many years when

Exchanging the baton in a shuttle relay race is one of the best maneuvers to master in track. Here co-captain Scotty Putvis delivers the baton to dash man Bruce Bates.

junior Roger Mason tied for first in the State meet. *RIGHT*—A pair of envious Mt. Clemens shotputters look on as Seaholm's own Hercules, Bob Terchman, easily wins his event.

# Maples make history with dramatic wins

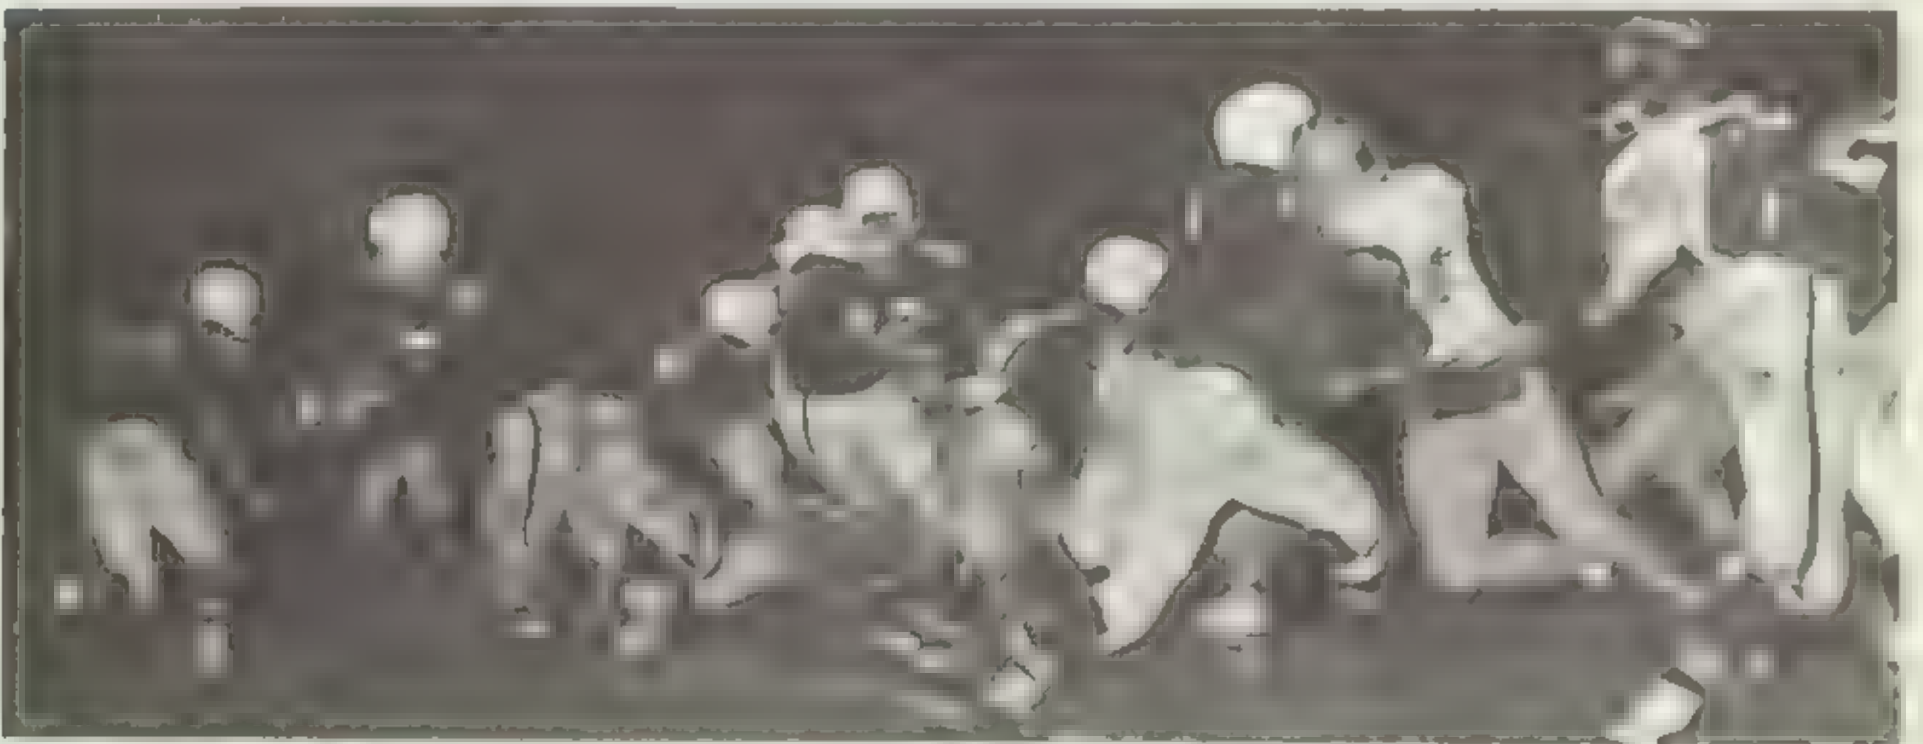

Carrying the ball is a job usually left to the halfbacks and fullback on a football team. When a quarterback can run with power and not hesitate to do so he has a great advantage. Fred Muenchinger displays his ability to carry the ball against Groves. Muenchinger many times chose to run when he had the option much to the advantage of the Maple attack.

The 1960 Seaholm football season went down in the record books as an historic one for two reasons. The first came on the opening day of the season when the Maples met for the first time their intra-city rival, Birmingham Groves. This meeting was a dramatic one as Seaholm staged a come from behind victory before the largest crowd to attend a Birmingham game in years. The visiting Falcons opened up a 13-0 first period edge that dimmed the hopes of the Maple rooters. Seaholm's safety in the second period seemed unimportant until the Maples stormed back with two touchdowns to win 15-13.

In the final stages of the season, history was made again. With a full EML schedule behind them, the Maples were ready to face a rugged R( ) Dondero team. Seaholm had failed to win in its last ten tries against the Oaks, but a strong defense and an effectively smooth offense gave the Maples a 28-6 victory.

Senior track star Jim Daniels glances off another would be tackler in Seaholm's losing effort against Ferndale. Daniels led the team in total rushing and scoring with virtually no opposition. He also received the highest honor available to a Seaholm football player when he was presented the Lt. John D. Anderson Memorial Award for his outstanding performance as a gridder.

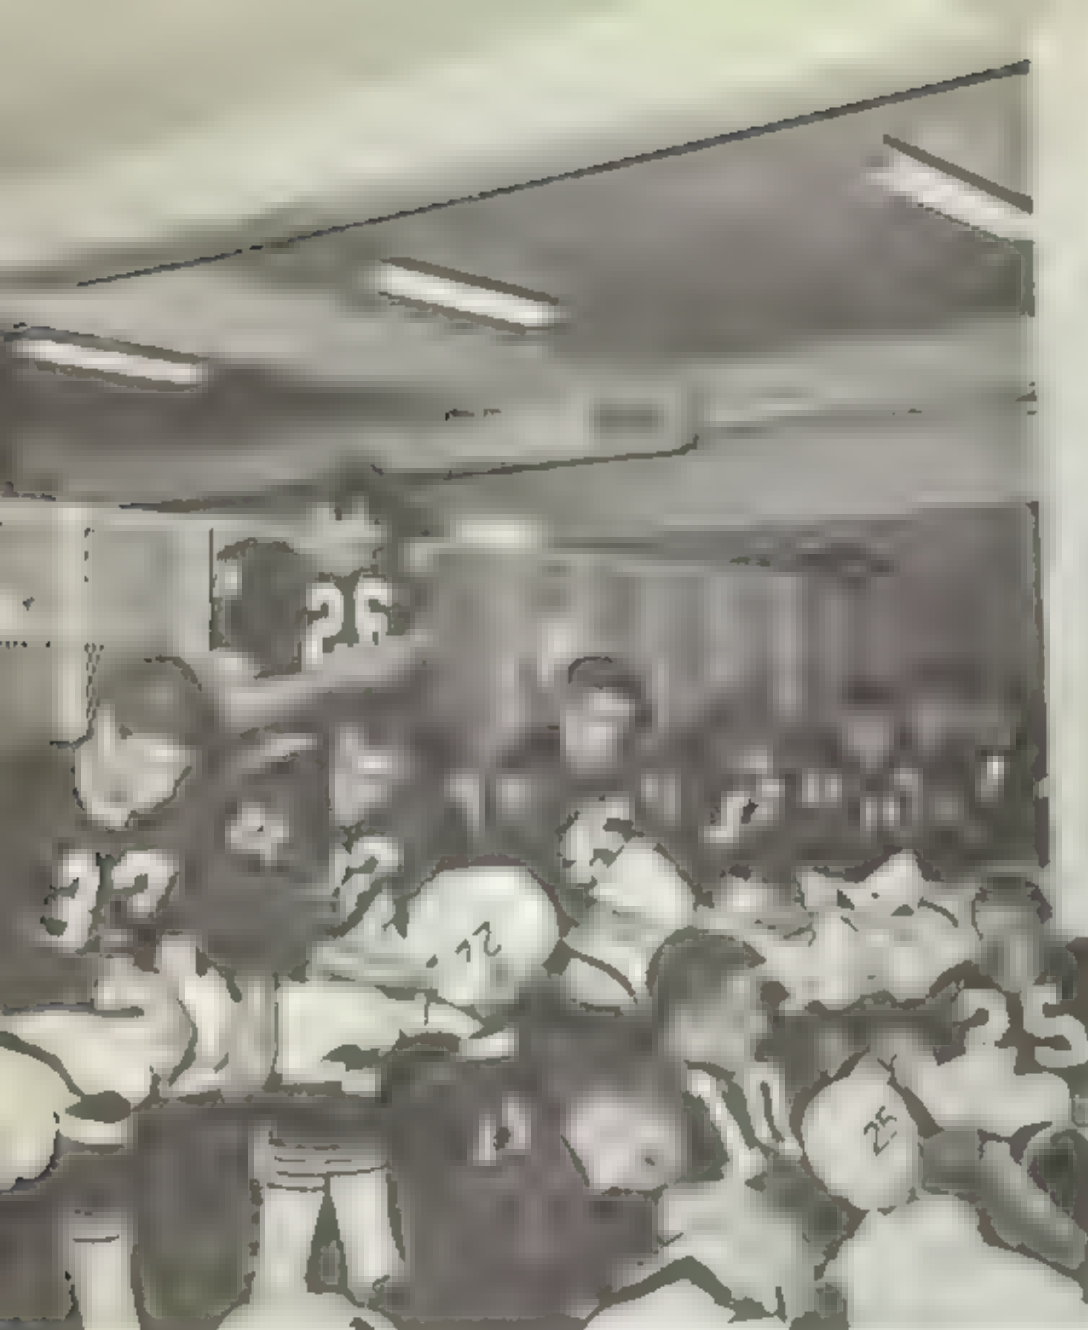

ONE OF THE FIRST KICKS OF THE MATCH. THE KICKER IS ON THE LEFT, AND THE DEFENSE IS MOVING OUT TO MEET HIM. THE KICKER IS THE ONE WHO HAS THE BALL IN HIS HAND. THE DEFENSE IS MOVING OUT TO MEET HIM. THE KICKER IS THE ONE WHO HAS THE BALL IN HIS HAND.

MIDDLE. ONE OF THE FIRST KICKS OF THE MATCH. THE KICKER IS ON THE LEFT, AND THE DEFENSE IS MOVING OUT TO MEET HIM. THE KICKER IS THE ONE WHO HAS THE BALL IN HIS HAND. THE DEFENSE IS MOVING OUT TO MEET HIM. THE KICKER IS THE ONE WHO HAS THE BALL IN HIS HAND.

Pre game tension is evident on the faces of Seaholm's football team before the rugged battle with Kimball's league champions. Taping sore joints, studying game strategy and just resting fill the anxious moments in the locker room.

Seaholm quarterback Tom Macle (left) exchanges a few words with Port Huron lineman before the game.

# Tougher EML league

Seaholm's football season opened on a bright note with Seaholm dumping Groves in the first game 15-13. This victory followed Coach Lemle's optimistic declaration that this year's team looked more impressive in early practice than last year's squad.

Maybe the Maples were a tougher team than the previous year's, but with the EML as powerful as it was no one could prove it. Their first EML opponents were the Kimball Knights, eventual league champions. Seaholm's game try fell 14 points short. Hazel Park's notoriously rough team stormed into Birmingham to meet the upset-hungry Maples and a wild battle followed with the Vikings winning 27-7.

A nightmare of fumbles, blocked kicks and interceptions filled the night's air at Port Huron as the Maples were buried 40-7. The following week found the Maples returning home to take on Ferndale and its famous little halfback Dorie Reid. They said if you could stop Reid, you could beat Ferndale. Seaholm failed to stop Reid and took a 45-9 beating.

Fed up with defeat, the Maples pulled out of their nose dive with a heartening 26-12 victory at Mt. Clemens. It marked the first EML win of the season. A 37-6 trouncing of East Detroit gave the local crowd something to cheer about in the last home game of the year.

Seaholm went on to win its first victory in a decade from Royal Oak Dondero by a convincing 28-6 score.

The football season for the Maples was not a failure. Jack Thomas was the first Seaholm player to grab a sideline pass as Bob Drothler looks on.

makes it rough on valiant Seaholm gridgers

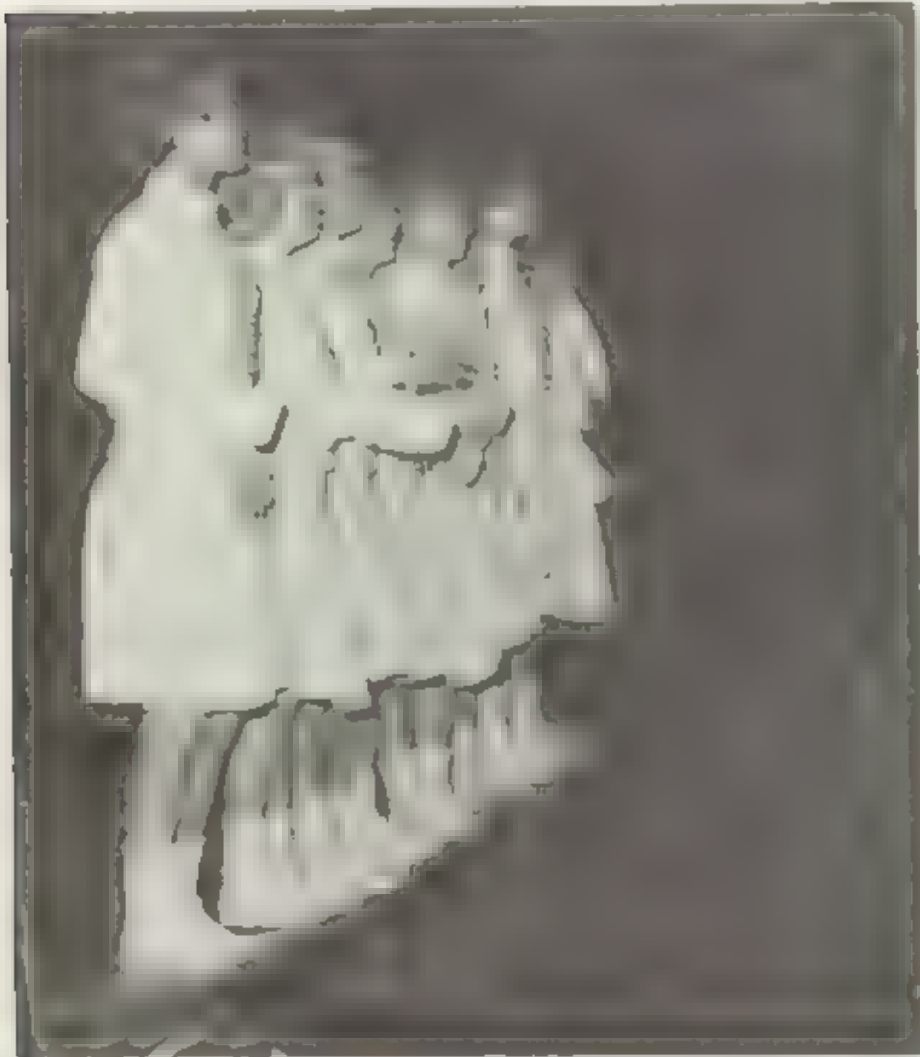

Robertson and Enders Ten Eyck and Jack Hays of the Alameda High football team are seen in action during a game. The Alameda team is wearing light-colored uniforms, while the opposing team is in dark uniforms. The players are in a pile-up on the field.

Seaholm's Dick Ellis, running back, is seen in action during a game. He is wearing a light-colored uniform with the number 10. He is being tackled by a player in a dark uniform. The background shows other players and spectators.

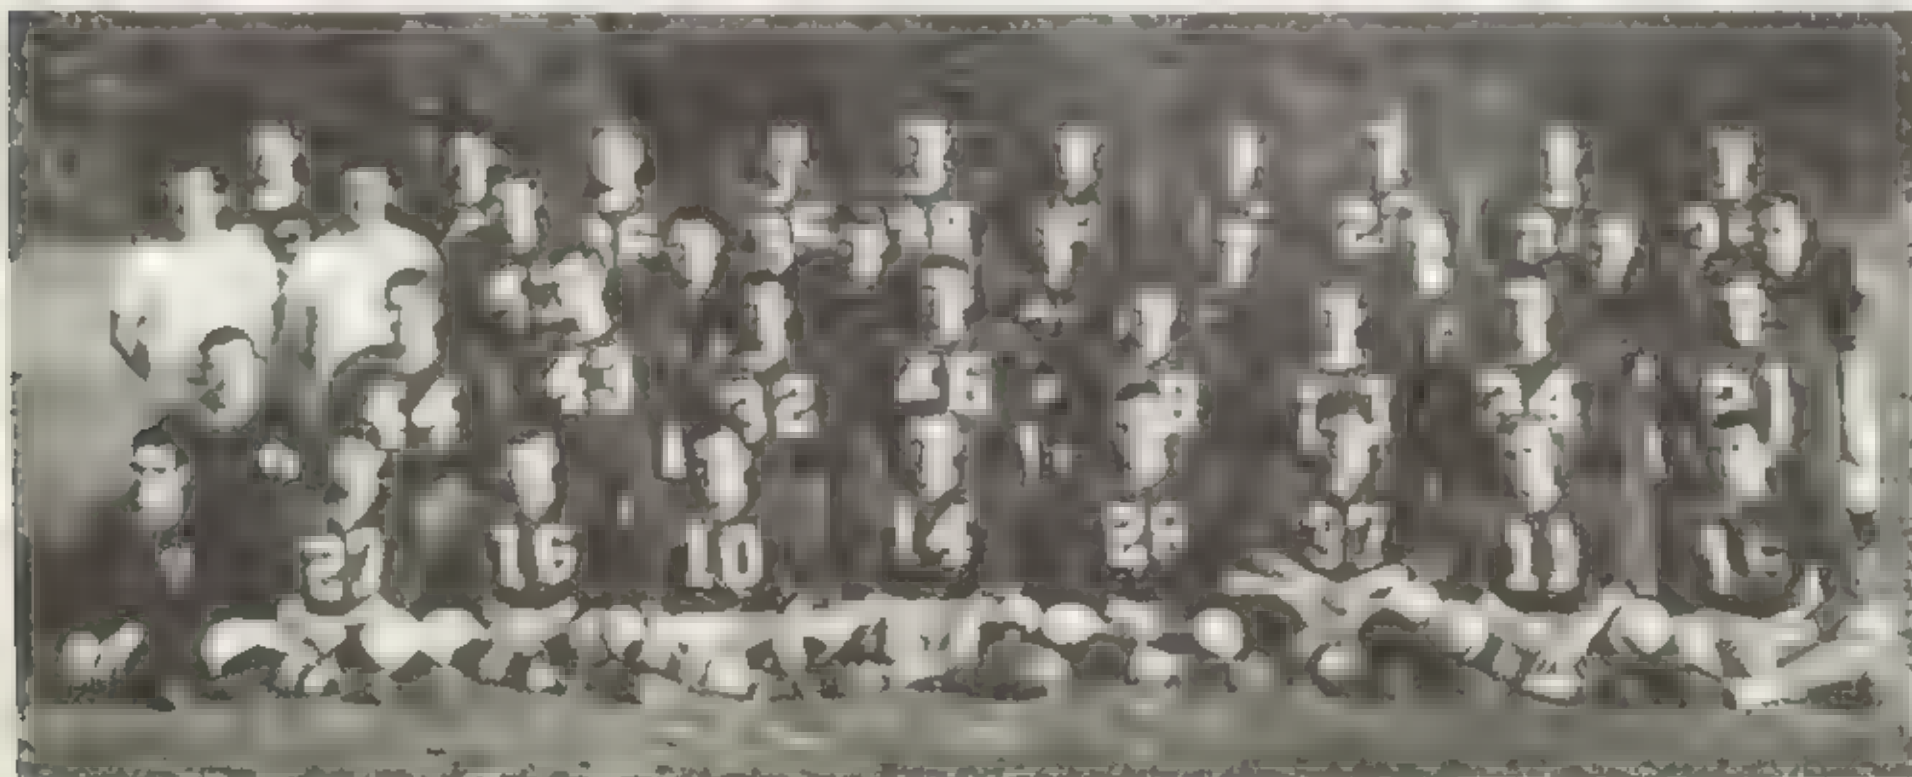

Maples end with four wins and five losses

As a result, places are left open to MFL speakers who have not previously been the beneficiaries of a second language classroom. Furthermore, spots taken by MFL speakers leave room for new speakers at the vacant bench.

# Seaholm harriers win EML championship

After a rather unimpressive showing early in the season, it looked like the Maple cross country team would face its first mediocre season in a decade.

Seaholm toppled Port Huron with ease as was expected. Victories over Hazel Park and Ferndale were close, yet they were victories. Times were improving, but Mt. Clemens, at the time the strongest team in the league, dealt a seven point defeat to the Maples. The eighth place finish in the All-Oakland County Meet preceded a routine conquering of East Detroit. A fired up squad journeyed to Eaton Rapids to win the Greyhound Invitational Tournament trophy hands down.

The season climax, however, was reached when Seaholm won the EML championship.

Murray Stewart receives his second place medal after leading the Maples to a blistering second place finish in the regional meet, only two points behind the winners, Detroit Northwestern.

The sound of the gun sets the Maples off and running in the regional meet held at Rouge Park. The maroon-shirted Maples are Jack Bacheiler, Doug Roberts (hidden), Dave Kennedy, Rick Reid, Stan Cutter and Murray Stewart.

# Maples rank seventh among state powers

After the completion of the regular season, the Maple harriers were setting their sights on the all-important regional cross country meet to be held at Rouge Park in Detroit. The regionals consist of over fifteen teams, each one bidding to finish in the top two places which allows a team to progress to the state meet held in Ypsilanti.

Rouge Park was alive with excitement as spectators gathered in small groups all along the race course. Seaholm rooters turned out the biggest crowd of all. As the gun sounded the Maples were off and running to a second place finish, just two points from first.

The following week found all the winners and runner-ups across the state gathered together for the greatest meet of them all. In what looked like the most rugged state meet in Michigan's history, Seaholm came home with respectable seventh place fame.

As the finish draws closer, Seaholm's top runner, Jack Bachelor lengthens his strides while passing tiring opponents. Bachelor finished sixteenth in the state meet.

Seaholm stars Dave Kennedy and Bob MacDougall weave their way through the stream of runners in the opening stretch of the state cross country race.

# Coach Parry initiates rebuilding program

At the start of the basketball season Coach Parry had to make a decision. With only one senior starter returning, there would be quite a few positions to fill. A talented group of seniors tried out for the team as did a talented group of juniors and sophomores. Mr. Parry decided to start a rebuilding program by directing his attention to the underclassmen.

Two sophomores and two juniors gained starting assignments and impressed quite a few outside observers with their performance. The Maple future looks bright.

Sophomore Bruce Nyberg quickly his way through the learning curve. Groves defense allowed him two more Maple points. Groves shot the string over his head with Jack Bachelier. He should return to a full time assignment next season.

Seaholm's co-captain Gene Schmidt calmly prepares to shoot through a Groves wall of defense. Schmidt tried in vain to lead his team to victory over the Falcons.

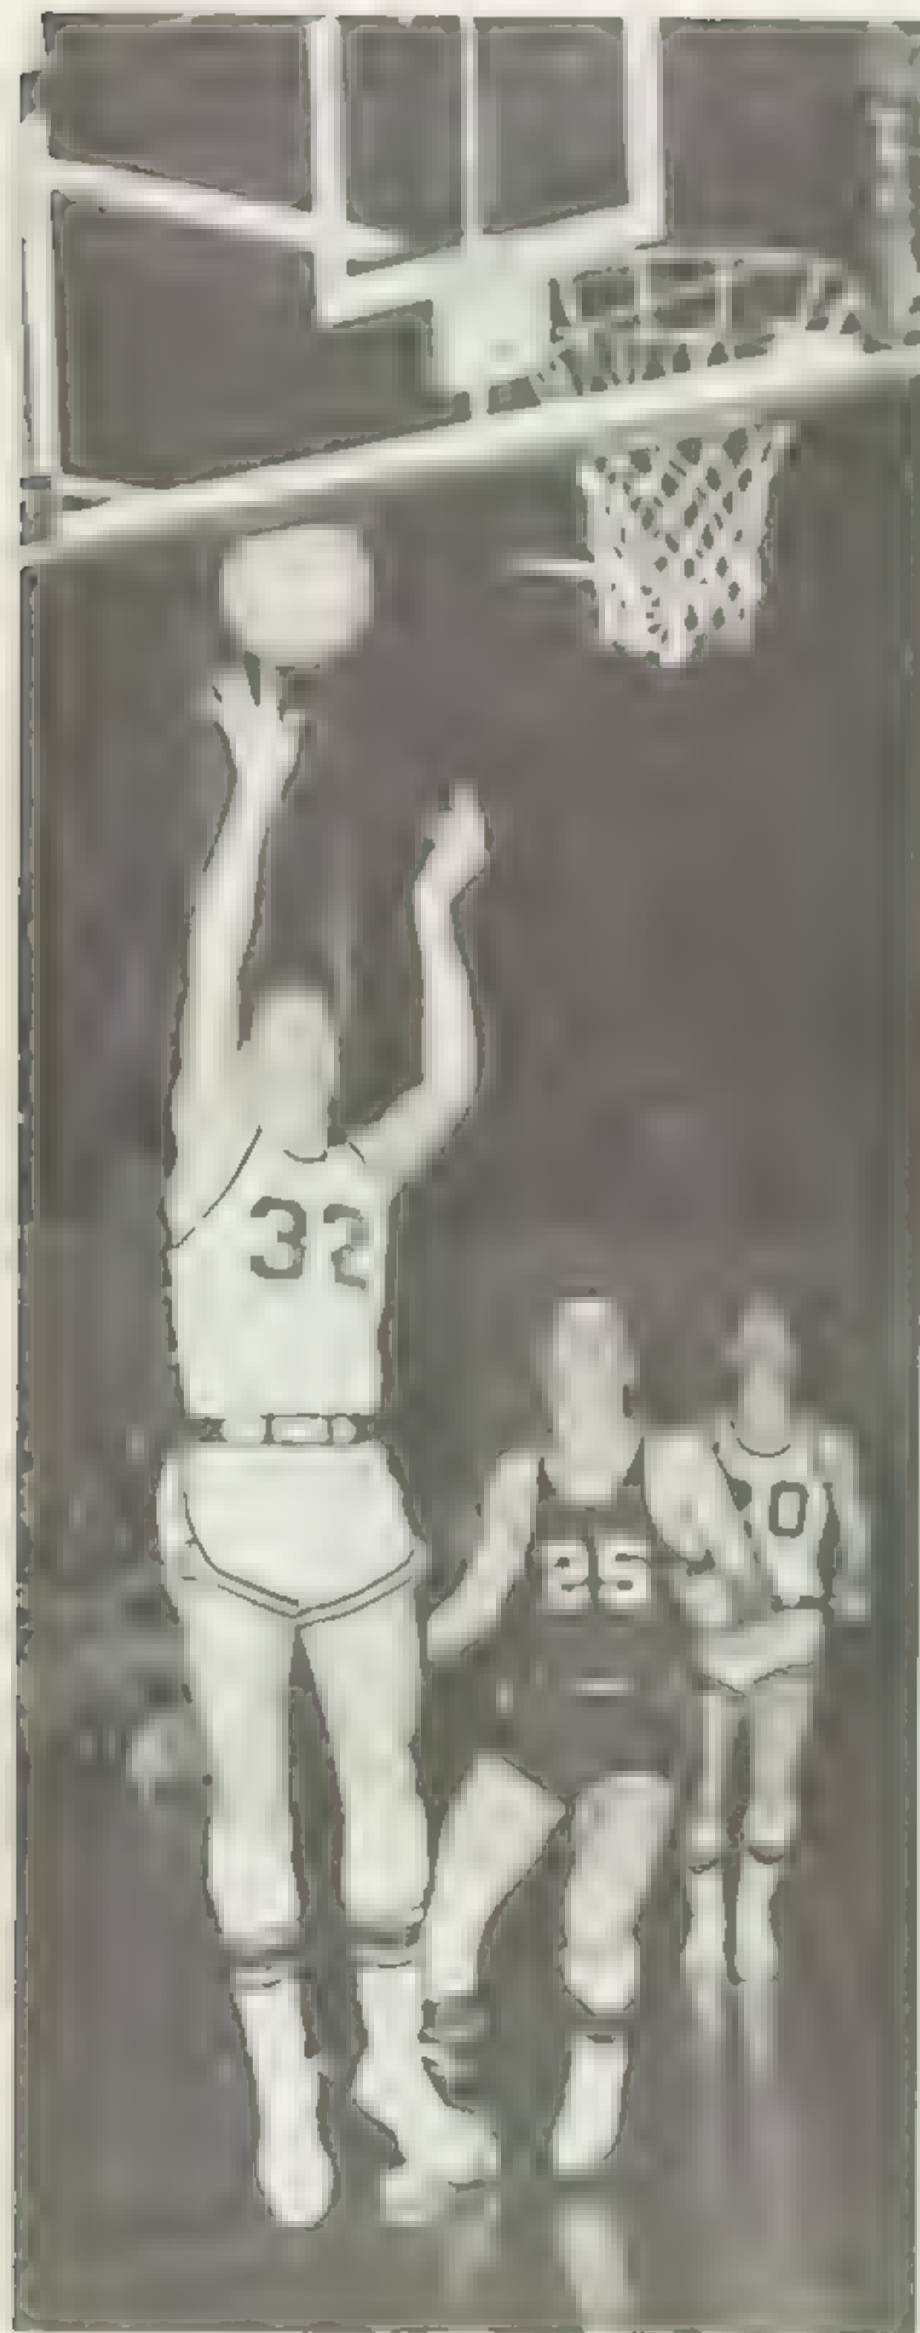

Sophomore Bruce Nyberg and senior Jack Bachelier were the tallest men in the Maple lineup this season. Nyberg took the team leadership in rebounding and was one of the few sophomores in the EMI, who played regularly. Co-captain Bachelier was the most accurate shooter on the team from the floor and was runner-up in foul shooting. "The Stick" is also a track and cross country star.

# Last minute victories mark season's start

Although Seaholm's cage season ended with a 4-12 record, those who followed the Maples closely realized that this was a year of rebuilding.

Probably the most humiliating defeat during the entire sports year at Seaholm was the opening game loss to Birmingham Groves in the Maple gym. This loss turned out to be the only time a Seaholm team bowed to a Groves team this year. However this setback was soon forgotten as the Maples bounced back to upset arch rival Dondero 58-56 in the last two seconds of the game.

Coach Parry's youthful team was gaining experience rapidly. The Dondero victory was followed by a 51-49 win over Hazel Park that went into two overtimes before the Maples put forth a burst of reserve drive to capture the win.

As expected with such an inexperienced squad, the tide began to turn to defeat.

Placing first in scoring and second in rebounding, junior John Shutt was probably the best individual Maple cage performer. His 24 points against East Detroit came with a 5 and 10 foot shot that he nailed 100 percent. At the winter sports meet Shutt was awarded the trophy for the best free throw shooter on the team.

Tex Shutt has guided the Maple strategy from his guard position since he was a sophomore. His ball handling skill and poise were looked upon with frustration all season long by his opposing guards. Here a Groves defender finds himself stumbling as Shutt drives around him for a shot.

# Late season play erases pushover image

Six straight defeats followed Seaholm's early burst of glory. Kimball, East Detroit, Port Huron and Ferndale dealt decisive losses but it took Mt. Clemens two overtimes and Southfield a last minute display of brilliant defense to halt the Maples.

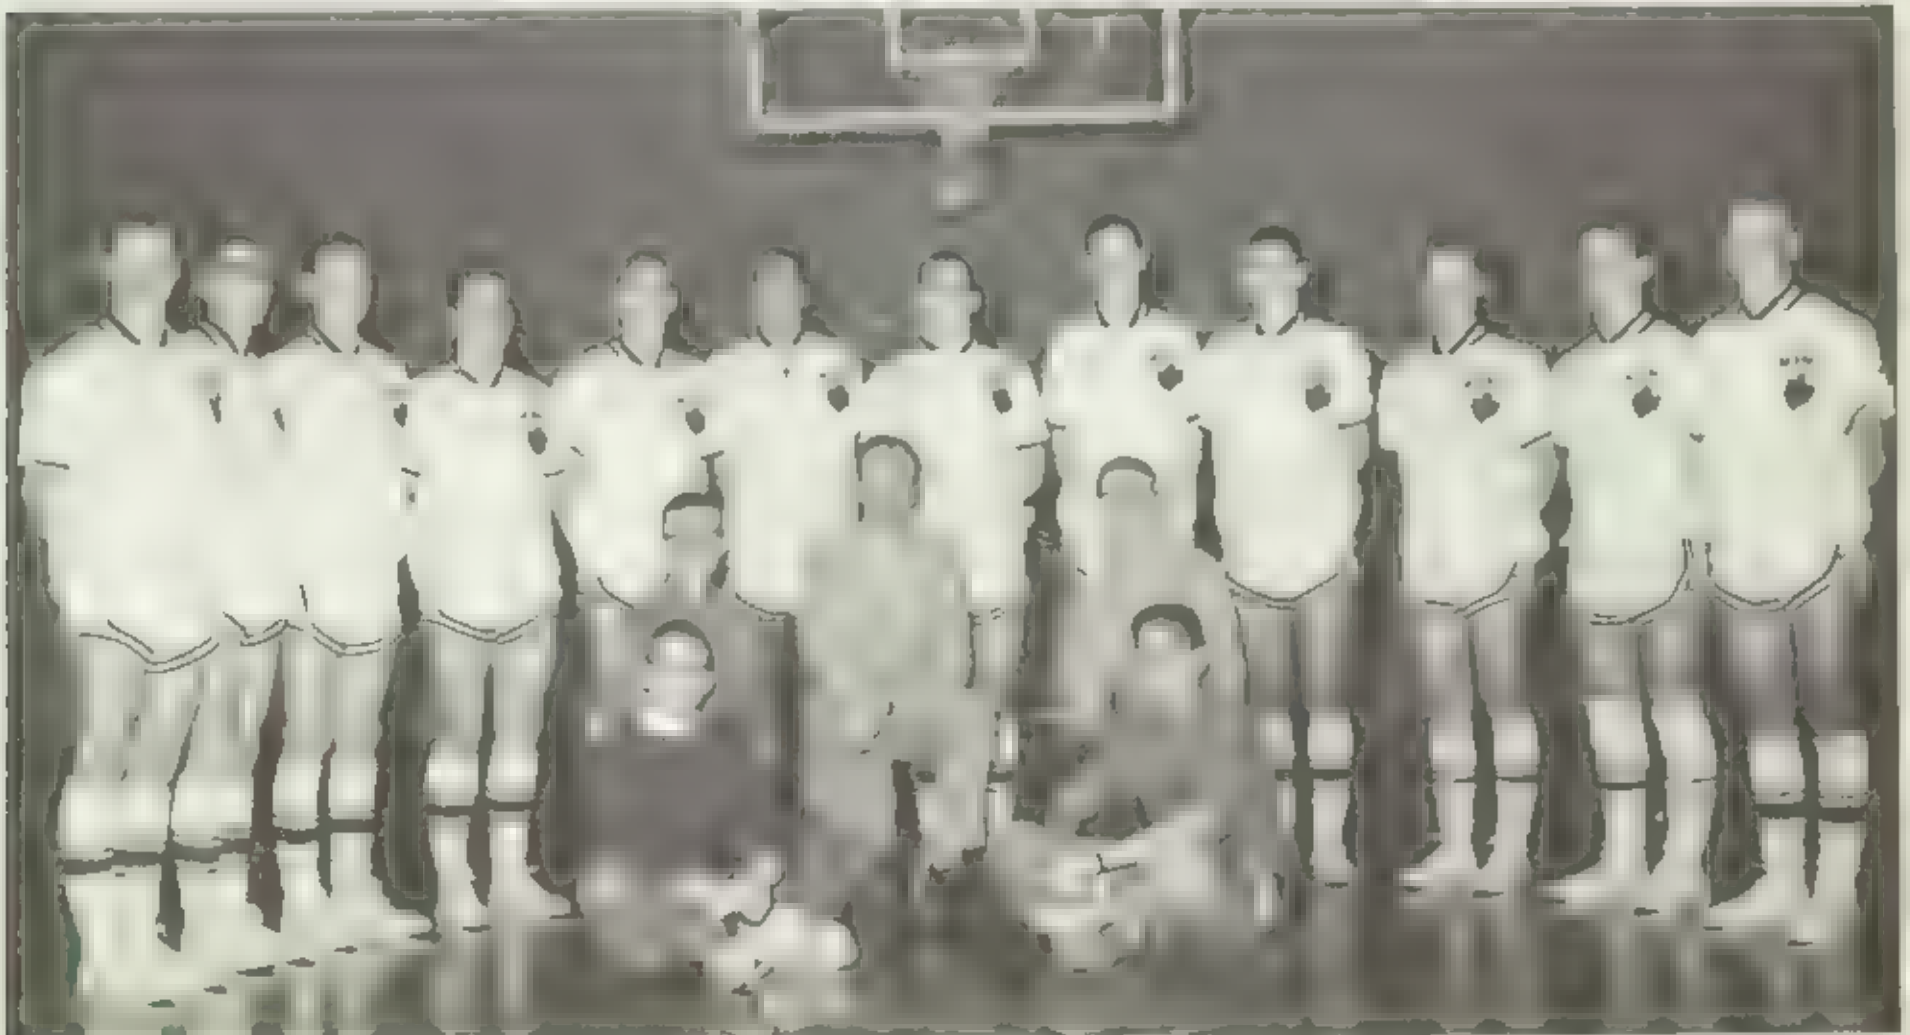

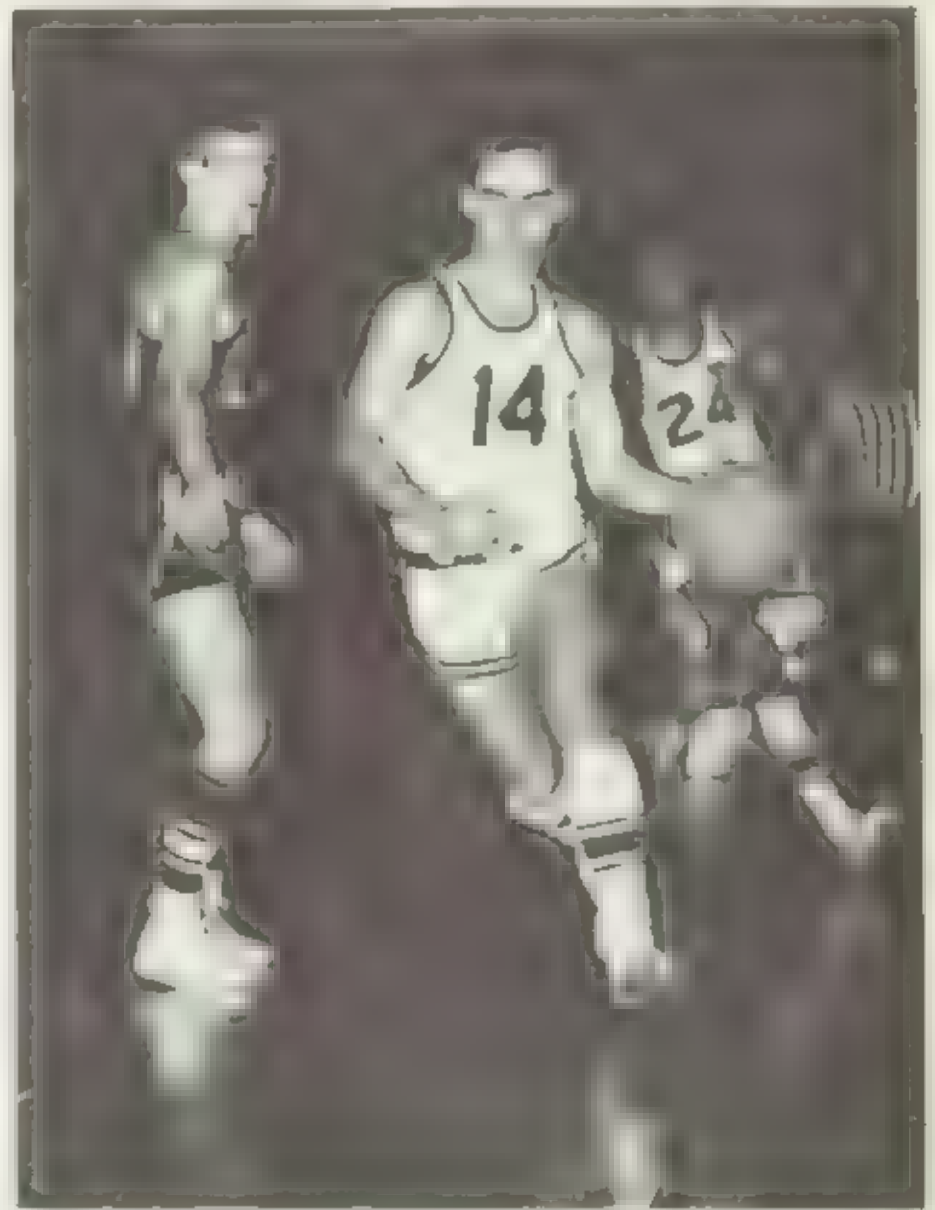

The losing streak was broken when the Maples pinned a 21 point defeat on Hazel Park before a large number of Seaholm rooters who made the trip to the Viking gym to cheer the victors.

When league champion East Detroit and runner-up Port Huron battled to give the Maples mere four and two point losses, Seaholm was no longer considered an EML pushover. The Maples further proved this by rolling up 70 points in an easy conquering of Mt. Clemens.

The season was brought to a close when Pontiac Central's powerhouse gave Seaholm a 65-35 reminder that this was a year for rebuilding.

Gene Schmidt, only senior to gain a starting position on the Seaholm five, will long be remembered for his patented last minute baskets that brought the Maples breathtaking victories over the last two years. A baseball star in the spring, Schmidt was named co-captain of the Seaholm cage team along with Jack Bacheler.

The Maple basketball team, from left to right: Dick Schwarz, Jay Ahlert, Gary Smith, Dave Rieck, John Slater, Bruce Nyberg, Brant Conley, Jack Bacheler, John Meecke, Chuck Hanton, Gene Schmidt, and Jerry Lohla. Coach Parry is kneeling with student managers Dick Mondant, Bruce Green, Dick Kresge and Jack Hanton.

# Swimmers sail through successful season

Don Spencer, undefeated in the 100 yard butterfly and 200 yard medley, here sails to another record time. Spencer, although only a freshman, was Seaholm's star performer in the state meet and one of the main reasons why the swimming team had such a successful season.

When Grosse Pointe defeated Seaholm in the first meet of the season, few could have guessed that these same two teams would go on to become state co-champions. Grosse Pointe's 17 point victory seemed quite decisive and their winning of the Kimball relays a week later further emphasized their superiority over the Maples. However, Seaholm had a whole season in front of them and a coach who could make good use of the time.

With young Coach Van Fleet masterminding the march, the Maple tankers won all of the remaining meets during a regular season that was highlighted by a 65-40 triumph over Groves before the largest home audience of the year.

The season closed with SHS and Kimball being the only threats to win the EML championship meet. In what was almost a dual meet between the two powers, the Maples conquered Kimball 125-109 for the crown.

Four big reasons why the Maples will be the team to beat in the EML next year are Tom Coupe, Linn Smith, Tom Kennedy and Bob Wolf. Sophomores Coupe and Smith surprised many with their free style talent while juniors Kennedy and Wolf were instrumental in bringing Seaholm its state crown at Ann Arbor.

# Underclassmen outscore senior swimmers

Belknap's John Brown and John Brown were arrested  
 by soldiers from the Massachusetts State Militia, and taken to the  
 of the first of the soldiers was a soldier by the soldiers  
 of the soldiers' parents.

The 1992-93 season was a pretty good one for us. In Spring, June, July, and August, Bill and I went out and caught 140 fish, composed of 100 bluegill, 20 bass, 10 crappie, 10 sunfish, 10 catfish, 10 rock bass, and 10 striped bass. The total weight of the catch was 1,100 lbs.

Table 1 lists the two models used in the study. The first model is the standard linear model (SLM) and the second is the nonlinear model (NLM). The NLM is a nonlinear model that can be used to model nonlinear relationships between variables.

Superior Day Camp has received a third place FMI ribbon and a fourth place award for state camp. All three tanners will be back next year to beat their camp.

# Coach dunked after championship victories

# Grosse Pointe only team to defeat Maples

Rivalry between two champions is the greatest show the world of sports has to offer. Probably the most intense of all rivalries this year was Seaholm's swimming clash with Grosse Pointe. After losing their only dual meet of the year to the Blue Devils, the Maples were frustrated again in their attempt to win the Royal Oak Relays by the same Grosse Pointe powerhouse.

Seaholm went through the rest of the season undefeated with their eyes always looking to the state meet in Ann Arbor. When the date for the big event finally arrived, the Maple tankers were greeted by nearly 300 Seaholm students who had made the long bus trip.

However the great rivalry was not to be settled this year as the Maples swam almost superhumanly to tie Grosse Pointe for the state swimming crown.

The IAT championship was not only not a sure bet for Seaholm's tankers and when they edged the mighty Kimball team for the title, the jubilant Maples gave their coach a victory dip.

Official timer J. Jay Myers and Coach Corey Van Fleet clock another Maple tanker as he touches home. Mr. Myers left the coaching chores to Mr. Van Fleet two years ago without change to Seaholm's sparkling record.

# Seaholm reserve squads gain experience

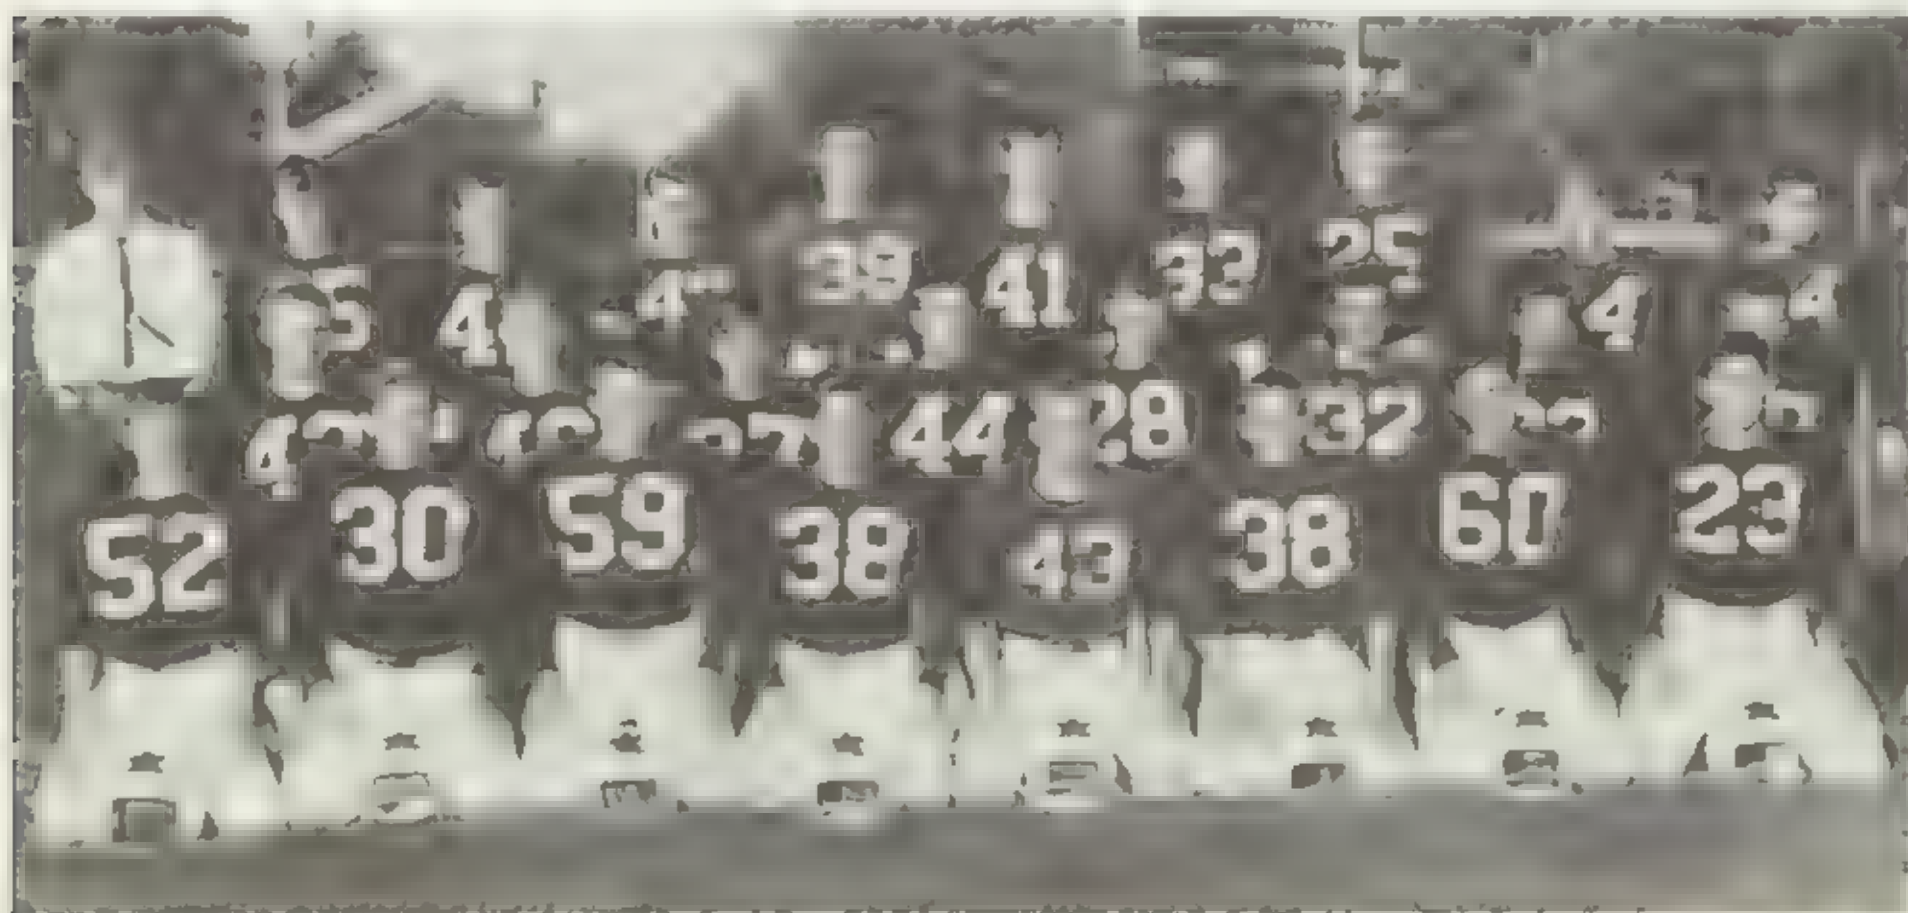

**STANDING CLOCKWISE**—Chuck Heffner, Mark Fink, Ron Jacobson, Jeff, Ron Jacobson, Mark Lindsay, Chuck Faulk, Coach Halinan, Jim Cheney, Bob Hubbard, Jeff Meyer, Don Oatman, Ed Rogers, Ed Kaufman, Bob Swanson, Dean Harrison.

**FRONT ROW**—James Denis, Fred Trost, Jack Folta, Mike McCassey, Ken Heft, Craig Johnson, Walt Lindlow, Bill Meers.  
**ROW 2**—Bill Graham, Jon Hawley, Doug Hamilton, Bill Patton, Ron Jacobson, Leo Renault, Hardy Moore.  
**ROW 3**—Coach Tasso, Doug Windler, Mike Pakis, Dennis Roberts, Bob Hamilton, Steve Meese, Bruce Green, Dean Wisniewski, Mike Rhodes, Bob Hamrick.

Winning only four out of fifteen games last season the Maple Reserve basketball team gained much experience under the fine coaching of Mr. Halinan who coached his first year here. Several of the sophomores will be assets to Mr. Parry next year.

Finishing the year with a fine record of five wins and only two losses the Maple Reserve football team showed its strength as a team many times. With great runs by halfback Ken Heft and extra-point kicking by Brent Miller the Maple Reserves showed a great potential for putting a lot of backbone in next year's varsity squad.

# Boys play, prepare for physical fitness day

In keeping with President Kennedy's feelings on fitness, Seaholm instigated a physical fitness program in the gym classes. It is hoped that with such a program the coaches will be able to find the capabilities of all the boys and give special attention to those who are below average in the fitness tests. In addition to this program, skills in swimming, basketball, volleyball, archery, tumbling, and other sports are taught in gym class.

Another first this year is an intramural program held after school two or three days a week. Boys are able to form teams in touch football and other team sports and compete against each other. During the winter, a swimming program is held before school in the morning for interested boys.

On April 11, teams of boys picked from the gym classes represented SHS at the EML physical fitness day held at Ferndale. Participants were divided into two classifications; Junior, for 15 year olds and under and Senior, for those 16 and over. Sit-ups, push-ups, free throws and volleyball made up the day's program for the boys. No varsity athlete was allowed to participate in this event.

A fast game of volley ball is a good way to let off steam and receive healthful exercise as Bob Sigler and Alan Wolfley find in their boys' gym class.

Practicing sit ups in preparation for the EML physical fitness day is Bill Bullock, assisted by Kim Bailey. This is just one of the many exercises designed to put teenagers in top condition.

# Energetic Varsity club builds school spirit

Distinguished as being one of the oldest clubs in the school, Varsity club can always be seen in their maroon and white sweaters cheering their fellow athletes on during all sports events. Although not known as a money-making organization, Varsity club can annually be depended upon for donations to MCG, AFS, and the Marc Joslyn Memorial Trust Fund.

Mr. Lemle, adviser of Varsity club, has made plans to install a Hall of Fame in the wing by the swimming pool. The Hall of Fame will be composed of pictures of all the athletic teams that have played since the beginning of the new Birmingham High School. The project, which has been a long time in planning, should be finished by the end of the 1962 school year.

Any athlete who wins a letter in any varsity sport may be accepted as a member of Varsity club and wear the Maple leaf signifying his membership. Only captains of each team may wear white sweaters.

Looking over the pictures to be installed in Varsity club's Hall of Fame are Gene Schmidt and officers Greg Frontier, Murray Stewart, Ron Ricketts, Al Freed and Bob Kennedy.

## Girls aren't forgotten

Although varsity athletics for girls are not offered at Seaholm, the almost 800 girls are not forgotten when it comes to sports activities. The gym classes provide opportunity for at least six different sports throughout the year for every one.

GAA, an extra-curricular club, provides sports activities after school enabling the girls to pursue any one favorite sport. Aquabelles, a major part of GAA, is the swimmer's delight. Hard work and cooperation make for a coordinated, well-organized group.

Finally, girls may become a cheerleader or participate in the Pep club. Cheerleading requires time and effort, but spirit and enthusiasm are acquired by all who try out. Pep club is a group which girls join to demonstrate school spirit.

The art of fencing is studied by all senior girls during gym class and is found to be stimulating for its lessons in poise and balance. Besides it is fun. Connie

Banett, Gerry Schubeck, Judy Gontz and Pat Quinn salute each other from the position of attention just before starting a practice session in the little gym.

# Gym classes

Heads up! All eyes on the birds. Jeanette Rucinski, Peg Backstrom, Claudia Purdy and Lourie Smith intently watch the bird while playing a tournament match in class.

Students attempt to Yank on Yogi Berra and Roger Meech as Betty Schwab and Evelyn Cowart. A SEHS flag football game in the great American sport of softball in gym classes.

Following the times of the Bow Hastings class the arrows from the target being at a class with Jill Johnson and Jeanette Rucinski watch.

# provide girls with physical exercise in busy day

President Kennedy has explained to the nation the importance of physical fitness. This pertains not only to boys but to girls. As one can see, the various sports offered for girls at the high school are designed to help teach co-ordination, while giving them exercise and fun.

During the year physical fitness tests that were made in Washington were given to the girls. These tests included pull-ups, modified push-ups, burpees, and broad jumps. The tests were given twice with great improvement the second time.

Girls are not only taught physical co-ordination; they must learn to get along with others. The classes are large involving many different types of personalities thus giving the girl many opportunities for making new friends. The gym teachers also exchange classes every six weeks adding a little variety to the class and letting the girls get to know more than one instructor.

The gym teachers have worked out a program for the Seniors so that the sports they learn in class may be continued after graduation. These include golf, tennis, badminton, and swimming. The Juniors who wish can take synchronized swimming. This will help them particularly if they have any desire to be a part of the Seaholm water ballet. The Sophomores have their own exclusive program too. They spend one marking period examining their posture to help them become attractive young ladies.

Most of the activities offered are seasonal. In the fall speed-o-way, badminton, volleyball, fencing and swimming challenge the girls all day long. Winter sports include basketball, Swedish gym, tap dancing and trampolining. Spring suggests the bright outdoors and that is exactly where the girls go for their classes. Archery, softball, golf, and swimming take the girls outside and keep them healthy, physically fit, and sufficiently exercised.

Two on a trampoline can be a real challenge for novices. Marty Croteau and Nancy Metcalf show how the seat drop should be done while their classmates watch.

Carole Lapham

Judy Stevenson

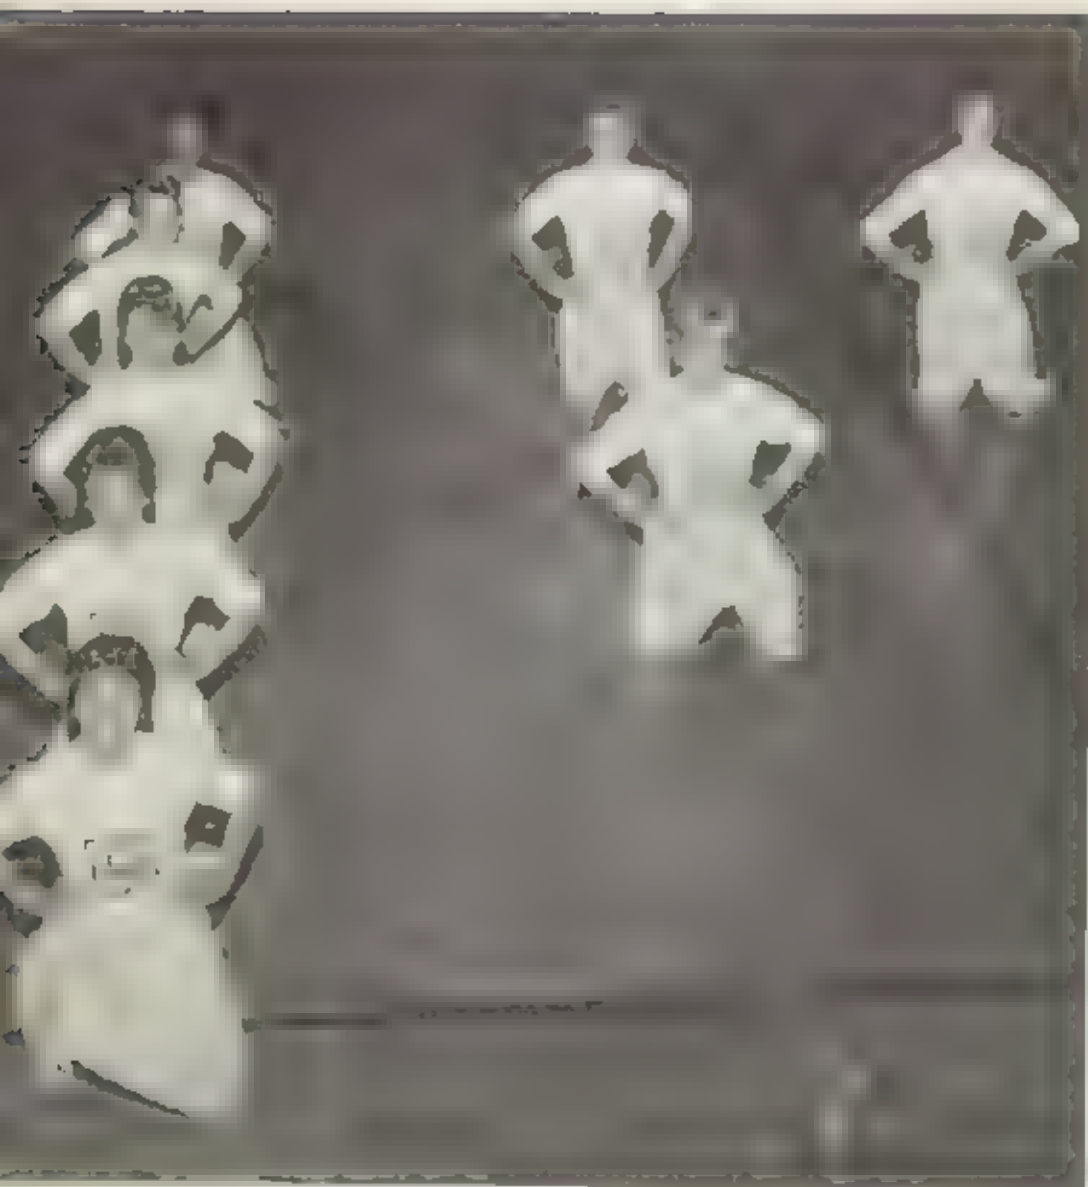

Kaye Dixon

Swedish gym is good exercise for the girls and fun too. Led by Mrs. Dixon, there are a great number of diverse routines that will keep the girls slim and trim. At first the girls get stiff and wonder about the values of these contortions, but eventually everyone joins in the belief that gym class is a pleasure.

# Cheerleaders help to

Pep smiles worn by the Seaholm cheerleaders greet everyone at football and basketball games and swimming meets. Behind each smile is a conscientious, fun loving girl who devotes time and effort to support the Maple teams. Practice sessions start in the summer and continue through the entire year. Hard work, along with spirit and cooperation, make these sessions profitable.

This year for the first time Seaholm had reserve cheerleaders and their work indicates that the squad will be continued. Miss Lapham, head adviser of the cheerleaders, participates in all their activities and keeps things running smoothly.

But cheerleaders can't do the whole job of boosting team and school morale. The Pep Club is necessary to help keep the spirit up. Members come to games and sit in specified blocks of seats so that their combined voices may cheer the Maples on to victory.

Varsity cheerleaders have many formation cheers; the favorite is F-clap. Kneeling in the traditional F are Sue Hebblewhite, Nancy Walls, Pam Ross, Cindy Roberta, Francie Quillian, Patty Headrick, Emily Edwards and Sally John, captain.

In a pre game pep assembly, cheerleaders put on a skit mocking school spirit, followed by speeches from Mr. Davis and Mr. Van Fleet, who gave vivid descriptions of what school spirit should be.

Lolly Dickson, Kathy Riley, Andie Stuckel and Marilyn Perry, reserve cheerleaders, did a fine job this year in promoting school spirit and supporting the swimming and reserve teams.

# inspire spirit, gain student support of sports

During the football season, the cheerleaders are a source of inspiration to the team. Their enthusiasm and support are a great asset to the team.

Right to the point, the cheerleaders are a source of inspiration to the team. Their enthusiasm and support are a great asset to the team.

The cheerleaders are a source of inspiration to the team. Their enthusiasm and support are a great asset to the team.

The cheerleaders are a source of inspiration to the team. Their enthusiasm and support are a great asset to the team.

# audience as they perform annual water show

Aquabelles, a major part of GAA, provides the proper place for swimmers to display their talent. The girls interested in joining the club must go to practice sessions for approximately a month at the beginning of the school year. At the end of these practices come the try-outs. At this time the girls are rated by Miss Stevenson and Aquabelles of the previous year. From this point on each girl in the club works to improve her routine and become more graceful in the water.

After a regular membership is established the best twelve girls are chosen and form a group called the "top twelve." These girls become directors of acts and members of special groups for the annual Aquabelle show. This year's top twelve consists of Kay A Hearn, Sue Crandell, Nancy Fleming, Doreen Henderson, Jennifer Jackson, Lillian Jackson, Ann Mackenzie, Marilyn Perry, Kindy Squibb, Paulie Schnackel, Joyce Thompson and Jenny Willey.

The entire year's work goes toward the one, final performance given in the spring. This year the theme for the show is "Music" using songs from the musical show *The Sound of Music*. Lillian Jackson and Kay A'Hearn will each do a solo while Paulie Schnackel and Doreen Henderson have incorporated able swimmers Dave Demorest and Noel Burnham into their duets. Every other girl is in one or more acts according to her swimming ability and length of service in the club.

Each year the Aquabelles put on a terrific show which receives great preparation from the girls and their advisers. Hours are spent in rehearsal and the water show seems to keep us in a festive and cooperative spirit throughout the year. Signify-

It is important to have the appropriate music to go along with the theme of a show. President Kay A Hearn, treasurer Kindy Squibb, and secretary Lillian Jackson listen to records with their advisers Miss Stevenson and Mrs Dixon.

ing the end of another season and another show is the finale. In the 1961 production Holly Shurt and Eleanor Hall led the club in its final act of the year. Their theme was taken from the musical show *The King and I*.

# Girls' athletic abilities are shown in GAA

Bowling seems to be the girls sport with the most participants. One reason may be that a local bowling alley gives GAA special rates. Many beginning bowlers have found the skill of bowling through this program. Sally Kelly shows her excellent form and raises a jubilant shout at her strike.

GAA, the one club that encourages girls' sports, is an active one in the life of Seaholm girls. Since athletics for girls in a competitive aspect are not offered, GAA provides various activities the year round. Girls may participate in volleyball, basketball, trampoline, modern dance, bowling, water ballet, golf, and tennis sometime throughout the year.

GAA is a club which is established in every EML school. Twice a year the schools get together for a "play day" at which each school sends approximately ten girls to compete in the different sports. Trophies are awarded for first, second and third place teams and individual winners. Once a year the schools have a GAA camp where ten girls from each school go for two days. The girls again compete in sports, and are rated first, second and third. At the camp the girls are mixed up so that each cabin will have a girl from each school. In this way everyone comes home with some new friends.

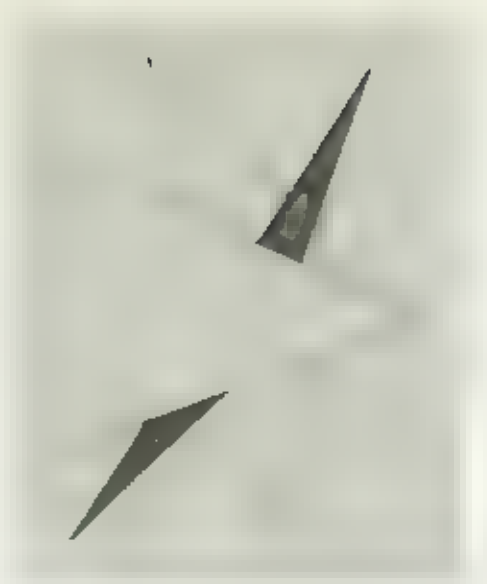

The final fling of the year is the annual banquet where special awards, certificates and letters are given out. This usually takes place in a Birmingham restaurant which adds a little special something to the affair.

Directing GAA throughout the year have been six girls working under the guidance of Miss Lapham. Joyce Root, secretary; Pat Roach, treasurer; Joan Osborn, vice president; Miss Lapham, sponsor; Kathy Pilling, president; Sharon Nove, historian; and Kathy Etter, publicity chairman, confer before a meeting.

Various sports activities follow each meeting of GAA. Pat Graves, Nancy Schaeffer, Joyce Root, Karen Boger and Jean Van Loan are having a vigorous game of basketball.

## Classes enthusiastic

Relatively new to the school, Sophomores and Juniors rapidly learned to laugh and enjoy life at Seaholm.

Even though the underclassmen were sometimes overlooked by the graduating Seniors, the 1100 students comprising the two lower classes are the backbone of the school. They enthusiastically support homeroom campaigns, club activities, sport events.

Juniors and Sophomores earned large sums of money for themselves and their classes through the presentation of two highly successful fund raising drives. Sophomores sold Christmas and gift wrapping paper while Juniors engaged in the traditional candy sale. Sophomores held a class party while Juniors presented a Variety Show and J-Hop.

Raising of money for Senior expenses occupies much of the time of the underclassmen. Sophomores Donna Gould and Linda Rettray, high salesmen, check

out wrapping paper with Jim Hinkamp while Juniors John Weston and Stan Cutler help the Sanders Candy truck driver unload the 8,500 pounds of candy

Sophomore class spirit amazed Seaholmites this fall. Enthusiastic purchasing of the school's Activity Ticket by sophs (they had the highest class percentage, 92%) was just the beginning of the display of the class spirit. They showed the unity of the underclassmen as their theme, "Small but Mighty" was very impressive. Nearly six hundred Leprechauns, hoping for a victorious Field Day, surprised the juniors and seniors with their eagerness and ability. After placing high in many important events, even a final last place score did not dampen the enthusiasm of the class members.

Efficient officers worked diligently with other class members to make the sale of Christmas wrapping paper a terrific success. A class party helped raise money and also provided a means by which sophomores could become better acquainted with their fellow classmates.

These two money-making projects paid off wonderfully as the class treasury rose.

Sophomore members gave generously to all worthy causes. The Torch Drive showed this class filling its quota satisfactorily and at Christmas, beautifully decorated baskets for the needy families were filled to overflowing with food and toys.

The ordering and receiving of the class rings was another memory filled event for the underclassmen. For the first time sophomores were guided through the early weeks of school by the information contained in *The Tartan*, school handbook, and as a result, many sophomores found themselves joining numerous clubs and organizations earlier than usual.

It seemed as though school had just begun when the sophomores were pondering over final exams.

Seated under the picture of Mr. Finest W. Seaholm for whom the school is named, are the officers of the Sophomore class, busily engaged in planning the activities for the coming year. They include Tom Farnworth, president; Andrea Everett, vice-president; Sue Thalacker and Chris Jensen, senators; Marica Bayliss, secretary and Rick Lotero, treasurer.

# Juniors look forward to next year's activities

*Homeroom A206—Mr. Ulrich*  
*ROW 1—Judy Jewell, Pat Roach, Brenda Drumm, Lucy Whitley, Margaret Evans, Tracy James, Meril Penn*  
*ROW 2—Sharlene Petrucci, Sharon Moyer, Pete Rydell, Hank Shuster, Bill Meuser, Doug Lavy*  
*ROW 3—Sandra Root, Jim Hartkopf, Lee Olson, Jim Stewart, Stu Forrest, Bill Pettit*  
*ROW 4—Ed Champlin, Mike Doback, Bob Drothler, Steve Riley, Jim Sappington, George Dwelley*  
*Not in Picture—Jim Butler, Syd McCulloch*

*Homeroom F101—Mr. Van Dragt*  
*ROW 1—Hyla Clark, Audrey McMinn, Helen Johnson, Sandi Hockett, Paulie Schnackel, Joyce Blake*  
*ROW 2—Chris Palmer, Lynn Lowman, Linda Purdy, Diane Sprunk, Diane Case, Dawn Martin, Terry Beal*  
*ROW 3—Wayne Taylor, John Radtke, John Campbell, Randy Smith, Jerry Lohla, John Weston, Alan Talbot*  
*ROW 4—Janet Brookman, Walter Dawson, Bill Oates, Dennis Larson, Jim Dries, Steve Pearce, Victor Stumpf, Jay Benedict*

The Junior class officers seated on School's front steps are Dave Sanders, president, Tom Kennedy and Janet Brookman, senators. Standing behind them are Steve Hockett, secretary, Bob Brown, treasurer, and Bill Sprunk, treasurer.

The Junior year . . . a year of dramatic events, year of hard academic work, year of achievement, year of in-betweenness . . . proved to be outstanding in numerous ways.

Constant chanting of "Yo-ho!" showed originality and unity as over five hundred hopeful pirates carried out their theme on Field Day. Vivacious Lillian Jackson, Field Day Chairman, constantly worked with many committees preparing for that October day. Quickly Field Day came, filled with all its toil and tension. After several victorious events the Junior class placed second in Field Day.

Names of four American Field Service finalists, Tom Brooks, Trudi App, Dave Sanders, and Lillian Jackson, selected from the thirty-nine Junior candidates, were sent to AFS headquarters for a final choice.

Selling nearly 8,000 pounds of candy, Juniors made the annual candy sale a success.

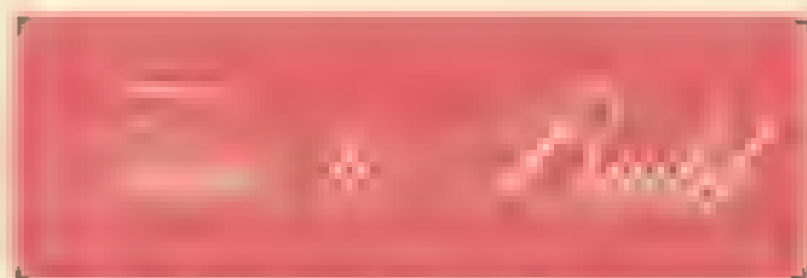

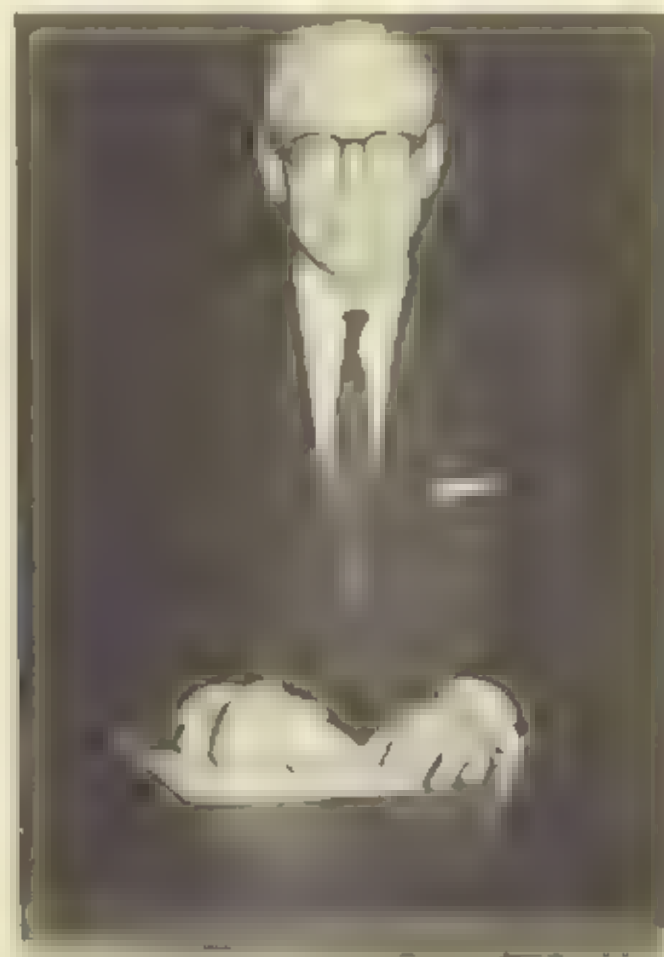

Time, hard work, and planning are the ingredients for a successful J-Hop and the Junior class had all of them. A fun-filled occasion and memorable event was the result as Betty Schwab, J-Hop Chairman, directed the entire class in presenting a beautiful J-Hop.

Proud of their achievements, Juniors soon realized that the school year was ending. Now, with their Junior year behind them, the Class of '63 looks forward to a busy and exciting year as Seniors.

Handwritten text in red ink, oriented vertically. The text is partially obscured by the sketch and appears to be a list or a series of notes.

# Mr. Goodrich retires after 40 years

Because Mr. Goodrich handles all faculty affairs, he must work closely with department heads, newly installed this year to organize and coordinate the activities of their academic areas. He must consult Mr. Thumser, Mr. Cooch, Mr. Richards and Mrs. Blunt in scheduling classes and teachers and secure requisitions of textbooks and classroom supplies for each of their departments.

Also in connection with his faculty duties, Mr. Goodrich sees every teacher before 7:50 in the morning, making certain that each teacher is accounted for, have substitutes or that substitutes are on their way.

Falling under further duties of assistant principal is the daily operation of the school building, such necessities as scheduling what boys will run the projector for which class, which teachers can use what rooms for movies at what times. Because he must keep a constant check on supplies, on room usage, on teacher attendance, Mr. Goodrich is a familiar figure in any hall before school, during classes, between periods and after 3:10.

Before his promotion to assistant principal, Mr. Goodrich served as a counselor and tennis coach in 1918, also supervising the junior high school basketball team at Baldwin during the late 1940s. Other school coaches in that year included Mr. Myers, Mr. Cooper, Mr. Scouting, Mr. Newcomb, Mr. Simonds and Mr. Whitney. Mr. Goodrich's interest in tennis stems from his 1921 singles championship at Western Michigan.

Active in track, tennis and cheerleading at Western Michigan University, Mr. Goodrich has since coached tennis and basketball teams in various Michigan schools. Giving up his position as superintendent of Houghton schools, he came to Birmingham 23 years ago to teach general science and act as junior high boys' counselor. When the junior high grades were moved to Barnum, he became boys' counselor and taught American history and civics. During the war he was an air-raid warden and trained boys for bicycle messenger service. Assistant principal since 1951, Mr. Goodrich has been a Boy Scout leader, a YMCA worker and a Hi-Twelve member in the community.

# Study suits plans

As Seaholm scholars we are future builders of our nation, preparing for our life work. Academic instruction is steering us toward some of our country's 22,000 kinds of careers. Evidencing a diversity of talents and interests, we strive for excellence in our school work. Depending on our plans after graduation, we follow practical schedules.

By examining the courses taken by ten Seaholmites, we can best illustrate the complete picture of our scholastic life. These sophomores, juniors and seniors represent the half-day uptown employees, the chemistry and physics experimenters, the auto shop workers, the artists, typists, musicians, engineers and writers who fill our classrooms—building for tomorrow.

Seaholmites select courses that will prepare them to meet their future career and citizenship responsibilities. Scanning the scheduling record are Don Lystra

Joyce Morris, Rudolf Thun, Bob Hendrickson, Jerry Morris, Barb Kirkbride, Bob Anderson, Sue Gacy, Melody Murphy and Clayton Dashiell.

NEW AGENT HESTON HAS BEEN ASKED TO TAKE ON one of these three men. Mr. Wagner, principal, takes time out from his weighty duties to examine his portrait, donated by

THE WAY OF LIFE. Mr. Clayton, assistant principal, phones a substitute teacher about taking over a class, and Mr. Clayton, attendance officer, warns a student not to be late again

## Fine foursome facilitates flexible functioning

Pat Quinn and Wendy Isherwood have thought seriously about what colleges they wish to attend. After the long process, they have decided on the University of Wisconsin. They have filled out the necessary application forms.

What a week of order in a wing? No light in a wing. Is that truck stuck in the snow? Are the Iowa tests next week? How many juniors plan to form that new gymnastics club? Where did that college transcript form go? It couldn't have disappeared. These and numerous other problems confront Seaholm's administration every day.

But, to maintain a smooth functioning school, four important people and their respective secretaries divide these problems among themselves. First, our principal exercises final authority on all school matters and carries the responsibilities of the entire school. Supervision of building operations and teacher personnel falls under the duties of the assistant principal. The dean of students directs all extracurricular activities, and the attendance officer handles all discipline problems and attendance records.

Finally, besides assuming all responsibilities for the Iowa and college board testing programs, and handling various parental and student complaints, the five counselors provide college and career guidance.

Actively engaged in the teaching of science Mrs. Lawrence, one of students' favorite teachers for a clear, interesting and practical instruction.

Our teachers include Mrs. Hayward, bookkeeper Mrs. Wagner, Miss Smith, general office secretary Mrs. Lawrence, principals secretary and Mrs. Lawrence, receptionist.

## Busy employees add to activity of office scene

As a factor in the activity of the office, including September general term, thousands of letters of business pass through the V.M. office each day. And work day Mrs. Lawrence does look at the day's work in the office where Mrs. Hayward waits to type.

At work with Mrs. Hayward at a desk, this out rightly a secretary and Mrs. Lawrence, the first and Mrs. Wagner, the first book type of the business. Standing at the desk, Miss Lawrence, generally, the first person with Mr. Wagner.

Putting compositions on the bulletin board, Bob Anderson admires his classmates' efforts to present a view of English life during the time of Chaucer's *Canterbury Tales*.

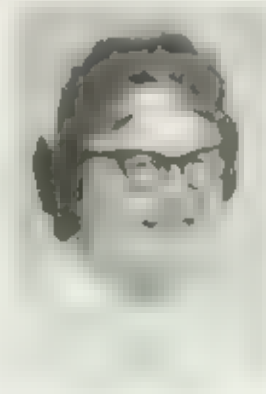

Accepting term papers from Bob Anderson and Jack Bachelet, Mrs. Blunt plans to spend many hours of critical reading. Numerous excellent papers are submitted and turned in during the semester. As a result, the English class is a very busy one. A good paper usually helps a student prepare for the rigors of college studying.

# Absorb, record ideas

Don Lystra and Bob Anderson need to build broad literary backgrounds for college. Although both have scientific careers in mind, they study English and American literature to perfect their communication of ideas by learning how others have expressed their thoughts. To provide a basis for future independent analysis, the boys absorb the philosophy of Emerson, the symbolism of Hawthorne, the epic style of Beowulf, the universality of Shakespeare, the exaggerated characters of Dickens. Opinions formulated on their reading are in turn expressed by increasingly coherent and logical themes. Seniors gain further organizational techniques in gathering and assembling information on chosen topics into the required 2000-word research paper.

Marilyn Arner

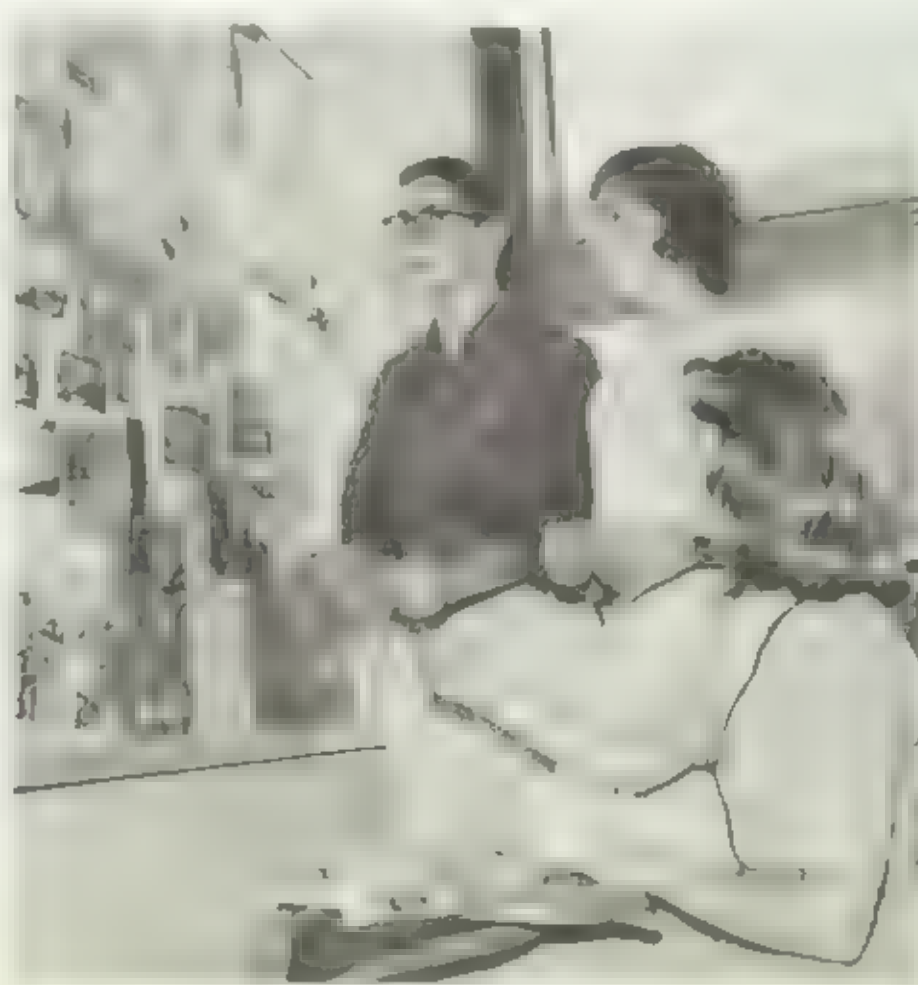

Alice Price

Katherine Blunt

Don Lystra, Bob Anderson and Gretchen Van Sickle pause their busy work, trying to decide where to place their last paragraph. The boys like this one, but it is high on the class list. The room is well as providing a source of relevant material.

# Add to honors course

With the ultimate aim of omitting freshman English in college, students with B averages or better often enroll in Honors English. Begun in 1960 on the junior level, honors classes in all three grades have been established this year. Although the honors curriculum involves basically the same material as college prep courses, the study of rhetoric and more intensive analysis of novels, poetry, plays and their own themes bring students a deeper understanding of methods used in developing plots, characters, descriptions, arguments, and comparisons. In the sophomore honors class, Sue Gieryn, who puts her writing skill to use in after school work on the *Piper*, takes great interest in the language arts and hopes to attend college in the East.

Charles Beall

Dorothy Gove

Ann Heystek

Utilizing the informality found in college seminars, Mrs. Gove, junior Honors English teacher, discusses yesterday's rhetoric assignment concerning informal and rhetorical definition.

Following the reading of the poem "A Day in the Life of a Soldier" by John Keats, Sue Gieryn, sophomore, reads a poem of her own.

Following the reading of the poem "A Day in the Life of a Soldier" by John Keats, Sue Gieryn, sophomore, reads a poem of her own.

# Juniors spark senior social studies courses

Infiltrating the once exclusively senior social studies classes, Seaholm juniors, in small numbers, are starting a trend. Instead of entering U.S. history in the eleventh grade, they are tackling civics, international relations, economics, and sociology. As seniors they will look into America's history.

College preparatory junior, Don Lystra, for example, chose to mingle with his upper classmen in economics. Thereby, in advance of the usual time, he is familiarizing himself with the business of government so far as concerns its income, its expenses, and its resources.

Reading three to four times as much as regular American history students, a small group of juniors have joined the one honors history class offered this year. As well as assignments from a college textbook, extra reading from outside sources is encouraged. The new approach for study emphasizes cause and effect relationships, logical interpretations of historical events and their significance, understanding in depth of the motivations behind the actions of American leaders and people, and recognition of various historians' views.

Having found a particularly expressive passage pertinent to the study of philosophy in Mrs. McKeen's sociology class, Junior Fridt App opens to the page in *The Prophet*, a masterpiece by the poet, prophet and artist, Walt Whitman.

Classifying the Union cause in a class investigation of the opposing sides in the Civil War, Bob Williams, Jim Falconer, John Brown, Jay Benedict and Barbara Fish offer sound interpretations to their honors history class.

Assuming the roles of sharers in the ownership of Johnson and Johnson, young economists Jacquie Barnum, Don Lystra, and Carter Dinkeloo await Mr. Stroko's comment on their coverage of selling data, prices, changes, and net result.

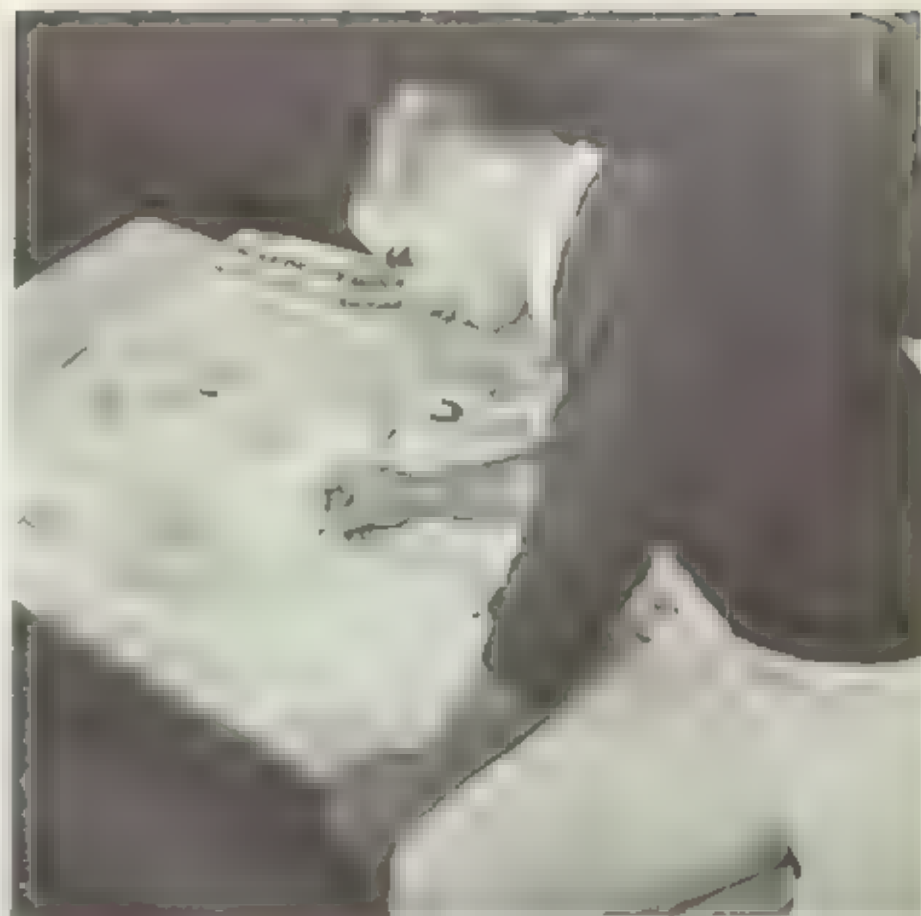

For three weeks, economics students maintain a daily chart of the highs and lows of their hypothetical \$10,000 investment in stock. Junior Don Lystra calls attention to the fluctuating value of his Eastman Kodak stock.

# Plan wise citizenship

To arouse an avid, lasting interest in government, to define and recognize the essential role of it in modern life, and to enlarge understanding of its processes—these are the aims of the civics course, a prerequisite for graduation at Seaholm.

Like other seniors, Bob Anderson has grappled with the substance of the local, state, and national governments, absorbing news of what a great but highly diverse people does for itself through its public agencies. A sobering experience as teen-age traffic court jurors awakens seniors to the problems of responsible citizenship. Aided by additional reading about other economic and political systems, the future citizens learn of the legislative, judicial, and executive branches of the government, of the background of American democracy, and of federalism, free enterprise, and foreign policies.

As he outlines the course of a bill through the House and Senate, Bob Anderson sees how the theory of lawmaking in a free legislature is carried out in practice.

Edward Strohn

Edward Vanderlaan

Robert Richards

On their fall field trip to Irons pond, advanced biology enthusiasts begin their study of all the living things of the pond and their relationships to each other. Bob Anderson scoops up a plankton sample with his net.

Understanding proper methods of using new equipment is an important first step for promising young biologists. Examining an organism from a soil sample, Bob Anderson carefully handles a compound microscope with an oil immersion lens.

## Ten take new class

Advanced biology, the newest addition to Seasholm's science department, emphasizes laboratory work and field trips. Introduced this year by Mrs. Cooch to ten interested seniors, the course begins where general biology ended, stressing more intensive analyses. In addition to the new textbook, *Science of Biology* by Paul Weisz, the students benefit from their own supplementary library. A great deal of new equipment, including medical bacteriological microscopes, is available to the budding biologists for their intensive work.

Concluding in the tracing of the food web, one time-consuming class project is the study of pond ecology, the relationships existing between all the living things in a pond. Their unique research includes comparison of floating, submergent, and emergent leaves. After composing a scientific paper about their discoveries, students make permanent slides using a microtome machine for cutting thin sections. The second semester stresses study in microbiology.

With plans including pre-medical study at Michigan State University next year, Bob Anderson, one of Seasholm's advanced biologists, has included in his schedule all the science courses the school offers. Like his classmates, he has enjoyed the challenges of deeper, more independent work in collecting, identifying, and relating the pond organisms to one another.

The glass aquaria and enamel collecting pans hold samples of plant and animal life from the pond. Terry Fisher and Jay Evilsizer use a dissecting microscope to identify the organisms they have collected.

# Many study science

With its detailed standardized tests and colorful experiments transforming materials, Seaholm's chemistry course stimulates numerous juniors and seniors. Don Lystra, steering his schedule toward mathematics and science courses in preparation for an engineering profession, represents the many juniors engrossed in the absorption of valences and equations pertaining to nearly thirty prevalent elements of the earth's surface.

Inspecting the alterations in materials not involving changes in composition, some college preparatory physics students spend time fashioning possible entries for the Detroit Science Fair. The course's scrutiny of mechanics, heat, sound, light, and electricity attracts prospective scientists, including Bob Anderson

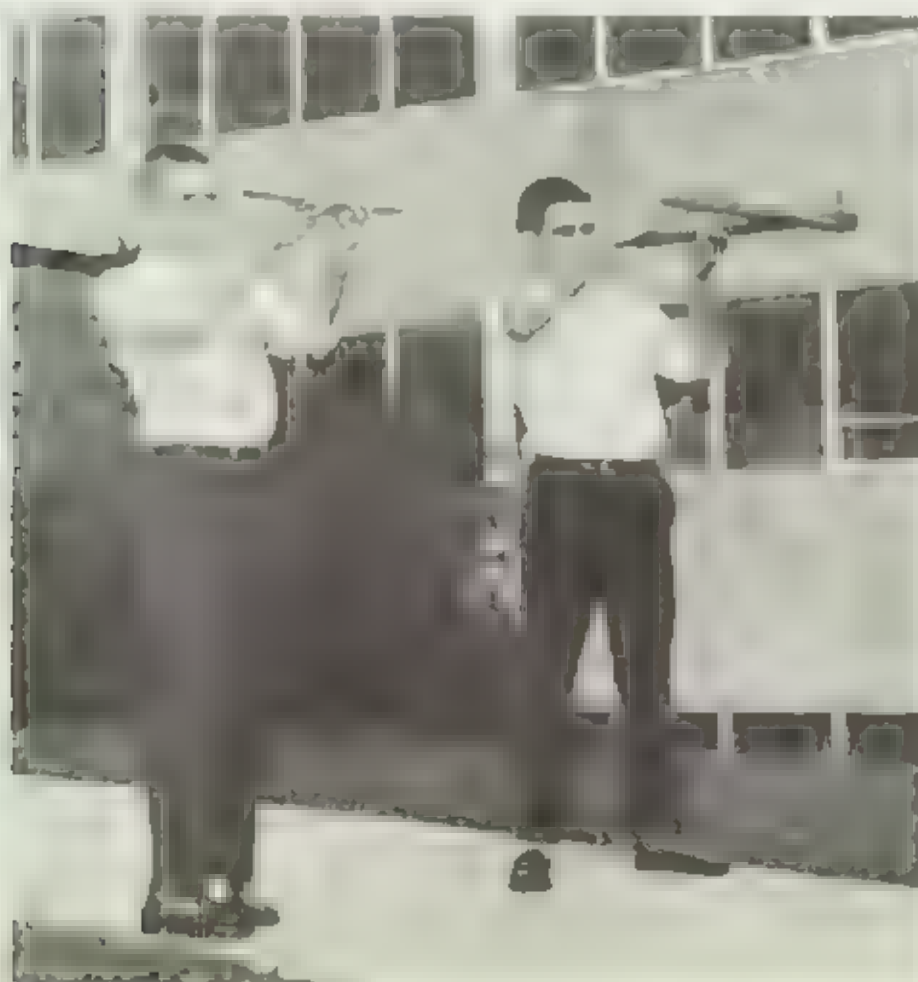

Lucille Cooch

Ralph Battenhouse

Virgil Harris

Who has been busy in the physics laboratory. Fred Clegg and Bob Anderson adjust their range finders until the movable mirror is seen in the fixed one.

With apparatus properly set up, Hyla Clark and Don Lystra demonstrate the delicate titration experiment for their chemistry class. Knowing the normality of the acid, they perform the titration against an unknown base to determine its strength.

Operating the chemistry room's giant slide rule to illustrate the shortest method of solving a complicated weight-volume problem, Don Lystra and Marge Sisson wait for their classmates to check the multiplication or division on their own slide rules.

# Honors classes benefit gifted mathematicians

As part of an accelerated program for talented mathematicians, Seaholm has opened the trigonometry and college algebra classes to juniors. By next year this advanced program will be completed by a course in analytical geometry and calculus for this first group of honor students. Its purpose will be to give greater background for college work to those with interests in technology or engineering, and, possibly, to prepare them to write an advanced placement test for college credit. Among these mathematicians is Don Lystra, who has been following the new program since seventh grade accelerated arithmetic.

Plane and solid geometry continues to attract sophomores who, like Sue Gieryn, consider the extra instruction in solid geometry and inequalities invaluable for college preparation.

Visual aids enable students to comprehend the complicated theorems and postulates of solid geometry more readily. Mr. Hubbard demonstrates a problem involving dihedral angles and lines in space to Tom Conrad and Sue Gieryn.

By using his newly acquired skills in trigonometry, Don Lystra knows that if Janice Bonghner's height and shadow and the length of the flagpole's shadow are all known, he can accurately figure the height of the flagpole.

In honors geometry, ability to develop the logical proofs of theorems is essential. Kathy Derrick clarifies the fifth step of her proof by defining a parallelogram for Mike Henry and Miss Herman.

Charles Thumser

Harold VanDragt

E. A. Hubbard

# Prove, derive, apply, compute in higher math

Combining knowledge of geometry and algebra, seniors enter trigonometry, one of the two semester courses available to them. The relations among the angles and sides of triangles and the methods of deducing from given parts other required parts are introduced to an inquisitive group of students planning to have a high school major in mathematics. Many, like Bob Anderson, interested in technical, highly specialized fields, foresee practical uses for trigonometry in their professions.

This year is the final one in which college algebra will be the only terminating course in the math curriculum. Beginning with a review of algebra, the class surveys various number systems and introduces the basics of calculus. In some cases, the work with the binomial theorem, permutations, combinations, and determinants is so thorough that it replaces the typical algebra course offered in college.

Puzzling over whether the half angle formula or the law of cosines would be the most expedient method of calculation, Bob Anderson and his classmates begin to concentrate on their trigonometry quiz covering several of the fundamental relations within a triangle.

In addition to problems using logarithms, the six trigonometric functions, and the 28 fundamental laws and identities, trigonometry students struggle through complex story problems to measure heights of trees, hills, buildings, and weather balloons. Bob Anderson enlists the aid of Mr. Thumser to compute the length of a fallen tree trunk, while Bill Shroyer and Loren Schmier wait.

Before applying some of the accepted relationships and identities of trigonometry, students are faced with proving and deriving them. Prior to beginning the units on equations, complex numbers and imaginary numbers, these proven identities must be firmly in mind. Bob Anderson rapidly reviews an elementary proof from his test paper for his semester exam.

## Latin study provides language framework

[[.]] [[.]]

## Related Names

Although the Roman culture which produced the ancient language is gone, a growing awareness of Latin's modern influence accounts for its mounting attraction at Seaholm. Its extensive vocabulary and complicated grammatical structure provide a basic framework for understanding of the spoken Romance languages.

While acquiring proficiency in conjugations and declensions introduced in Latin I, Latin II students translate Julius Caesar's *Commentaries on the Gallic Wars*. Those students who elect to continue in Latin III and IV delve into the prolific and enduring works of Cicero and Virgil. Cicero captures the political spirit of the times in his bold and powerful orations while Virgil's *Aeneid* meaningfully explores the universal subject of human nature. Introduced to the classes this year, in addition to the translation and projects, is a technique of testing known structural linguistics, a method used in college that checks proper gender, number, case and meaning.

Hoping to attend an eastern college, sophomore Sue Gieryn finds Latin most pertinent to the extensive reading she does.

Expecting to see a colorful representation of ancient Roman civilization in the museum of Christ the King and advised by two scholars following, we set off with our guide, Mrs. A. J. Lencid, travel by bus to see King of Kings.

Anticipating the likelihood of student misquoting, similes, and even more common errors noted by a Vigil notebook, Both Books and Sarah Alcott Library Manager and Joe McPherson administered the decision-making process of a former student's long-range project.

Displaying some of the projects required of Latin II students, Sue Gurnea and Mark Andriac read a section of Caesar.

# Stress conversational training in French

To vitalize the presentation of French, each of Seaholm's fifteen French classes is placing increased emphasis upon conversational training. Whether beginning or advanced, students benefit from the audio tapes of the language laboratory and the movies pertaining to French geography, history, and customs.

The basics of pronunciation and the contributions of the French language to our own language are covered in the first year, while French II stresses France's gifts to the heritage of the modern world in such fields as folklore, literature, science and music. French III classes concentrate on more complicated constructions, exceptions and literary forms. The playing of lively language games and the dramatization of skits from the text help to broaden the student's acquaintance with the "lighter side" of French civilization.

A Michigan Council of Churches exchange student to Finland last summer, Jerry Mason has an insight into the need for appreciation and evaluation of other peoples' ways of living, thinking and communicating. He is aiming for a practical command of French, next to English the most widely understood language.

While Diane Rosenberg, Sue Tiedeman and John Weston wait their turn to enliven the French III class with a humorous skit, Chris Kirby, Ann Illye and Wendy Hutton begin their oral presentation a day by simple, effective props.

To aid the language lab does not interrupt the learning of a student but furnishes opportunity for oral practice. Mr. Odner tunes in one of his French students.

After the essential phonetic sounds are mastered, French II student Jerry Mason, speaking into a tape recorder, works to develop a naturalness of expression.

George Couch

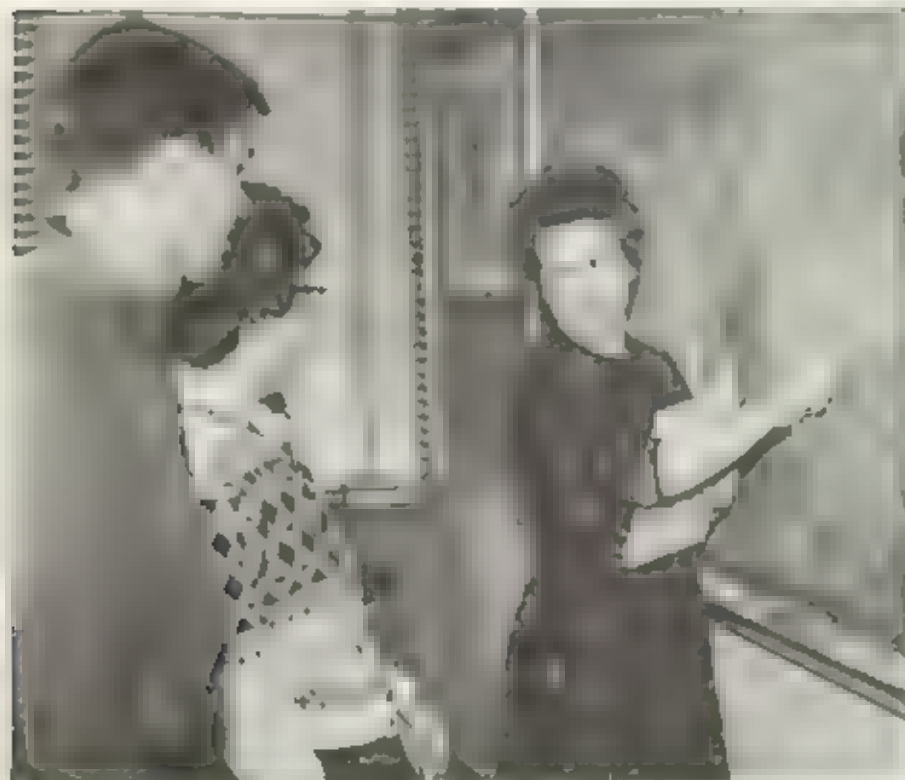

Joann Karnatz

Alan Odner

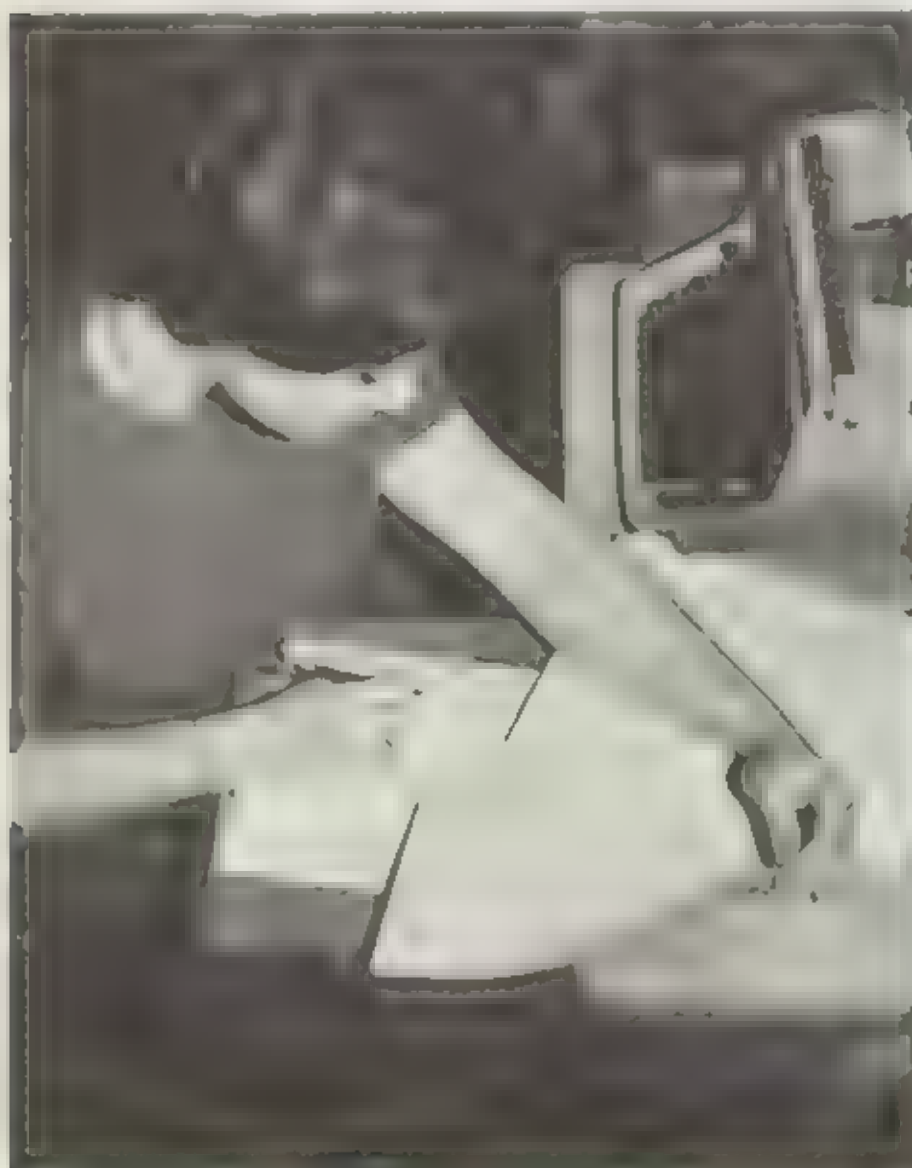

# Efficiency taught in rapid reading, notehand

While some notehand writing is picked up easily, some curves and lines seem quite difficult. Discussing the notehand reading from a study with a sample, Mrs. Green, shows the distinct difference to Mike Winburn and Chris Ryan.

Placing up the words for fast by the notehand, the type writer, C. J. Kutzmann rechecks the legibility of her notes on the history of the blind.

In response to the mounting demand for skillful reading and better study habits in college, Seaholm offers notehand and reading improvement to encourage efficiency on the part of students.

Meeting either twice a week or on Saturday mornings rapid reading is not taken for credit. By "loosening up" the eyes, keeping questions in mind, spotting topic headings, reading short articles in a workbook, and taking tests to determine how much is understood, students find that by the end of the semester their reading rate is usually doubled and their vocabulary and comprehension much improved. Their ability to retain information, to concentrate, and to organize their studies increases, as does their interest in both assigned and pleasure reading.

Notehand, a new half credit course, teaches the college bound student a simplified shorthand. Approximately one hundred symbols are introduced as shortcuts for the alphabet and common words. Classes hear recordings, outline readings and lectures, and take effective notes. Methods of doing research work and other study skills are evaluated and perfected.

Working on the new notehand in rapid reading, Mrs. Woolson, Jon Miller and Betsy Duncan compare their progress in rates and comprehension.

# Sophomores oriented

Sophomores facing the immensity of Seaholm are oriented to the school by a program conducted through the English classes. Using the *Maple Tartan*, the student handbook, for a textbook, new members of the student body spend several weeks learning the layout of the halls and library, the school songs, the homerooms and advisors of their class. Guaranteeing that they will use the library facilities to advantage, students are required to become familiar with the Dewey decimal system and contents of important research books. In addition, as part of orientation, organizations, drives and traditions are described to acquaint the student with the atmosphere and spirit of school life.

Moving from the literature of the world and wide selections of outside reading introduced to the oriented sophomore, the junior and senior student enters "survey" courses of American and English literature. American literature is studied intensively from the colonial to the modern day. Diaries of early historical figures, short stories and poems from the "Golden Era of American Literature," the dramatic productions of more recent times (such as Thornton Wilder's *Our Town*), and modern novels are covered in thoroughly but yet different manners by various instructors.

The entire field of English literature is dealt with in senior English from the time of the Anglo Saxon epic poems to the twentieth-century plays of Shaw.

After several themes have been returned to her sophomore English class, Mrs. Boaz takes time to review each student's consistent mistakes and to point out his progress.

Dorothy Allen

Colleen Labbi

Shirley Everett

Betty Kinnison

David Meneghel

Marsha Buchanan

Because a sound vocabulary is prerequisite to literary understanding, Lu Thun plans to spend most of this class period looking up new words in the dictionary being handed him by John Mouw.

Handling a fragile skeleton, Ludolf Thun satisfies his curiosity about the vertebrates, the groups of animals with backbones.

Amazed to find that all organisms, both plants and animals, are much alike in certain basic ways, Diane Bradburn, Barb Brenton, Mary Keyser, John Miller, and Bob Buck discuss their new exploration of the way biologists have used the differences in living things to sort them into a few main groups.

# View live organisms

Collecting, viewing, classifying, or dissecting living organisms, Seaholm's young biologists examine plant and animal life in the simplest and most complex forms. Since numerous colleges require at least one year of a laboratory science, it is not uncommon for a college-bound junior like Ludolf Thun to include biology in his schedule.

Either the capturing and pinning of insects or the collection and identification of leaves, followed by biological classification into kingdom, phylum, class, order, family, genus and species, starts the year. Several units of work involve microscopic investigation of bacteria and cells, probing of crayfish, worms and frogs, and surveys of the digestive, nervous and circulatory systems. The course introduces the science of life, in which old concepts are continually being modified.

Gary Kuchule

John Hackett

James Bedon

Within the simplest plant phylum, Thallophyta, are the one-celled plants, threads of cells, and flat plates of cells. Ludolf Thun, Harry Ellman, and Nina Erwin scoop up algae, thallophytes with chlorophyll, to compare the simple tissues and organs with those of a fern.

# Encourage analysis of international relations

Scrutinizing such booklets on foreign relations as *Africa and the World Today*, *Southeast Asia and American Policy*, *Chinese Dilemma* and *America's Stake in Western Europe*, international relations students learn what experts propose and crystallize their own opinions on U.S. foreign policy goals. "Apartheid," "revolution of rising expectations," and "self-determination" become practical, operative terms.

Through detailed inspection of maps and penetrating class debates, some insight into the magnitude of the self-imposed American assignment as leader of the non-Communist world is gained. Three notebooks, each containing a six-week accumulation of clippings, commentaries, and analyses of outside reading on a particular area of the world, encourage awareness of the pace and scope of the revolutionary changes in foreign affairs.

Recognizing the immense need for knowledge of current world situations, Jerry Mason, among many of his curious classmates, chooses to take I.R., one of the three elective social studies courses offered to seniors.

When *The Christian Science Monitor* arrives, international relations subscribers, Tom Welch, Jerry Mason, Pam Gilbert,

Pointing out to Jerry Mason a fallacy in his evaluation of a news report, Mr. Miller suggests additional outside reading from *Saturday Review*.

Hugh Lucas and Candy Kelsey, locate and clip articles upon which to comment in their notebooks.

George Miller

# Algebra students proceed from known facts

Proceeding from the known and familiar to the new and unexplored, Algebra I pupils grapple with polynomials, signed numbers, exponents, radicals, quadratic equations, and graphs. For some, elementary algebra is their last mathematics course. For others, including sophomore Melody Murphy, it is groundwork for a sequence of courses often leading to mathematical or scientific specialization.

Algebra II classes continue to probe the relations and values of numbers represented by letters. A considerable group of college-bound juniors and seniors like Jerry Mason comprise the class members attempting to grasp complex word problems, permutations, combinations, probability and simultaneous equations.

The laws of exponents are applied to the more difficult polynomial factoring and addition. Mr. Gabel explains the proper combining of terms to Jerry Mason and Todd Applegate.

Dave Martin, Bill Marsh, Melody Murphy, and Sue Adams wait to be told that the first step in factoring a polynomial is to factorize and select the greatest common factor.

Clarence Gabel

Hugh Graham

Donald Laatsch

# Organize old, build new geometric concepts

Teaching students to combine correctly the ideas of size and shape which they have accumulated, Seaholm's geometry course directs its pupils to organize the old ideas, discover new concepts and build a complete and logical system of thought. The new geometric ideas and accurate comprehension of size and shape are valuable not only to those planning careers in engineering, drafting, architecture or astronomy, but to any who consider the development of a logical thought process important.

Attention is first given to expressing such key words as projection, ray, axis of symmetry, median, corollary, identity and hypothesis, by defining them in simpler terms. The first thirty axioms and postulates dealing with points, lines and geometric figures become familiar, workable tools. Exercises to evaluate the nature of deductive proof involve the use of assumptions, the meaning of logical sequence and the requirements of sufficient and necessary conditions. From simply bisecting an angle to determining the locus of the centroids of triangles with a given base and given vertex angle, geometric constructions are performed using compasses and straightedge as the only instruments. The informal, continual study of forms in art, nature, and industry becomes an analysis of the branch of mathematics investigating and measuring lines and angles.

With a given vertex and a given side, it is possible to construct an angle equal to a given angle. Gretchen Van Sickle is reminded by Mr. Gabel that her completed construction will not be perfect, since her hands and eyes will make small errors. She will then determine the limitations of the construction and its special cases.

In proving a theorem by the exclusion method, the conclusion is stated and other possibilities are eliminated. Laura Redmond, Bob Serstadt and Karyl Chinnick are led by a clear representation of a polygon with exterior angles extended, plan to prove that the sum of the angles is two straight angles. Their second chart will illustrate the reasoning behind proving lines parallel when the corresponding angles are equal.

John Kish

Rosemary Harmon

# Seaholmites study Spanish sounds, syntax

Whether engaged in grasping the idiomatic translation of Spanish comic books or comprehending the more literary, short works of famous authors, students delve into the mechanics and sounds of the chief language of Spain and of the countries colonized by the Spaniards. This year, for the first time at Seaholm, a fourth year of Spanish has been added to the language curriculum.

Varied drills and exercises, affording ample chances for written and spoken practice and cumulative review, are based on the readings pertaining to Spanish geography, history and customs. Frequent sessions in the language laboratory test proficiency in conjugating verbs or transforming nouns to pronouns of the proper gender and number. Endeavors to develop the colorful Spanish accent are encouraged and promoted by the opportunity to practice careful pronunciation in the isolated booths.

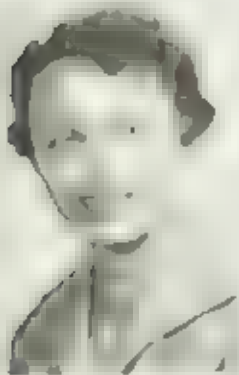

As well as being exposed to short fictional tales narrated by their instructor and informative sketches about Spanish life, students formulate and present their own conceptions of correct Spanish conversations. The newest methods of language education place increased importance upon these oral aspects.

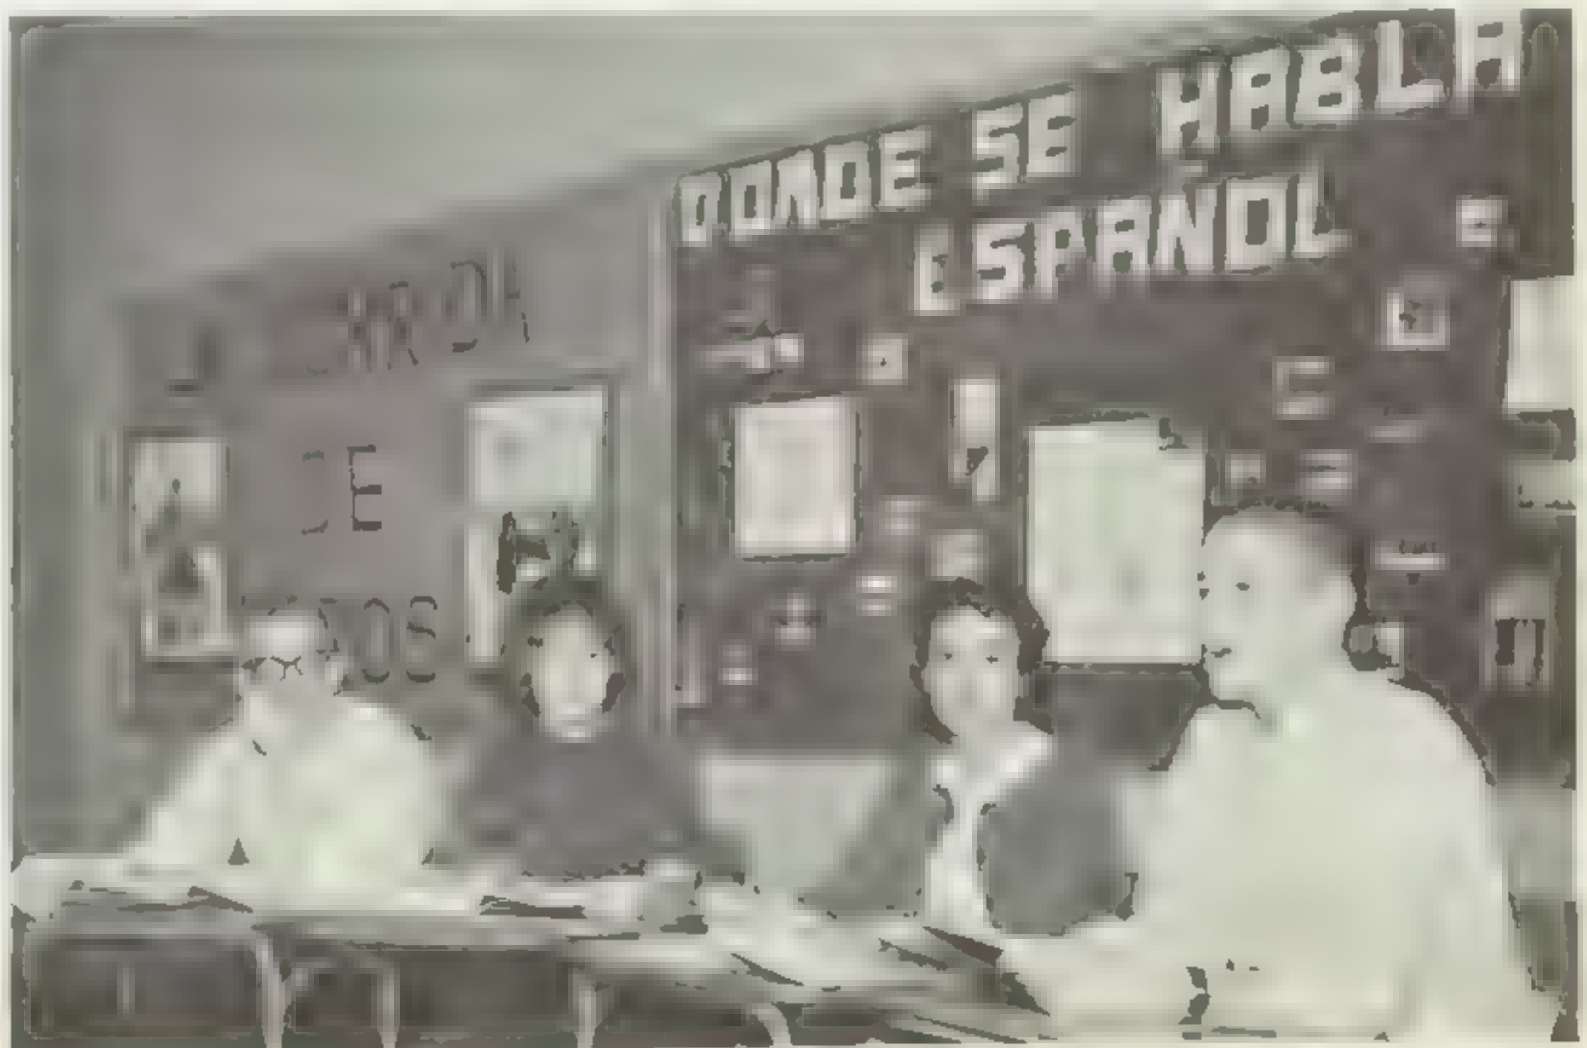

Characterizing a Spanish señorita and señor, Carol Wiggins and John Hoagland outline their ideas — examine their authentic costumes before presenting their skit for the enjoyment of and evaluation by their Spanish II class.

Hugh Lucas, Pam Terry, Sandra Schnetzky and Bruce Buchanan discover that in the extensive research necessary to prepare an informative panel discussion they supplement their own understanding of the Spanish countries, people and language.

Celia Ramon

William Stiles

Reading from their original radio script, Larry Weir and Chuck Erick practice their roles as Victor Kiggins wants one one.

# Practice brings poise

Learning to communicate effectively with others is an essential process, and Seaholm's speech department attempts to cover all areas of this communication. Through a general speech course, which teaches students the basic gestures and expressions to use in a variety of situations, the student gains poise and self confidence. Sophomore Melody Murphy elected this class because she feels its value will last through her high school and college years. Birmingham educators agree, and, beginning with the class of 1966, all students will be required to take one semester of speech to graduate.

Contest speech is offered to those who wish to explore the finer points of oratory. Members of this class often enter the state forensic contests as a part of the course.

Radio speech is another phase of this department. Production of radio plays and writing of commercials and skits are required of students in this course. Learning distinct enunciation and pronunciation for microphone work and creating sound effects enables students to understand the problems behind the scenes in a radio studio.

Selected students who want to learn more about acting may take Dramatics for two semesters.

Speech classes teach not only good speaking habits; they also teach good listening conduct. While Pat Zimmerman gives an extemporaneous speech, Melody

Murphy, front right, and her fellow classmates listen for good speech pointers that they could use later themselves.

Shirley Bigelow

Henrietta Cortright

# Finish second in new EML debate league

Starting a new season with only two returning debaters, the Seaholm squad felt the loss of its two star members who graduated last year, but none-the-less started work on the topic for the year which was "Resolved. That the federal government should equalize educational opportunities by means of grants to the states for public elementary and secondary education."

Working hard to overcome the handicap of inexperience, the team, coached by Mr. Thumser, placed second in the newly formed Eastern Michigan League and fifth with 12 wins and 12 losses in the Detroit Metropolitan League.

Discussing a possible point of resolution this year's class to be Linda Kerey answers a question presented by Kevin Smith. Mr. Thumser and other members of the squad listen attentively. The squad includes Linda Kerey, Nancy Putz, Jim Fournier, Mary Squibb, Chuck Sutherland, Valerie Kotwin, Greg Fournier, Frank Gonyea, Bruce Cronander, Mary Long, Ben Root, and Tom Roach.

Debating is not always the serious work so many students think it is. At times, as in the case of Linda Kerey, it can be a fun game. Linda Kerey, here, plays the role of the negative case, while Kevin Smith plays the role of the affirmative case.

# Precise writing featured in English class

After seeing a movie on humanities, seniors Barb Kirkbride and Mike Geer compare themes on the topic, "The life which is examined is not worth living."

To make studying essays more enjoyable, Mrs. Kinnison reads Joyce Morris (at right) and her English class Emerson's "Self-Reliance."

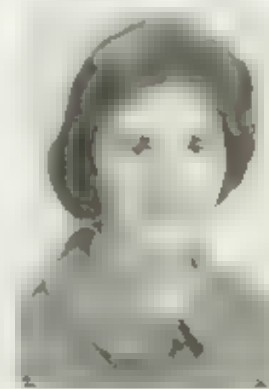

Directed toward filling positions in the business world, Barbara Kirkbride and Joyce Morris discover the value of expressing their ideas precisely. Acquiring a powerful vocabulary, command of grammar, sentence structure, paragraphing and word usage, they focus their attention on forms of writing used in many businesses.

In the sophomore year oral recitations and class discussions spring from the reading of George Eliot's *Silas Marner*, Sir Walter Scott's *Ivanhoe* and Samuel Coleridge's "Rime of the Ancient Mariner." Short themes describe familiar people and surroundings, contrast literary characters, review essays, comment on authors' styles and writings. A point system is employed by which supplementary reading from a suggested list is evaluated and graded.

Juniors scrutinize both form and content of selected literature, including the novel, short story, essay, poem and play. *The Scarlet Letter* and *Giants in the Earth* become the students' companions. Subjective and objective theme topics are approached in clear, organized writing.

Designed to meet the demands of the terminal high school student, the senior English modern literature and practical writing class can also be accepted for college credit. A variety of essays by famous twentieth century authors is read. Narrative, descriptive, argumentative and expository themes are defined and practiced. In addition letters of all types, reports, summaries and reviews are discussed and written.

# Practical shop physics presents principles

Rather than emphasizing scientific background, shop physics introduces useful ideas and principles. Although not an auto shop student, Clayton Dashell utilizes some of the practical laws of physics for his work in the print shop, where he spends two hours each afternoon.

Of most relevance to shop work is the unit on the six simple machines—the level, the pulley, the wheel and axle, the inclined plane, the screw, and the wedge. Whether defining such terms as static, capacitor, ampere, and mechanical advantage or calculating the resultant of two forces, the students are exposed to the basic language of physics and the significant mathematical relationships. To facilitate problem solving, line drawings are made and labeled, diagrams graphed and experiments executed thoughtfully.

Rosa Schingrout

Clayton Dashell uses the principles of physics to explain why a car's wheels slip on a wet road. Clayton Dashell clarifies the definition of input and output for Tim Kling.

Clayton Dashell uses the principles of physics to explain why a car's wheels slip on a wet road. Clayton Dashell clarifies the definition of input and output for Tim Kling.

# Physical science scans changes, properties

Before using the funnel tube in the experiment to reduce cupric oxide to metallic copper, Doug Roberts assembles his apparatus and Wanda Harter folds her filter paper carefully.

The brilliant white light which is produced when magnesium burns makes it useful for flares and fireworks. While Bill Bramblett, Dave Hyde and Sue Welch watch, Paul La Motte heats a magnesium strip to its kindling point.

Designed for eleventh and twelfth graders not wishing to major in scientific fields, physical science scans physics and chemistry for one semester each. This survey of materials, their composition, properties, and changes is not as intensive as separate courses in the areas, but nevertheless, promotes recognition and appreciation of the fundamental physical relationships and order in nature.

One long-range project illustrative of a particular law or theory is required of each student. It must be accompanied by an oral and written report describing how it was made, and how and why it functions.

Chemical subjects touched upon in class include oxidation, solution, crystallization, ionization, and distillation. Since a great deal of mathematics is needed for the half year of physics, instructions in the slide rule are welcomed. Instead of dealing with living things, their structure, and processes, as they did in biology, students read, fill notebooks, and demonstrate theories and laws of matter and motion. Laboratory experiments prove or disprove assumptions, make identifications, change compositions, and familiarize the student with the properties and behavior of materials.

In physical science laboratory, Marilyn Merker, Sue Welch, Mary Jane Purdy, Mary Richardson, Jeanette Rucinski and Margaret Croteau select the proper equipment from the drawers, tie the huge aprons, and start the experiment without much confusion.

# History follows conflicts, progress of world

Time lines, progress charts, and maps of development begin to close the gap between history and current events for all Seaholm sophomores enrolled in world history courses. Tenth graders like Clayton Dashiell, whose daily schedule steers him to shop physics and print shop, follow the Egyptians, the ancient Greeks and Romans, the feudalism and serfdom of the Middle Ages, and the spirit of the Renaissance and Reformation. They trace the conflicts of the world from independence struggles to the world wars. Additionally, they earn a sympathetic understanding of other peoples' environment, national inheritance, resources, ambitions, and achievements.

Juniors, required to study American history, watch the whole span of the nation's development. The settlement and expansion of the land, the growth of the government, and the struggles of the people and territories are related to the present. Historical events are humanized with stories of the Presidents and other great men. The trends these incidents forecast and their relevance to daily newspaper headlines become apparent.

Each era of America's past explored in U.S. History is discussed in terms of geographic influences affecting the nation's development. Joyce Morris finds that important events involving geography are easily understood by tracing them both on the maps scattered through the text and on the large, detailed map.

Sharl O'Connor, Clayton Dashiell, and Clark Hubbard admire the handwork of a model similar to the Phoenician trading ships which carried and traded the products of all peoples in the ancient known world. These first great international traders are read about in the unit of tenth grade world history concerning the civilization of the Fertile Crescent.

## Social origins traced

In a comparatively informal and candid classroom atmosphere, Seaholm's counseling staff enlightens sociology students to the complexity of personal and social problems. The semester sociology course aims to acquaint seniors with the origin and evolution of society, the institutions and functions of social systems, and the critical problems of individuals and nations. Learning to examine and confront these problems requires reading, conducting research for periodical reports, or hearing records, students examine objectively the pros and cons of different views on occupations, juvenile delinquency, marriage, and social classes.

Leaving decisions to the students' considered opinion, sociology encourages independent thought. Through introduction to the religions of the world and to a few fundamentals of psychology and philosophy, outlooks widen and deepen.

Dick Schwartze, member of Mr. Grothe's sociology class, hopes to raise a dollar for one of the 1,000 cans of cashew butter crunch on sale. The profit will support a Hong Kong orphan.

As Mr. Grothe relates a case history to help his fifth hour class select interesting topics for their periodicals, his story meets with intent expressions of skepticism and amusement.

Required reading in sociology is *Religions of Man*. Presenting a panel based on more extensive research about the Islam religion, Cindy McHugh, Sally John, Nanci Clute, and Linda Henderson respond to the questions raised by their class.

Donald Grothe

Mildred McKeen

Carol Chalmers

Merrill Miller

# Learn in homemaking

To be a true homemaker entails much more than just pushing buttons and opening cans as the students of Seaholm's homemaking classes quickly learn. The first project in the course on clothing is the making of a basic article, the straight wool skirt. The projects become progressively more difficult throughout the year. The study of foods includes more than just preparation of meals although this is an important aspect of the course. Girls also learn menu planning, shopping and budgeting, and table service.

The semester courses of home planning and child study are more complex than clothing and foods. In home planning, the girls first acquire background in architecture and house plans; then discuss problems of buying or renting a house. They also study interior decoration and landscaping.

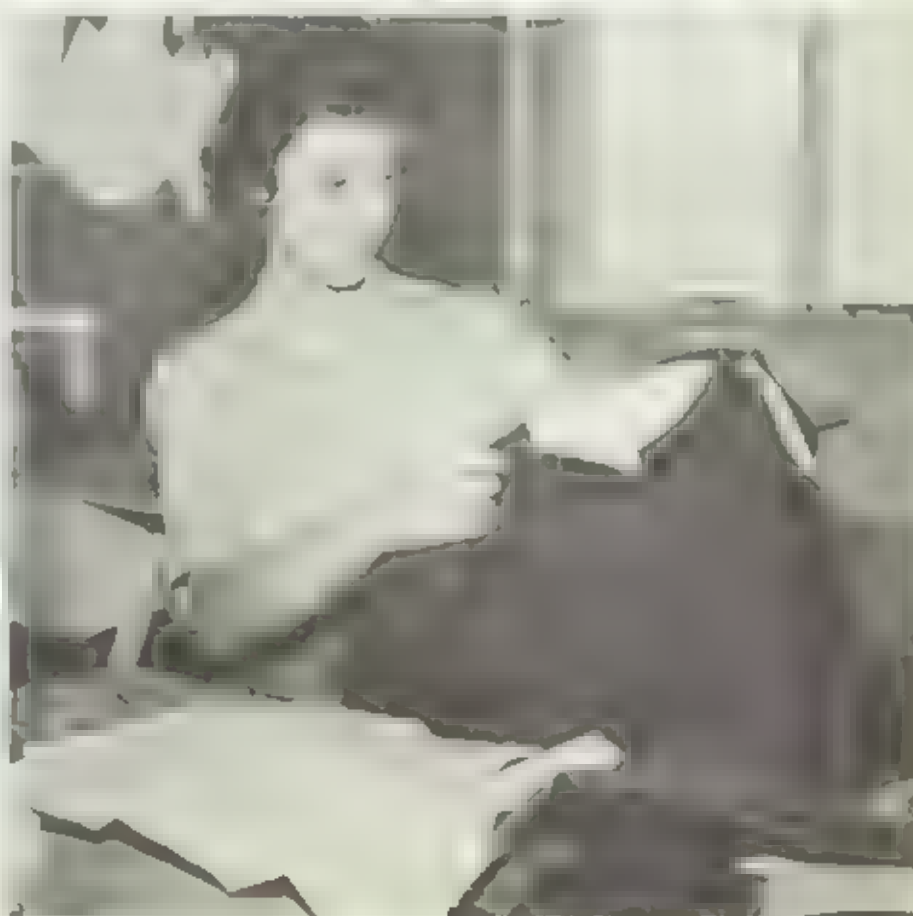

In the course of child study, the girls discuss engagement and marriage. Through the latter, they learn about pre-natal care and development, and go on to study child psychology.

Cathie Wiedenhoft

**TOP**—Learning to measure the ingredients carefully is an important lesson in the study of food preparation. Val Derrack and Gail Schmidt show that they have learned it well as they measure the cron tons they have cut. **MIDDLE**—Another essential part of cooking—learning the proper use of tools—is demonstrated by Pat Bingham and Arlene Bunyan. **BOTTOM**—One of the more difficult projects in Sewing II, making a dress, is Mary Sylvester's task.

Managing three and four year olds is a trying but rewarding job Joann Ross learns.

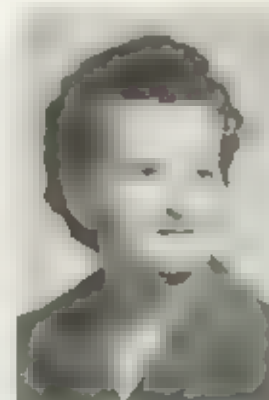

# Retailing cooperative program is thorough

Bill McKay leads his commercial law class in its discussion of the legal aspects of operating a business. The bulletin board in the background contrasts a draft, a check, and a promissory note, forms of monetary exchange used in business.

Experienced in the art of salesmanship, Barb Kirkbride demonstrates a few valuable techniques to Vivian Benedetti at the commercial department's practice sales counter.

One aspect of working for a store is maintaining interesting window displays to attract customers. Barb Kirkbride and Sandra Vincent make an arrangement suitable for an interior decorator's shop while Don Counsell and Les Crabh offer their opinions.

Attending a national retailing conference at Ann Arbor in April, this year's cooperative retailing students gain extensive training from their complete, comprehensive study directed toward full time employment. In the classroom and in the supervised job experiences, they improve their aptitudes and abilities.

Hoping to continue retailing work at Delta College next year, Barbara Kirkbride is among Seaborn's retailers. One social activity of the class involves planning, in a few spare hours, a dinner for their bosse.

Operated in much the same manner as the retailing cooperative program is one for the commercial major who wishes part time employment. Mrs. Marks supervises both programs which have been part of the Birmingham educational program for 22 years. At present about 75 students are enrolled in the sequence.

# Retail store work provides valuable training

Sharon, 19, is a cashier in a retail store. She says she always justifies the work as a way to learn about the business and to gain experience. She says she has learned a lot about customer service and sales from her work.

Many retail workers are developing habits and skills that will help them in their future careers. They are learning how to work with customers, how to handle money, and how to make decisions.

# Commercial classes begin publishing paper

In second year typing, efforts are concentrated on speedy typing of business problems. Continually improving her technique, Joyce Morris receives a completed application form.

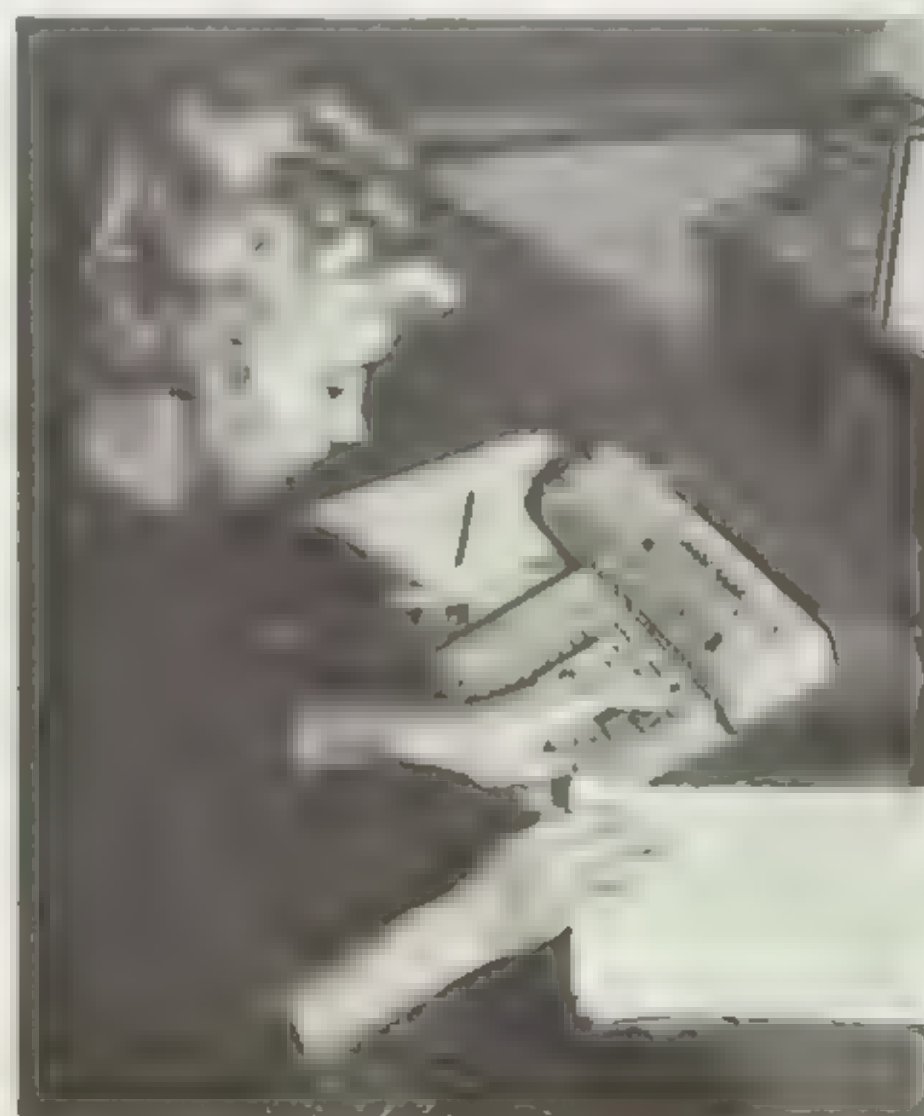

Beginning lengthy addition and division problems, Valerie Scott, Linda Vinton, Bud Lehman, and Mary Jane Roberts patiently perfect their operation of office machines.

Becoming familiar with the maintenance and functions of office equipment, commercial students spend two weeks learning the parts and uses of each machine. The ten-key and full-key adding machines, the dictaphone, the comptometer, the calculator, and the IBM typewriter are handled. Work is done in addition, subtraction, multiplication, division and reciprocals. One new activity this year is the publishing of a class paper, using the duplicating machine. The semester editor and each student have opportunities to write editorials, illustrate jokes, conduct school and office interviews, and compose titles in art type.

Personal and business letters, term papers, and lecture notes are produced in good form in the four semesters of typing offered to business students. Essential for any area of clerical work, typing teaches the forms for bibliographies, columns, contracts, reports, and applications. Personal typing, primarily for college preparatory students, affords chances to figure quickly and accurately, centering processes and proper spacing techniques, as well as efficient methods and correct occasions to utilize the typewriter's various extra keys and operating parts.

Close attention to details is essential for proper use of the IBM machine. Operating the slide, tab stop, level, and upper and lower dials, Gloria Jones labors over each instruction.

# Shorthand, bookkeeping build business skill

Making legible shorthand notes and subsequently transcribing them is the aim of the first year shorthand writers. Building speed in dictation on five minute transcripts occupies the time of second year commercial students heading for secretarial careers. Learning thoroughly, classes devote time to the theory of shorthand and developing skill in reading as well as writing it. Whether listening to letters and records or jotting down notes from text books, students find practical, immediate uses for their newly developed skill.

Seaholm's one year bookkeeping course is conducted in the double-entry system permitting a total business cycle to be presented. A set of books is opened, kept daily, and closed at the end of the fiscal period. Actual profit and loss statements and a balance sheet are followed. The meaning of depreciation, bad debts, interest, partnerships, and payroll deductions is clarified. Providing eligibility for many business positions, bookkeeping is a prerequisite to accounting jobs.

As a junior, Joyce Morris handles shorthand, bookkeeping, and typing. Gaining much technical knowledge now, she hopes to go on to junior college.

Concentrating on translating words rapidly and forming the intricate symbols of shorthand, Mary Bowles, Virginia Biesinger, and Kovac record Mr. Steinhart's dictation. As private and office secretaries, they will have need of their ability to write substitute characters for letters and words.

People skilled in keeping accounts often meet the requirements and become certified public accountants. In preparation for this and other business careers, commercial students include bookkeeping in their schedule. Finished figuring one transaction, Joyce Morris organizes a balance sheet.

Ler Bostwick

Earl Steinhart

Gladys H. Howay

# Auto mechanics learn about repair of cars

In addition to a fine academic program, Seaholm is equipped with one of the best auto mechanics shops in the area. Under the instruction of Mr. Mott, boys learn how cars work and are given practical experience in repairing them. Teachers, staff members and the boys themselves leave their autos for minor repairs, grease jobs and oil changes.

Besides learning about and working on automobiles, the boys take a semester course in shop math and another in basic physics. Textbooks, pamphlets, visual aids and full size models of car chassi and engines help the boys in their study. These aids are provided by car manufacturers.

Boys in auto shop devote the last half of the day to the class, spending the time either in lectures or working on their cars. At least one boy this year is finishing a complete overhaul of his car, rebuilding the engine, redoing the inside and making the car as good as new.

Bob Hendrickson uses a grease gun to complete his job of lubricating an automobile, one of the many services in Seaholm's auto shop.

Gerald Gibson, Douglas Jones, Tim Stephens, James Nunnelley, Alan Talbot and Dennis Bobby listen to Mr. Mott, auto mechanics instructor, as he explains the workings of an automobile engine with the help of a working model.

# Instruct safe drivers

To accomplish the purpose of sending safe, careful drivers out onto our highways, the driver education classes teach the mechanics of driving a car while instructing the student in the rules and regulations of Michigan driving. Students drive once a week graduating rapidly from the parking lot to uptown driving. Experience is gained in both automatic and stick-shift type cars. Six hours of behind-the-wheel instruction is required in addition to the thirty hours of classroom lectures in which the material covered ranges from how an engine operates to the common courtesies of the road.

Much serious consideration has been given lately to the thought of eliminating driver training from the regular high school schedule in favor of a plan offering it in elective after school, on Saturdays, and during the summers. This would enable the student to take another semester course while in school. The proposal would necessitate the construction of a driving range to the east of the school and the installation of radio equipped automobiles for student use at a cost of about \$75,000.

Getting behind the wheel for the first time can be a thrill, as John Whitehouse's smile suggests, but to the instructor Mr. Trayer, it's a time to point out that it pays to be careful.

As complicated as they may seem, nevertheless the inner workings of the automobile must be pointed out to student drivers. Connie Woolson and Sue Lockhart are being shown the location and workings of the carburetor by Mr. Tassio.

Lectures about everything connected with driving—in this case Mr. Tassio explains the makings of tires—occupy the class hours required of each student in the driver education program.

Robert Williams

Gordon Trayer

Maynard Mott

Sam Tassio

Kermit Ambrose

# Shop classes

With Mr. Meier helps another student in the background, Al Johnson, Sweet Creek and Fred East, are in shop class. The mechanical drawing is a very difficult and precise drawing, and the students are learning the knowledge of mechanical drawing and the use of the drawing table.

Classroom 3-A is a large room with a large window. The students are working on a project, and the teacher is helping them. The room is filled with various tools and materials.

At the end of the day, the students are working on a project. The teacher is helping them, and the students are looking at the project. The room is filled with various tools and materials.

# provide students with opportunities to learn

Thousands of dollars of equipment, the services of four instructors, the utilization of half the C wing for room space. These are some of the physical factors which make up Seaholm's industrial-vocational shop program which, when added to the rest of the school's educational program, provides Seaholmites with a well rounded education. A wide variety of course offerings are available.

Practical training for the future is offered to boys in the wood and metal shops where individual projects give students a chance to work with their hands as ambitiously as they wish. Work in the school print shop not only introduces students to a trade, but instills a spirit of achievement as student printers produce many of the forms used in school, part of the school newspaper and small printing jobs for their friends and families. Mechanical drawing classes either prepare students for a drafting or architectural career.

Joseph Duris

William Sloat

John Lanman

Bill Bronang cuts a slot in a paper punch with a saw cutter on the milling machine. The liquid dripping from the small tube is a wax and water coolant.

John Cox and Bill Miller assemble the sides of a boat they are building as their semester wood shop project. The boat, built of marine plywood, cost less than \$30.

Smoothing the project and filling in of all nicks and holes must come before the finishing job, that is what Steve Pearce is doing in his class.

As ad manager for the *Highlander*, Sally Bowering is mainly responsible for making the publication profitable. She not only solicits advertising from Birmingham merchants and devises ad make-ups, but also chooses and poses models for picture ads. Here she suggests a stance to Gunilla Wennerberg for photographer Sam Fowler.

# SHS journalists publish

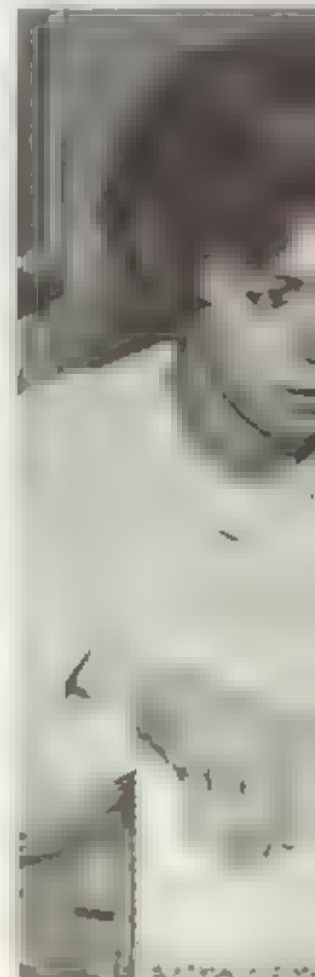

Many different jobs must be done before an issue of the *Highlander* can be sent to the printer and distributed. Writing headlines, correcting copy, selling ads, determining circulation, reporting stories and planning pages form a partial list of all that must be accomplished for each issue. Often, not only staff members help on an edition, but members of Journalism I classes contribute their efforts to meet the deadlines.

Students beginning to study journalism learn the fundamental newswriting methods and are assigned to report on club news and other school activities. Also, first year journalists conduct interviews, review the history of newspapers and their famous editors and prepare an issue of the *Highlander* as a final exam.

Much of their work heads students for staff positions for the next year on one of Seaholm's publications. Those who take Journalism II spend most of their time working on the *Highlander*, *Piper*, *Bairn* or football programs.

No small group of students, however, can hope to do all of the work necessary to publish a bi-monthly newspaper in one class period a day. Hence many volunteers spend hours after school writing and correcting copy, selling ads and doing errands.

Since the headliner is a complicated and expensive machine, not everyone can operate it. Marti Borgman changes the chemicals and dyes and punches out the required headlines for the entire staff. Pam Farlow aids Birmingham's citizens in keeping up with school news by acting as Seaholm's correspondent to the *Birmingham Post-Herald*. In addition to being a page editor, Dona Scott writes

# newspaper by performing many varied duties

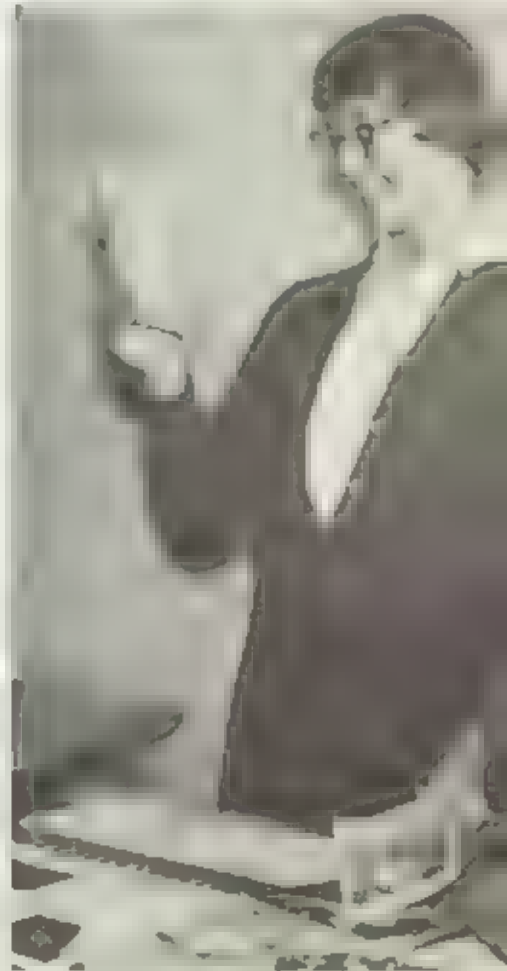

Thomas Harnett

student body. How can we do this? How can we make the  
 student body feel that they are a part of the school? How can we  
 make the student body feel that they are a part of the school? How  
 can we make the student body feel that they are a part of the school?

The first thing we can do is to make the student body feel that they  
 are a part of the school. We can do this by making the student body  
 feel that they are a part of the school. We can do this by making the  
 student body feel that they are a part of the school.

# Productive Piper people plan, paste, process,

Solving the chief problems confronting the 1962 *Piper*, those dealing with the cover design and color, production schedules, type and paper choice and the use of color printing—are Peg Louie, editor; Mr. Mack Suprunowicz, printer; and Mr. Hammel, adviser, here examining one of the color transparencies.

Giving her staff a briefing in ad salesmanship, Mimi Newton, *Piper* business manager, has distributed ad contracts to Andie Stickel, Jane Beneke, and Al Scott and is showing them a sample ad in the 1961 *Piper*.

Only five members of the *Piper* staff are enrolled in Journalism II. The other twenty-some section editors and workers are drawn from student volunteers and first year journalism students. Staff members work, not only during class, but for long, tedious hours after school. The observer who passes C109 at 5:30 any evening during March, just before the final April first deadline, may see anything from upset coke bottles to rubber cement battles, but, allowing for all the fun, the work, copy-writing, picture-cropping, proof-reading, pasting, and headline-composing, is the *Piper* staff's primary concern.

Even before the first day of school, staff members start planning rough layouts, computing page allotments, and making tentative schedules for picture-taking. Pictures of summer activities and spring graduation and sports from the previous semester are gathered, cropped, and identified. In October homeroom editors are busy scheduling homeroom pictures and inventing copy to describe the doings of the sophomore and junior classes. Ads are constantly being sold. Just before Thanksgiving the circulation drive, lasting for a week and a half, moves into full swing. After Christmas the school work, senior, community, and school life sections take definite shape.

The editor has completed the master plan of opening section and division pages, lending continuity to the book, and begins plans for the summer supplement, this year's addition to the *Piper*. At last all the pieces miraculously fit together and every page has gone to the printer.

Journalism photographer Sam Fowler displays some of his dark room equipment to his apprentice, John Frost. Sam is also responsible for many of the *Highlander* ad pictures and action shots while taking numerous photographs for the *Piper*.

prepare polished pictures, paragraphs, pages

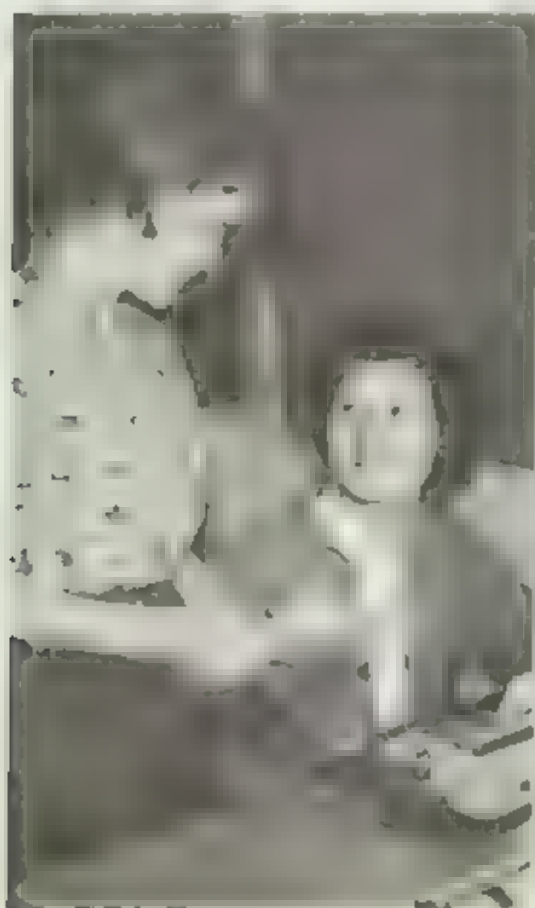

Left to right: Steve Chouin, Greg Forster, Sue Helton, Alice Sue Knepper, Kelli Thompson, Kelli Elise Bishop, Penny Drake, Jani O'Connell, Sue Fortenbaugh, and Virginia Cassin. They work for *Piper* school magazine for long hours after

school each Tuesday and Thursday. Putting out layouts, editing, proof-reading, pasting, and indexing are just some of their numerous responsibilities. Missing staffers include Brenda Drumm, Kris Forster, Mary Randall, and Kitty Schaeffer.

Working diligently to meet their weekly deadlines, *Piper* section editors are seen in various industrious poses. Elaine Bishop and Penny Drake, homeroom editors, discuss the reams of names they

must type while Sue Fortenbaugh and Kelli Bishop proofread the copy and act as secretaries, and Mary Randall school work editor and Sue Knepper work with other staffers.

# Creating gives outlet

Creating one's own outlet about coloring and creating about it from the girls. Mrs. Nichols and Mrs. McManis make the most of their spare time. At home each girl has her own little room and Mrs. Nichols suggests to others to do the same.

There is a lot of money in the hands of all students and many of them are very good at it. Mrs. Nichols is the one who gives to the girls and Mrs. McManis is the one who gives to the girls. They are the ones who give to the girls and Mrs. Nichols is the one who gives to the girls.

Margaret Nichols

Edward Cavallary

## Gifted students encounter cross section of art

Lending a spark of creativity to Seaholm life, art students learn techniques of drawing, painting, crafts, and sculpturing and add interest and originality to the two display cases, one in A wing, the other in E wing, for which they are responsible. To retain a partially academic air, students are also required to do research on the lives of noted artists and write reports on their findings.

This year's additions to the art department include a new kiln and two new potters' wheels. The art room is also equipped to offer a course in weaving, but, because enough students didn't sign up for the course this year, it was maintained as a strictly extra-curricular activity. Weaving will, however, be offered again next year if there is sufficient student interest.

Besides general art, a course which briefly introduces the varieties of creative work, the Seasholm art department offers courses in ceramics, drawing and painting, and crafts. Projects are all industrious and include such inspired creations as collage, a texture study; mosaics (one wall has a construction of paper and cut hair) and mobiles. There has also been discussion of taking a course in art appreciation to the present or future.

Now that's not a bad thing. And this time King is the choice has proven from the fact. So, however is pretty sure that the second vote has now caught away a big chunk of support from the first choice in the election. In today's phases of work, once again.

Using the school building as a model for architectural sketching, drawing students Penny Shannon, Mike Thornton, Cathie Mareneck and Elizabeth Lock scan their subject before starting to draw.

During her free time after school, Candy Kelcey finished up the weaving project begun last year.

# in English madrigals, hymns, popular songs

Sixty-five voices make up the Seabrook choir, directed by Mr. Seebach, who this year replaced Mr. Ulrich, choir director for 23 years. Mr. Ulrich relinquished his position to Mr. Seebach who, until this year, taught at Barnum Junior High School.

Two major concerts are given each year: a Christmas program which is given at the Community House for the Lions Club, Rotary, Hi-Twelve, and Newcomer's Club, and at school for the student body; and a spring concert which is given at the school for the public. This year, besides participating in the Vocal Festival at Ferndale, the choir is presenting concerts for the Birmingham Junior High Schools, in addition to singing for Baccalaureate.

Sixteen junior and senior boys and girls combine to form a group known as the Madrigals. Their name is derived from the Old English Madrigals which they sing. Besides singing in choir concerts, Madrigals present their own spring concert and perform for other high schools in the state.

Mr. Seebach has added two new vocal groups to Seabrook's music department. These are the Pops' Chorale and the Girls' Glee Club. Pops' Chorale is a mixed group that meets once a week after school to sing more popular songs than those of the choir. The Girls' Glee Club is composed of twenty-five girls who meet during school to sing secular music which they perform with the members of the choir.

One of the vocal groups is the Girls' Glee Club. The Pops' Chorale and the Madrigals are shown below. The choir (below) sings a Madrigal and the Songs by the choir (below) such as "Love Thy Neighbor" and "All Hail the Power of Jesus Christ" by Handel. The band and orchestra joined with the choir to present this first of what could be annual productions before a small but appreciative audience.

Under the expert guidance of the ~~band director~~ band director Steve Lutz, Jeanette Rucinski, Sharon Noetz, and drum major Day Meyer, the band is put through its paces during half time shows at each home football game.

# Many school functions

Bright maroon uniforms are donned by the Seaholm band as it marches down the football field, leads the Halloween Parade or gives a concert performance. Besides adding color to home football games, basketball games, pep assemblies, Field Day, and parades with a repertoire of rousing marches, the band performs excellently in the Christmas program, annual spring concert, Variety Show, band assembly, and graduation.

One event which contributes additional hours of practice for band members is the Michigan Band and Orchestra Association District Four competition in which the SHS band usually receives a superior rating.

At the annual Solo and Ensemble Festival solos, duets, trios, quartets, and other combinations of instruments compete and are rated in a manner similar to the band competition. Students receiving a superior rating in the local festival then compete in the district festival, going on to the State festival if a superior rating is gained.

Band members must learn music, practice continually and even take tests which consist of individual performances to determine progress in technique and intonation. In order to obtain these qualities, required sectional meetings for each separate section are held weekly to perfect the interpretation of music.

Focused in her music, Joan Osborn is pictured diligently marching in time to the Seaholm Marching Song, practicing for Friday's half time show. An important factor in the success of the marching band is the sincerity of its members.

Vital to the rhythm of any good marching band is its percussion section. ~~By playing~~ By playing ~~the drum~~ the drum ~~members~~ members ~~a strong~~ a strong ~~beat~~ beat ~~to~~ to ~~the~~ the # sparked by superior music of band, orchestra

The SHS orchestra, a relatively small musical organization, is composed of string instruments plus a piano and the wind and percussion instruments from the band. Directed by Mr. Bartlett, this group has performed in the Christmas assembly for the school, the Christmas and spring concerts with the band, in various community affairs, performances at several elementary schools, and the Spring Michigan Orchestra Festival

Russ Foster, bass violin player in the orchestra, is important to the organization because his instrument completes the range of chords.

Officers of the orchestra: Dave Meier, treasurer; Brenda Drumlin, secretary; Pat Koren, vice president; and Sue Koencke, president, were elected to keep orchestral business affairs in order.

**FRONT ROW**—Cecelia Foersch, William Seipp, Paul Engard, Betty Wilson, Bob Olsson, Jackie Holdsworth  
**ROW 2**—Sue Koencke, Pat Koren, Brenda Drumlin, Dave Meier, Tom Bachir, David Meier, Marilyn Dick, Karalyn Bowditch,

Joan Finmeren, Ann Hric, Walter Lindow

# Seaholm's library increases stock to 12,000

In a storehouse of nearly 12,000 volumes, Seaholm students spend countless hours, both during study halls and after school, poring over reference books, exploring classics, skimming magazines, and selecting novels for supplementary reading. The library staff, working in co-operation with the curriculum committee, strives to fulfill the current demands of teachers and students for suitable literature.

In the past five years 5,000 books have been added to the Seaholm library. Students may now gain insight into United States and world affairs from 125 magazines, including four from other countries. With the new *Encyclopedia Americana*, there are presently sixteen sets of encyclopedias for reference. As well as subscribing to two English newspapers, the library is now receiving reprints of the 1860 *Harpers' Weekly* for those interested in the Civil War days.

Other recent additions include ten world atlases, two much-needed unabridged dictionaries, a fifteen-volume encyclopedia of art, a McGraw-Hill science and technology encyclopedia, and the *Oxford English Dictionary* in thirteen volumes.

Making good use of one of the library's unabridged dictionaries, Bob Hubbard looks up a word to insure correct spelling before turning in the final copy of a theme to his English teacher. The globe, behind which he is standing, is another of the library's student aids and proves invaluable to history students.

In the fiction department there are 1700 books, among them classics, best sellers, short stories, and anthologies. With the assistance of her required reading list, Connie Jacobs has located Hemingway's *A Farewell to Arms* and takes it from the shelf to scan the introduction.

Miss Allen's experience, devotion serve

# class of 1962

With 87% of the junior class participating in the 1960 candy sale and 53% selling more than ten pounds, a junior class of only 425 managed, under Miss Allen's experienced guidance and determination for success, to sell a total of 6,747 pounds of candy, earning money to finance the J Hop and to defray senior dues. Indeed, as head adviser for the class of 1962 she has either advised or been instrumental in each of its activities since sophomore Field Day in 1959.

Besides carrying a full load of after school responsibilities, Miss Allen spends the hours between 8:00 and 5:10 teaching four classes of junior English, leading discussions, grading themes, and correcting tests. Students like Nancy Fortman with individual questions on tests or assignments always take priority on Miss Allen's schedule.

Not satisfied with teaching responsibilities alone, Miss Allen has also organized and advised Assembly Club for 25 years, being ultimately responsible for each assembly presented since 1937. In 1948, as Miss Allen illustrates to Sue Fortenbaugh, there was no candy counter in the cafeteria and the club made profits by selling pencils and candy in the main lobby at Baldwin during the last thirty minutes of lunch period. Then there were weekly assemblies and meetings were conducted informally in one of the members' homes. At Christmas 1961 just as at Christmas 1947 the Assembly Club carried out its perennial tradition of decorating the tree for the Christmas assembly.

Miss Allen graduated from Alma College and received her masters in education from Wayne State University. Since then she has taught English in the Birmingham school system. During her first year in Birmingham she directed the student performance of Oscar Wilde's *The Importance of Being Earnest* and has maintained a constant interest in the theater. She established Assembly club in 1937. The class of 1955, with Miss Allen in her traditional position of head adviser, was the first to sell Sanders candy. Outside of school Miss Allen most enjoys traveling and hiking through such places as Mexico, Cuba, U.S. National Parks and Canada.

# Remember years

A time to keep.

This past year—these last three years that we have spent at Seaholm High School as the class of 1962—they have been ours to keep and remember. The work, the fun, the disappointments, the dreams, the frustrations. The hopes and dreams, the fears, the joys and thrills, along with the achievements and lasting friendships are all a part of our time to keep.

These are not the earth shaking events which have made the national headlines, but individually, all of these incidents will be put in a special place by each of us to be brought out at some future time to remember, to laugh about or perhaps cry over. It is all a part of keeping a time, and time, like the Dominant Seventh Chord, goes on and one is never resolved.

Planning to make the Senior year memorable for all takes lots of time and thought. Senior officers Dorene Nelles, Murray Stewart, and Wendy Coxley were willing to devote countless hours of discussion to their task of leading the class of 1962.

Coxley, Wendy Isherwood, and Dick Beaubien were willing to devote countless hours of discussion to their task of leading the class of 1962.

# Names of Carolyn LeVan,

Each year at Swing-Out a senior boy and girl who "most nearly embody Marc's sterling qualities of citizenship, leadership, and deep interest in student affairs" receives the Marc Joslyn Memorial Award. Their names are added to the panels of Marshall Fredericks' plaque on either side of the knight located in the main lobby. The Memorial is cast in solid German silver, ground and finished entirely by hand.

The recipients are given a watch, inscribed with their name and the date of the award, and a book about Marc.

Marc Joslyn had the rare qualities of leadership, an intensive competitive spirit and a true liking for and sympathetic understanding of people.

His leadership was demonstrated in many ways—Junior Class president, twice Student Congress president, president of the 1952 Washington group, and mayor of Birmingham in Civic Control Day.

Marc, one of the most outstanding athletes in Maple annals, was the football team's "iron man." He was one of the best centers and toughest linebackers Birmingham has ever had. As captain of the 1952 swimming team, he won the first Goldsmith Trophy. To Marc athletics were a challenge and part of his basic philosophy was "What good is life without challenges?"

Marc maintained an above average scholastic record and always took the time to be a friend to everyone.

His is truly "One of the few, the immortal names that were not born to die."

S. ATKINSON

# Mosby Harvey added to Memorial plaque

Carolyn LeVan

Carolyn LeVan, during her three years in high school, exhibited natural leadership, citizenship, and an active interest in student affairs in many ways.

Beginning in her sophomore year, Carolyn led her class as chairman of Field Day. Because of her creativity and originality many inspirations resulted—among them, the clever cheers for her class in its junior and senior Field Day. As a junior she became an AFS finalist and was chosen by her class to be its representative to Girls' State.

In Carolyn's senior year the student body elected her secretary of Student Congress, an office in which she once again proved her capabilities. Carolyn was chosen for Who's Who.

Bubbling over with natural friendliness and enthusiasm, it was only natural that Carolyn should be popular with her teachers as well as students. Her loyalty, thoughtfulness, and concern for others won the friendship of all who knew her.

Mosby Harvey

Mosby Harvey will long be remembered around Seicholm for his genuine friendliness and his many contributions to the school. During his three years in high school Mosby, by his own hard work and effort, accomplished a great amount.

Entering this school as a sophomore, Mosby became popular with students and teachers alike. In his junior year he was inducted into National Honor Society and during the following summer Mosby was an AFS exchange student to Japan. As a senior he was elected president of his class and the student body chose him to receive the *Piper's Who's Who* award.

Mosby was sincere in every way. All who knew Mosby held him in great respect and admiration and everyone was in agreement when he was chosen boy recipient of the class of 1961. Throughout his entire high school career he always displayed leadership.

# Efficient leadership, Bob's outstanding trait

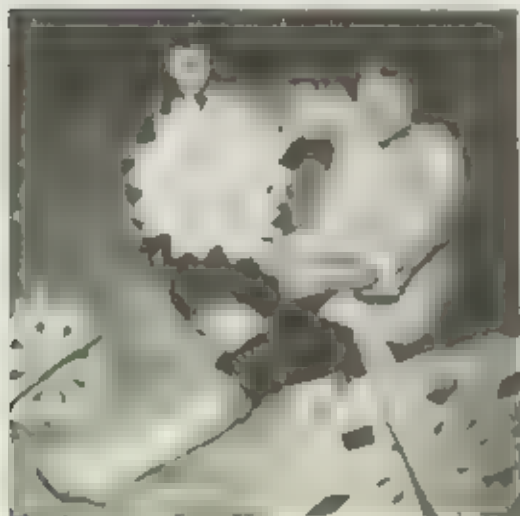

Pacing himself with the class presidency in his sophomore year, Bob Kennedy has been gaining momentum ever since. His phenomenal talent for heading nearly every class and school project and doing it efficiently, intelligently and untiringly has a simple explanation: he just doesn't procrastinate. Bob transmits enthusiasm for any cause he believes in, spirit that makes people want to re-elect him as junior class president, choose him co-captain of the swimming team, elect him president of National Honor Society and, finally, president of Student Congress. Prompted by his sincere interest in others, Bob spent last summer in Germany as an MCC exchange student.

# Sparkle, originality win Patsy Who's Who

If it needs fundamental common sense, if it ought to be done with a new twist, if an infectious twinkle of the eye will help make it popular, Patsy Gordon can do it. When discussion is deadlocked or a problem seems insolvable, Patsy thinks for a minute, then suggests the simple, practical measure or answer that everyone else was looking for, but nobody else could find. Drawing from her quick solutions and ready inspirations, her junior class elected Pat senator and entrusted her with J Hop chairmanship. This year, to acknowledge her exemplifications of a young and sparkling America and her straight *A* record, Seaholm chose Pat to spend a semester of study in Germany on the AFS program.

# "Ginny," laughing at self, works for others

Virginia Griscom is most likely to be found wherever a heated debate is in control, whenever twelve kids all need a ride home from school, anywhere and anytime people are having clean, young, uninhibited fun. Because of her spontaneity, her inclination to laugh at herself, and her easy acceptance of any situation, Ginny immediately makes one want to relax and take his shoes off. Her willingness to tackle any task, her ability to whip any group into shape has led from her sophomore Field Day chairmanship to heading up decorations for 1961 J-Hop, National Honor Society, being elected Miss DAR by her senior class, to the Secretary-Generalship of BUNA, and vice-presidency of Cicerone.

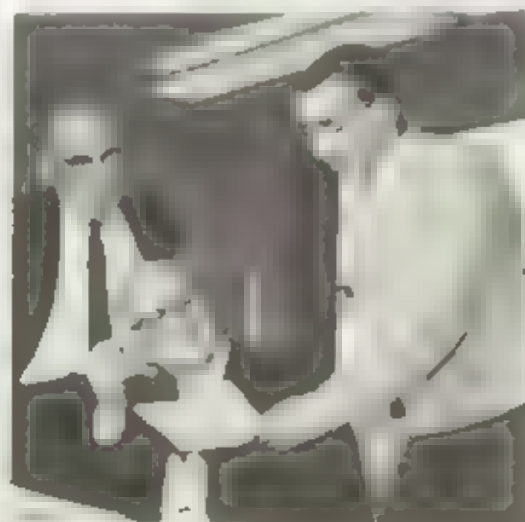

# Who's Who selects class president, Murray

When the day seems unending, algebra is getting impossible and none of the right people are doing any of the right things, Murray Stewart is a welcome sight. Unfailingly, his quick "How are ya?", his teasing wit, his casual finesse make people forget they've fallen out with the world. When he calls a meeting to order, hands resting lightly on the podium, smile knowing and devilish, voice softly, but firmly mastering the situation, no one worries. Because of the confidence he inspires, Murray, besides being president of his class and of Washington Trip, was elected senator in his junior year and cross-country co-captain this year.

# who head their school

We, the senior class of 1962, are proud of our leaders. Although the whole class has worked untiringly on projects such as J-Hop, Field Day and senior activities, always the same exceptional students, the cream of the class, has risen to the top, leading us to success and fulfillment in each effort.

Our leaders have an unfailing quality of composure and self-assurance. They could engineer a Congress meeting, an election or a dance with unruffled demeanor. Through experience and devotion, they could lead us quietly upward to a spectacular victory in our Senior Field Day. Yet our leaders are always willing to jump on the band wagon or the soap box for a worthwhile cause. Their enthusiasm, friendliness and efforts are contagious and quickly involve not only the senior class but the whole school in such important projects as the AFS drive, the Christmas baskets and Student Congress affairs.

But not all of the leadership is done during Congress meetings and assemblies. The true leader can usually be found doing tasks that must be done—calling long lists of people, planning routine meetings, working late in the journalism room or cleaning up on Sunday morning after a dance.

# SHS to start its journey successfully

As muddling, confused sophomores with lingering memories of junior high, we entered Birmingham Seaholm in the fall of 1959. We were the class of 1962—450 strong (we would have been nearly 700 had it not been for the split with Groves.) Quickly we became acquainted with the school and its activities through the orientation unit conducted through the English classes

It was a year of "firsts" for our class—first Field Day, first Christmas basket drive, first AFS campaign, first Swing-Out, not to mention the fact that our class rings were the first to have Birmingham Seaholm imprinted on them

Once settled we elected our class officers, Bob Kennedy, president; Sue Hebblewhite, vice-president; Steve Collister, secretary; Cece Smith, treasurer; Francie Quillian and Dave Hyde, senators, were our choices. With the support of Miss Allen, head adviser, and the other advisers, they led the class successfully. Virginia Griscom was elected Field Day chairman and as the "Small but mighty, young but strong" pioneers, we rolled through Field Day, marking up 37 points.

With spring approaching we witnessed the juniors in the preparation of J-Hop and said to ourselves, "Next year

Rolling down the hill, the Juniors, who had been the Sophomores' victory day to here! As the Sophomores' project was rolled in the class of 1960, rolled our wagon & rolled the way to the top of the hill, the Juniors rolled the Field Day.

As determined Junior Mexicans, we pulled our "bull" almost to the top of the mountain. Disappointed but not discouraged, we took second place in the bull ring the 1960 Field Day.

Unloading candy and asparagus to an assembly line takes hours of these workers. Carter Dierckx, Paul Stenning, David Nelson, Fred Hall and Cliff Dierckx pick their physical fitness by moving hundreds of pounds of sweets.

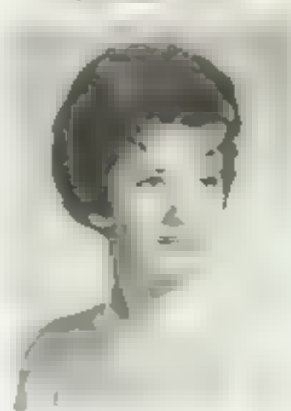

# As Juniors we labored for our school

No longer the youngest, but not yet the oldest, we began our Junior year in the Fall of 1960. Our class officers elected the previous spring were Bob Kennedy, president, Jerry Mason, vice-president, Emily Edwards, secretary, Wendy Isherwood, treasurer, and Patsy Gordon and Murray Stewart, senators. Sue Hebblewhite and Francie Quillian, co-chairman for Field Day, led our fight in the bull ring where we, as Mexican peasants, compiled the almost victorious score of 86.

In late November we became candy salesmen. The money we earned helped to finance our J-Hop and Senior dues. Altogether we sold the weighty amount of about 6,700 pounds of chocolates. Our next undertaking was the Big Party, the class Variety Show.

In April came a week of donuts and coffee, car washes and raffles, bake sales and coke concessions, and tootsie roll pops for the M.S. drive. In May came the timberline of our Junior year, *Palais de Glace*. The glittering snowflakes, the mountain, the ice penguin, the revolving, mirrored globe were only a few of the many things making it one of the best J-Hops ever.

As Senior month approaches, let us joyously welcome the top of the mountain with an ever-whispering melody of joy and hope. Feb. 1965

# as Field Day victory goes to '62 Seniors

By the fall of 1961 we had grown accustomed to the fact that we were Seniors. Our choices for class officers to lead us during our last year were Murray Stewart, president; Duane Nelles, vice-president; Betsy Schmink, secretary; Dick Beau-bian, treasurer; and Wendy Isherwood and Craig Cooley, senators.

We quickly became acquainted with our four ambassadors whom we helped bring to Birmingham on the AFS and MCC programs. Gunilla Wennerberg from Sweden and Peter Hotzl from Austria were the AFS scholars; Rotraud Briesenick and Christoph Hoffman, both from Germany, represented the MCC program in its second year at Seaholm.

Almost immediately we began organizing and preparing for Field Day with our chairman, Peg Lourie. We realized that we had to be better-than-good mountaineers to conquer our mountain and climb to victory. Climb and conquer we did—our score of 103 points left the '63 Pirates and '64 Leprechauns in the crevices of the mountain far below.

After Field Day we tackled our next class project—selling tickets to the all-school Variety Show.

Receiving notification from Mr. Gault that they have placed high in the National Merit Scholarship testing program are Mary Malinson, Joan Brown, Mary McCarthy, Jerry Clark, Jon McKinley, John Linker, Bob Ngoc, Ed McClew and Tim Baehr. These scholars, along with many others throughout the country, will take another test to help decide the recipients of the next scholarships.

# Thoughts of college became vital to us

The time soon came for us to plan seriously for the future. Thoughts of college became of primary concern to most of us, and we began to take stock of ourselves, our abilities, and our interests. Consulting with counselors, parents, and friends, leafing through college catalogs and attending college interviews, we worried whether or not we met the qualifications of our college choice.

After much consideration we obtained, completed and returned our applications. We took home the long and involved Princeton scholarship forms for our parents to fill out. We took college boards and then waited. By the latter part of February, most of us had received word from the colleges about our applications. Some were the recipients of scholarships; some were placed on waiting lists; and still others received letters of acceptance.

Meanwhile, we were as busy as ever with school work and school activities. Term paper time—a time well-known to us—meant campouts at the libraries doing "bib" cards and note cards, and staying up later-than-usual pecking at the typewriter keys. We knew we were in the final stretch and we could not stop now. All signs were green!

# Many activities "special" to each class

Many activities are special to each Senior class of Seaholm and we were no exception. Various committees formed by students and aided by a class adviser met and planned for these events. In October our Senior pictures were taken and by December we were exchanging them with our friends. Announcements for graduation were ordered. Civic Control Day found 29 of us "running" the city government of Birmingham under the leadership of Mayor Tom Stevens. We were measured for our caps and gowns. Our Senior gift, the bandstand purchased for our J-Hop and clocks for two halls, was presented to the school. Recording for the Senior memory record was finished. Swing Out was organized and rehearsals began. Plans for the Senior Dinner, Skip Day, Commencement and Baccalaureate were completed.

In April under the direction of Mr. Hubbard came our Senior Trip, nine wonderful days spent in Washington, Baltimore, New York, and Williamsburg. Mount Vernon, Arlington, Annapolis, the Capitol, the White House, Rockefeller Center, Radio City, Camelot, the boat trip, hotels, buses, and trains represent only a part of this exciting trip.

The three wonderful years have passed so quickly. It is a great feeling to have three years with many memories and great experiences. We will miss you all very much.

# Class of 1962 faces future confidently

Commencement brings the beginning of another phase of our lives. But with commencement comes an ending too. All the work, fun, achievements and frustration which have made our days here are now part of the past. We look forward to the future for whatever it may bring to each of us with anticipation and self confidence, and perhaps just a bit of trepidation.

The many memories which we will take with us may dim as the years go by, but there shall always be a certain place for this particular time in our lives. We have prepared for the demands of the future, and with sincere endeavor we will strive to achieve the worthwhile, but difficult objectives ahead. As we stand together, united for the last time, we reflect on all that has taken place in our three years at Seaholm . . . "our time" . . . and we realize that though each one will go his own way, we will always in our minds and hearts belong to the "Class of 1962" of Seaholm High School.

We have reached the final peak of our high school career, but many more lie ahead to be conquered. "There is much to be done in this world . . . go forth and serve."

Mr. Myers was Marc Joslyn's swimming coach and, as such, knew him intimately, knew that he was a favorite with his teammates, a firm supporter of everything he believed in, and an organizer with an uncanny ability for getting things done. Consequently, when the memorial award dedicated to Marc was presented for the second time, Mr. Myers was asked to give the memorial speech and announce that year's winners. Although the faculty had planned that a different member give the speech each year, Mr. Myers' tribute was so moving that he has been asked to make the presentation every year since.

In February, 1962, he was named by the Birmingham Education Association as teacher of the semester. The award was made by Mr. Wagner, who commended Mr. Myers on his outstanding classroom teaching and his effort to improve and maintain good relations with students and parents.

Whenever he can find time or has the inspiration, Mr. Myers spends time at his desk, writing and rewriting short stories, then sending them to publishers. His current effort is a satire entitled *Adventure on Quail Hollow Road*.

Mr. Myers not only teaches and writes but is a full time family man, seen here with his son Andy, his wife, who taught biology at Seaholm from 1952 to 1959, and his young daughter Sue. His older daughter Sandra attends the University of Michigan.

Mr. Myers named teacher of semester

*Time to Gather*

Graduating from Wayne State University with a master of arts degree, Mr. Myers, with his wry understatement and comprehensive lecture method, has taught United States history and social studies in the Birmingham school system for almost nineteen years. He is perhaps most noted as a swimming coach. Before his retirement in 1960 to allow more time for short story writing, he had coached the Birmingham swimming team for twelve years, achieving eleven EML championships and developing countless young swimmers during this time. Interrupting his teaching career from 1944 to 1946, Mr. Myers served in the Navy, seeing duty in the Pacific.

# Utilize community

Offering a variety of activities, entertainment, relaxation, and recreation our community provides opportunities for the full utilization of the individual's abilities. Churches, teen centers, libraries, and recreation areas help the individual to become a happy, healthy, and intelligent citizen.

Just as the community benefits youth, youth also helps the community. Through service groups, clubs, and youth groups, Seaholm students learn to work together towards helping others.

As future residents of the community the students are eager to learn how their community functions for they will be the leaders of tomorrow. They are gathering a fund of knowledge and experience for their life ahead.

There are times when school functions do not provide sufficient recreation for teens. Then, perhaps, the local theater can give an evening of relaxation as

it will for Dotty Withers, Steve Edwards, Jack Nadel, Adrienne Andrae, Betsy Schmink, Jim Emmett, Carol Wiggins, Cheryl Brokaw and Joe Belmont.

# Board of Education supervises the planning,

Planning a proposal to present to the school board is Dr. Otis M. Dickey, superintendent of schools.

Responsible for the efficient operation of all of the schools in the Birmingham system, the Board of Education has not only met increasing demands, but has also maintained a fine quality of education. With the help of the Hill building administration it keeps schools running smoothly from day to day.

Keeping in pace with the times is a difficult task, but the Birmingham school system is ever changing its curriculum to meet the need. The school board is always striving for improvement. Planning ahead, the board intends to offer a course in Russian next year at the senior high school level. New programs such as this illustrate the efforts made to create and maintain a superior school system.

After much encouragement and work on the part of the school board a millage bond proposal passed last fall. For two months before the special election, the individual members campaigned at local meetings for the adoption of the bond proposal. The bonds provide for an additional five mills to be used for new buildings. A new junior high school and an elementary school plus additions to five present buildings will be built.

Conferring before a board meeting are Mr. Daniel A. Nesbitt, deputy superintendent of Birmingham public schools, and Mr. William Corliss, director of elementary curriculum.

Mr. Lloyd H. Van Buskirk, director of finance, Mr. Kenneth F. Nagley, personnel director, and Mr. Norman A. Wolfe, assistant superintendent, pause for a moment to talk.

# management of Birmingham school system

All major decisions concerning the operation of the school system are made by the school board. It is comprised of seven civic minded citizens working together to improve our schools. Discussing local school problems are Mr. George W. Coombe, trustee; Mr. Bennett W. Root, treasurer; and Mrs. Kathryn Loomis, president.

Asking some questions about the agenda of the school board meeting is Donna Hester, a Seaholm student. She is speaking to Mrs. Mary Beier, trustee, and Mr. Malcolm R. Taylor, vice-president. Helping to answer the question is Mr. E. Ross Hanson, trustee. The remaining board member, Mr. Richard P. Barnard, secretary, was absent on business during the meeting.

# Churches help youth with spiritual guidance

The church helps young people to become well adjusted individuals spiritually and morally. Under its influence teenagers become better citizens and help to make a finer community. One way students show interest in their community, through their church, is by participation in youth groups. Many projects such as making place mats for invalids, singing at old people's homes, and doing volunteer work at certain hospitals show the eagerness of our youth to help and comfort others, not only in Birmingham but in other communities as well.

Hayrides, plays, dances, and sports events sponsored by the church help youth to understand better and live more harmoniously with one another. Fall and spring retreats offer a chance for youth to leave behind the rush of everyday existence and seek to be closer to God and nature. Discussion groups during the retreats give youth an opportunity to try and solve their problems while helping others solve theirs.

Stopping to greet each other before entering Holy Name Church for the Sunday morning service are Dan Fox, Sharon Merritt, Greg Frontier, Tim Bachr, Tom Bachr, Jeanette Racinski, and Sandy Turl.

One youth activity at the Unitarian Church is helping with the trimming and caring for the lawn. Sue Edw., Julie McCain, Emily Edwards, and Melinda McCain work proudly to make their church yard beautiful.

Proving fresh corn and caught fish after a leisurely hike to the Eton Park Water Mill are Brenda Johnson, Pat Kent, John Doherty, Ed R. and Melba Doherty, Anne Apple, Jack Morris and Pat Koren. The mill, run by water power from an old wooden wheel which spectators can watch in operation, produces each day during apple season about 100 gallons of apple sauce. The mill offers.

# Recreation is important

Recreation is an important part in the development of youth for it not only helps them to become happier individuals but also healthier ones. Seaholm High School students find relaxation and enjoyment by working on different hobbies and participating in various activities which our community offers. Whatever the students do, whether playing an energetic game of football or just sipping Coke in the backyard, they make full use of their many community facilities. The Birmingham Recreation Association is now in the process of building tennis courts on both Lincoln and Southfield Roads.

Country clubs in the Birmingham area provide an excellent place for golf, tennis, and swimming in the warm summer months. During the winter the clubs sponsor joint dances for teenage members who may bring non-member guests.

Ice skating at Eton Park and Quarton Lake is another popular sport enjoyed by many. At Eton, besides having open skating, organized hockey leagues and skating lessons are offered.

Even though Pat Morris and Bill Spence were not at the Eton Park Water Mill, they did enjoy their day's recreation in the winter. John Brown and Pat Morris after a close game at Eton Park.

What a beautiful spot for a picnic. Marge Simon and Mike Gier are enjoying the lake as well as a perfect place to relax on a pleasant Saturday afternoon.

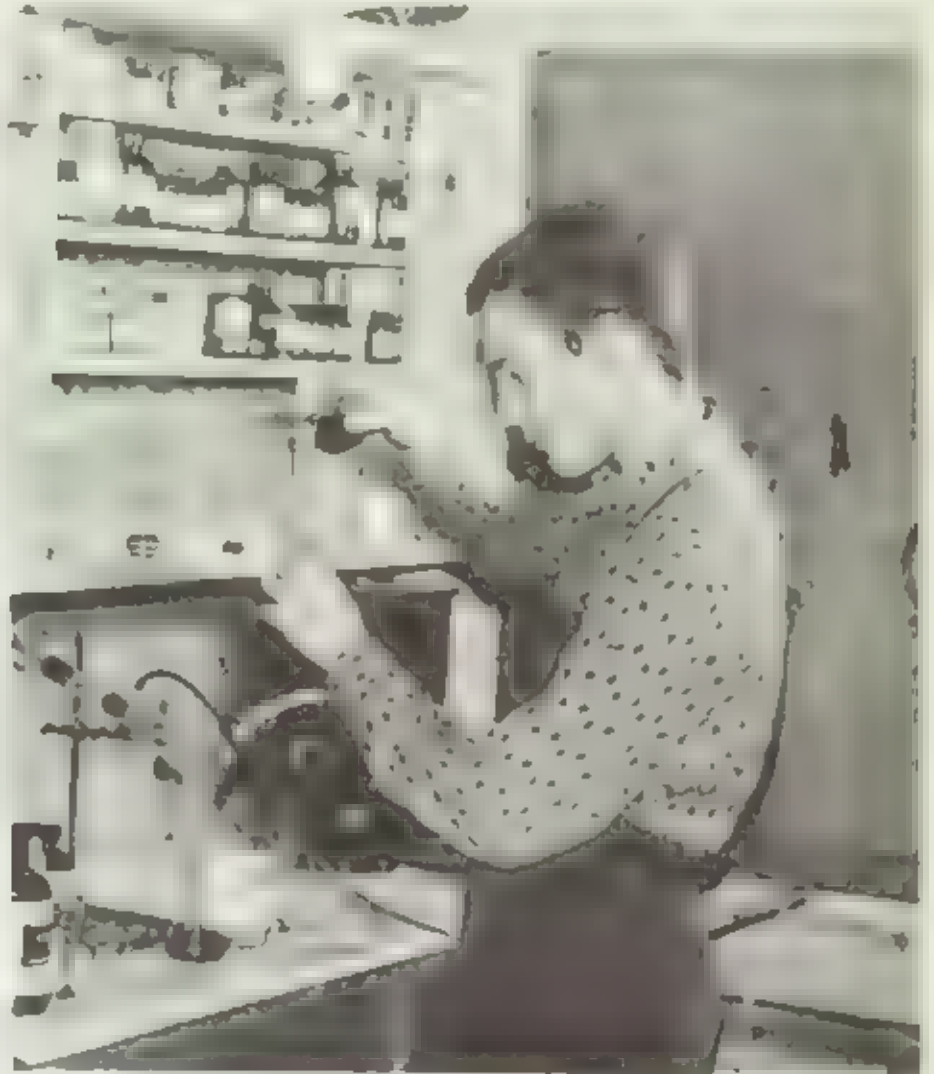

# segment of teenagers' life in local community

Seeding a paper with a Birmingham young man is all fun for many. Several years ago, the writer wrote Joe Stone and Linda Kelley are away for an absence of 100 days, being downed on the side.

The writer's April 1971 photo of a young man, who says he is a member of the Birmingham Youth Center, is a photo of the writer's. The writer's photo of the writer's is a photo of the writer's. The writer's photo of the writer's is a photo of the writer's.

Looking out the window is a pleasant relief from the painstaking work of typing her term paper. Many hours of research work have gone into this paper but it's hard to concentrate when it's nice outside.

Honestly, Candy, if you eat any more chocolate chips there won't be any left to put in the cookies," exclaims Judy Gante to Candy Clemens who finds the chocolate too much of a temptation to resist. Candy McHugh joins the two girls as they jovially experiment in mixing the ingredients for their cookies. They don't need any recipes!

# Almost every desire,

After school and in the evenings, Seaholm students spend much of their time working at home. Most girls have definite responsibilities around the house. Teen age girls can be a great help to their mothers by washing dishes, ironing, and occasionally helping with the cooking. Boys, too, help by doing odd jobs such as taking out the trash and cleaning the garage.

Summer and fall months find many students diligently mowing the lawn or raking the leaves. Then, as they store the rakes and lawn mowers for winter, snow falls and it is time to dig up the snow shovel!

To prepare for the strict competition faced in college and work after graduation the Seaholm student spends many hours a week studying his lessons. He knows that in order to face the problems of the future intelligently and confidently he must work for his education.

Our community offers many opportunities for the student to use his talents at work. The neighboring country clubs give the boy with a keen interest in golf a chance to caddy. Local stores select many of their salesmen from among students and the citizens often hire students to rake and mow their lawns.

Working in a local grocery store after school and on weekends Dave Muier skillfully packs a customer's groceries.

Facing the freezing cold weather of winter, Alan Robertson tackles the strenuous job of snow shoveling for some extra money.

ambition, purpose unfolds in community work

# Community agencies receive youth's help

Working on their projects for Junior Achievement are students from White Center Academy. The basic business of JAG students are Susan Decker, Douglas Buchanan and Ron Black.

Junior Achievement boys Pat White, Paul Black, Tim Black and Bob Fitch work on a project for the school. The boys put this item on wall for a project.

Volunteering help arrives to the Baptist Church. These students pass out food boxes and give them their own money and change for money.

At a Junior Achievement, students are working on a project. The students are working on a project for the school. The students are working on a project for the school.

# SHSers participate in activities with zeal

Seaholm students combine work and play in their lives to make their day more enjoyable and exciting. Whether studying in the library or dancing at a party, they always attack their task with zeal.

Many activities outside of school are undertaken by Birmingham youth. Participation in clubs, community groups and sports helps the students achieve a better, well-rounded, and happier life.

To prepare themselves for the future youths join various civic groups such as Junior Achievement which teaches them fundamental business principles. By putting interest and hard work into this type of endeavor students receive much beneficial knowledge.

For example, City's High School Junior Achievement Committee meeting members sponsored by City and Students are: John Stevens, Terry Holt, Tom Evans, John Johnson and Greg Brown.

Parting on the ways of the community before the dance are Nilla Wennerberg, John Emmett, Kathy Rich and Steve Collister.

Baldwin Public Library contains many helpful books available for student use. Industrious working on their research papers are Tom Gaggie, Steve Beate, Linda Prior and Margaret Kemp.

# Reveal city's character in homes, buildings

Dangling her car keys, Maria Hutchinson holds the door open for the police officer who will administer that long anticipated road test for her driver's license.

From a population of 500 in 1840, Birmingham grew to 3,000 in 1920; quadrupled itself in the next 10 years and has since continued a steady growth. To provide for this steady increase of population, community buildings and services are essential to the prosperity of the city. Along with many other attributes, the beauty of civic buildings helps to make Birmingham one of the finest residential communities in Michigan.

The municipal building, library, school administration building and post office are excellent examples of public buildings constructed to help run the community. All are grouped centrally near the downtown shopping area.

To maintain the present high standards of Birmingham, and to preserve the present character of the city it will be increasingly important to anticipate the needs of a growing community. The civic officials working in the community buildings are constantly striving to make Birmingham a better and more attractive place to live.

Hoping the packages will reach their destination by Christmas, Sue Knopf and Nancy Kinnison hurry into the post office while Betty Schwab helpfully opens the door.

Students are always welcome at the weekly meetings of the school board. Leaving the Hall Building (school administration headquarters) are Beth and Mike Boersma.

Before going on a shopping spree, Pat Bingham withdraws some money from Birmingham Bloomfield Bank. It looks like Wes Grube also needs some money for spending.

# Seaholmers test the ACTION CARS for '62

Lillian Jackson and Jennifer Jackson drive the Valiant out on the green to wait for their dates, Jon Seanor and Charles Hatton, at the North Hills Golf Course. Valiant is the car for people who want a lot of life and a lot of looks. Valiant's Slant Six Engine gives you more gumption than you ever expected in a compact. You get the economy of a compact and the passing power of a full-size car.

Webb Hecker and Barbara Elliott get clubs out of Lancer 770 Station Wagon while Kirk Richards and Linda Blow come up to the 7th green of the Birmingham Country Club. This lively compact cruises at turnpike speeds without pressing, but uses gas sparingly as a compact should. Torsion-Aire Ride gives Lancer an unusually comfortable ride—even with a full wagonload.

Sue Fortenbaugh, Tom Farnworth, Jim Cheney and Jean Purman get together at the Lutheran Church of the Redeemer around the new Plymouth Sport Fury convertible. Like all Plymouths for 1962, the Sport Fury is full of surprises. You get a lot more action on a lot less gas because it's all *live weight*. Acceleration is up as much as 10%, gas mileage as much as 7%.

PLYMOUTH ■ VALIANT  
SIMCA CARS ■ DEFENSE DIVISION

Harve Wallace meets Claudia Purdy and Bob Kennedy in the Dodge Dart at the Birmingham Country Club. The Dart is sized right in the middle of the big and the little this year. It's now priced with Ford and Chevrolet, and it's hard to find more car for your dollar. Every pound is live weight, making it easier to park, easier to whip through traffic.

Nancy Turner stays behind at the Birmingham Athletic Club as Wendy Westrate and Chal Brumbaugh take a test ride in the Chrysler 300. The 300 is Chrysler's new high performance series, offering race-bred performance with a sporting flair. In the past, it has been a limited edition car. This year, the new 300 series is priced just above the Chrysler Newport.

Lee Olson and Carol Goddard arrive at the Oakland Hills Country Club in the 1962 Imperial. This is America's most carefully built car. Leather hides, for example, are finished by hand, the broadcloth fabrics are shrink-fitted to seats with live steam. Imperial offers, as standard equipment, about every convenience yet thought of for motor cars.

### Here are the facts behind the action cars

Chrysler Corporation engineers have achieved a rare thing in these 1962 cars—they have increased performance and economy at the same time. Acceleration is up as much as 10%, gas mileage as much as 7%.

And only Chrysler Corporation cars offer you all these advancements *right now*: A battery-saving Alternator • Torsion-Aire Ride • Unibody Construction • Electric windshield wipers • Seven-soak rustproofing • Full-time power steering.

# Chrysler Corporation

Woodward at Adams—Midwest 4-4620  
W. Maple at Cranbrook—Midwest 7-0411

Detroit Since 1875

*Sanders*  
A SYMBOL  
OF QUALITY

Since 1875 the familiar Sanders script has been a symbol of quality to folks who enjoy Good Things To Eat. There is an element of pride in this signature—the pride of a man sure that his product is the finest that quality ingredients and skill can create.

CANDY BAKERY ICE CREAM  
LUNCHEONS

Unloading candy from Sanders is a pleasant job for Fred Muenchinger, Duane Nelles, Fred Ball and Geoff Gilbert. Sales of this candy helped reduce the senior dues of the class of '62.

any  
Damm

Averil - (Tranny)  
 It was really a panic  
 at the beginning of the year  
 when we discussed our  
 many problems. I'm sure  
 trends would have never  
 been so much fun without  
 you. You were wonderful in  
 all 3 plays - Keep it up - Have  
 fun! as if you won it) & Good  
 luck (you really don't need it  
 at this point!) Maulea Endeule

Averil,

It was been lots  
 of fun with you in our  
 French class. I hope that  
 you and Bill have lots  
 of fun in doing the play  
 that you are both in. I  
 hope that you are in one of  
 my bull classes next year  
 to live it up. Good luck  
 always.

Linda Foranford

Averil,  
 When I  
 decided to take  
 French II I never  
 thought it would be  
 like this! I'm sure it  
 wouldn't have been half  
 as gay without your little  
 smiling face. I'm sure it  
 wouldn't have been half  
 as fun (but hilarious)  
 without this summer!  
 Well, Proccenium  
 is just becoming  
 to be extra  
 special just  
 year now that  
 all the soph-  
 omores are in.  
 All kidding?  
 aside your in-  
 were great in  
 "Brantima"  
 roles.  
 Have a  
 terrific  
 summer '63.  
 Yours,  
 Phil  
 P.S. '64  
 Aren't you  
 glad I'm?

Bay, we sure  
 have had fun in  
 history this year haven't  
 we (joke) gym too. Remem-  
 ber the fights we use to have  
 with wet towels? Good  
 luck with all your boy  
 friends in the coming  
 years. By the way has  
 Jim paid you that 45¢

Peg Mancgold  
 '63  
 Yours,  
 Phil  
 P.S. '64  
 Aren't you  
 glad I'm?

It was  
 really a  
 panic  
 at the  
 beginning  
 of the  
 year  
 when  
 we  
 discussed  
 our  
 many  
 problems.  
 I'm  
 sure  
 trends  
 would  
 have  
 never  
 been  
 so  
 much  
 fun  
 without  
 you.  
 You  
 were  
 wonderful  
 in  
 all  
 3

 this  
 point!)  
 Maulea  
 Endeule

Over the years  
knowing and being  
with you these past  
three years.  
Remember all the things  
we did in Mr. Bird's room - How  
could we forget.  
I hope our friendship will  
never end...  
If you are ever around Ann Arbor  
drop in and see us...  
Buena suerte!  
Sue Kivian

-if you have time please  
write - I would love to  
hear from you...

- P.S.
- 1) Have fun
  - 2) Be good and Take Care
  - 3) Help us win Field Day -

THE MIGHTY GLASS OF '63"

amici,

Bonjour, mon belle ami. Vous êtes la plus belle jeune fille avec les deux  
brands... It was so much fun in French class this year. I  
wish that it would go on next year. Maybe we didn't learn as much  
as we should have but it was such a riot that it really doesn't matter.  
I'm glad that we switched to Mrs. Harris but we should have  
changed sooner. I'm sure none of us will forget the riot we participated  
in every day, 5<sup>th</sup> hour. The note passing business was also swinging at the  
end of the year. I know that I'll never forget the nicknames that you  
dangerous three stuck me with, "Hossie" will live with me forever.  
One thing I truly disagree with you on is that the Great Class of '64"  
will win Field Day in 1962 by a great margin. I still say that your  
shoes smell and why shouldn't they with your feet in them all day.

Good Luck,  
Glen Leachantush (Hossie)

Ravee

(Hope this page is saved for me.)  
This year sure has loads of memories for us - good & bad. Some I don't even wanna' remember. You sure know how to get your man! Dad & Frank! Congratulations. You'll have to clue me in on your techniques. Lunch has been especially fun. Without you I never would have met Larry, Mic, and Bill. But, naturally, most especially Mic. Your Fiat and Renault will always stay in my mind. Never been able to forget that nite when Jerry and Guy chased us all over town. I can still see that big Cadillac coming at us. It's like on J-Hop decorations was seen that day too. We'll have to get together lots this summer - the Bay isn't the same without our horns blowing and cops yelling at us. You sure were a sight with that mustache! Tell, thanks for sapping with me and my boy problems. You've helped much. Good luck in the future. Wonder what boy will light your eye next year?!!  
Love & stuff, Randle '63
